

In Tuberculosis

MICKLETON

Fresh air and over-feeding, combined with rest in the earlier stage of treatment, are now recognized as the only means of successfully combatting the disease.

LACTO-GLOBULIN

is the only concentrated nourishment which fulfils the requirements of the Profession : : : :

A pure and non-sterilized albumen, retaining the natural enzymes of fresh milk. A transformation of casein into globulin by a physiological process, and not by chemical synthesis. Rich in soluble phosphates, maintaining the alkalinity of the blood and increasing leucocytosis. The proteid of new milk in its most readily assimilable form. A natural food retained by the most delicate stomach, and decreasing all gastric and intestinal irritation.

Lacto-Globulin is so easily digested and so rapidly assimilated that it forms an absolutely ideal food for frequent administration between meals and before retiring. It will increase the natural appetite and the power of digestion through its affinity for and attraction of the gastric enzymes, and gives the maximum nutriment at the least taxation of the digestive organs.

ALL DRUGGISTS SELL IT.

4 ozs., 50c.

12 ozs., \$1.00.

40 ozs., \$2.00.
