“The Doctor Said

Recovery depended largely upon her receiving the proper nourishment.”

Yes, real nourishment—soluble, perfectly diffusible and assimilable.

Here is a typical clinical report showing the life sustaining power of proper nourishment.

“Panopepton saved my life—for my stomach was in so irritable a condition when I began to take Panopepton, that it would not tolerate even the peptonised milk. I lived on it for ten days, taking nothing else. After that period I was able to take a little milk gruel, partially peptonised with your Extraction Pancreatis. I still continue the use of Panopepton and find it quite invaluable as a support and nourishment during the night.”

PANOPEPTON peptonised bread and beef in a perfectly soluble and absorbable form, is of incalculable value in feeding the sick, sustains the system and quickly enables the digestive functions to resume their normal power.
