Scott's Emulsion

is an emulsion of cod-liver oil

Which contains the whole oil, all of it.

It is not a mixture of wine or alcohol with a little iodine and bromine.

It will not intoxicate nor lead to the alcohol habit.

It does not depend upon a stimulant for its therapeutic power.

It is, however, precisely what it claims to be:

The Best Norwegian Cod-Liver Oil.

The Hypophosphites and Glycerine.

Scott's Emulsion is a Food—not a stimulant.

Scott's Emulsion is a Fact—not an experiment.

Scott's Emulsion contains Fat—not a drop of alcohol.

Whenever cod-liver oil and the hypophosphites are indicated we ask you to prescribe "Scott's Emulsion," always permanent and palatable.

SCOTT & BOWNE, Toronto
