

## JUST TURN THE FAUCET

and enjoy an inexhaustible supply of hot water. The RUUD AUTOMATIC GAS WATER-HEATER is different—essentially better than all other water-heaters. The difference is a pronounced betterment in hot-water service. Imagine for a minute an ideal hot-water service. Wouldn't it begin and end at the faucet?

## THE RUUD AUTOMATIC GAS WATER HEATER

has done just this. It has reduced the hot-water problem to a turn of the faucet—it's as easy to get steaming hot water now as cold water—you don't go near the Ruud itself—you don't have to strike even a match. The Ruud differs from ordinary water-heaters in efficiency. It is independent of the kitchen range—a luxury in summer time—stands in your basement—self-operating and safe. See our special exhibit at our New Salesroom. Writing paper and desk at your leisure. Pure drinking water.
