

October 14th, 1929.

Dr. G. S. Whitby,
National Research Council,
OTTAWA.

Dear Dr. Whitby:-

I should have acknowledged before this your letter of October 3rd, in which you put forward the suggestion that you might be made an Honorary Professor of McGill University.

There is a good deal involved in this matter and I would like a little more time to consider it before giving a definite decision. Somewhat similar recommendations came before the Graduate Faculty last year and were unfavourably received. However, as I said above, I would like further time before giving a definite answer.

All good wishes.

Yours faithfully,

Principal.
