

## A Rebuilder of Gowns

**A**LL your discarded and out of date dresses can be beautifully and artistically remade into the styles of to-day with the aid of a **PERFECTION ADJUSTABLE DRESS FORM**.

Think what it means to go up to the old horse-hair trunk under the attic eaves and take out the garments you have put away from time to time just because the material had outworn the styles—a perfectly good coat that can be re-made, a dress to be retouched and altered—there's a good suit that can be turned and pressed and fitted on the **PERFECTION ADJUSTABLE FORM** and behold—the newest thing in spring styles and so on ad infinitum; for the make-over possibilities with the possession of a **PERFECTION ADJUSTABLE FORM** are unlimited.

**And again we emphasize the saving in material and expense that will more than pay the slight initial cost of owning a **PERFECTION ADJUSTABLE FORM**.**

Note the advantage of always being able to correctly adjust a Perfection Form to any figure or either regular or irregular proportions. This advantage is not restricted to bust measurement alone as might be supposed. The specially patented hinged waist of both the Queen and Empress make it practically impossible to misfit waist and skirt measurements. Nowhere do these special adjustments interfere with the fitting or pinning surface of the form.

There are no intricacies or difficulties about making adjustments with a **PERFECTION ADJUSTABLE FORM**. Just a turn of the wrist or the pressure of the foot—so simple a child can do it.
