#### BOOZE BRAIN BAD ASSET IN THE AIR, MAYNARD SAYS

New York, Dec. 8.—The secret of the failure of some of the pilots in the recent transcontinental air race "can be attributed to too much booze," Ideut. Belvin W Maynard, the "flying parson," declared, in a statement made public tonight by the Anti-Saloon League. "If all of them had been as sober as myself I probably would not have been the winner." he added.

Lieut. Maynard said that many of the fatal air accidents were due to pilots flying "half intoxicated," or "with a hangover from the night before."

"A pilot needs every bit of grey matter God has given him in an emergency, and to have a brain clear from hangovers and the effects of booze is a great asset," he added.
