## COBALT---Hargrave Dealt in to Extent of Thirty Thousand Shares---COBALT THURSDAY MORNING

### Dulness the Leading Feature While Some Issues Are Easier

Trading is Limited and Confined to a Few Stocks-Beaver, Foster and Ophir the Market Leaders.

cal exchanges to-day was even more limited than usual, and an easier tone was plainly apparent, tho no material declines occurred. Public buying orders were scarce and prices naturally desponded with a weaker trend, but responded was 1 4to 24 inches wide, so with the silver. Several native silver nuggets weighing six to eight pounds, have already been taken from a few feet below the surface, and the wall rock is heavily shot with native silver.

New Find on Weight pounds, have already been taken from a few feet below the surface, and the wall rock is heavily shot with native silver. tall weakness in the majority of cases, hile some of the issues even made ivances despite the lack of orders. Public interest was concentrated to a certain extent in Beaver, which was struck at the Kerr Lake mine. This is entirely new, and a very important find.

Cobalters Swarm to the Property

See the Rich Vein. Hargrave continued its upward Standard Stock and Mining Exchange, course yesterday, advancing to 60, and Cobalt Stocks closing at 60 bid. The recent rich strike on Hargrave aroused a great deal of interest in this issue. Almost every rig in Cobalt was engaged by eager sightseers to go out to see the sliver vein for themselves, and even greater events are said to be near a and. The main workings on the famous Jacobs vein are now down 365 feet, and at the 375 foot level it is to be cut and a drift run into the Kerr Lake line. It is expected that soon after this great revenue producing vein is tapped Hargrave will begin shipping

SUCCESS ON SHAMROCK

Four-Inch Vein of Cobalt and Niccolit Struck at 200-Foot Level.

Recent despatches from the Sham rock mine report that they are meetin, with great success in the drifting of the 200 foot level, having encountered a four-inch vein running rich in cobal and nicolite. The management expect to run into rich silver values at any time now.

MOST IMPORTANT FIND Northern Mining Company Strikes It

Sell. Buy.

Sell. Buy. more extensive than we imagine to-day, but within a very short time set-tilers will either have to buy land or go to the far north of Alberta or Sas-

As a matter of fact, Mr. Griffin stated that the proportion of settlers who bought land was continually increasing, while the number of homesteaders was comparatively dropping off, owin gto the steady way in which all the available land within easy access was being taken up. The land sales of the Canadian Pacific during the past year had shown a decided increase over those of previous years, owing probably to the better class of settlers

who are coming over.

"The talk of a big harvest has, of course, affected our land sales," said Mr. Griffin, "and the results of this year's operations have been decidedly good. A marked feature of the year's sales has been the number of men who bought land in districts where there are still free lands. The chance of getting 100 acres for nothing naturally ting 100 acres for nothing naturally appeals to the settler, and a great many have bought land this year in such a location that they could also take up a quarter section. This has been particularly the case in southern Alberta and parts of Saskatchewan, notably in the couptry west of Weyburn, which is the starting point for the C.P.R. line to Lethbridge."

As a result of the increasing demand and decreasing supply of free lands.
Mr. Griffin stated that there had been a steady appreciation in the prices of land thruout the west, the figures run-ning from \$10 to \$25 an acre, according 281,110 to the location and quality of the land.
1,629,762 There had also been a very active de2,094,681 mand for inrigation lands in the Calgary district, where the prices ran from \$25 to \$30 an acre."

# WHAT HAS SILVER LEAF

Something Worth While is Going to Turn Up.

COBALT, Aug. 23.—There are persistent rumors affoat that Silver Leaf have something that looks really worth while the enquiry made at authoritative

of that same unfortunate property; unfortunate, because so many good

The famous Crown Reserve was, as most people know, first discovered on the Silver Leaf, but was only traced for a few feet, in values, and this same vein on the Crown Reserve is one of the most productive veins in

the camp to-day.

Then again the old original silver sidewalk of the Lawson property was stripped within 200 feet of the Silver Leaf, and in vain have the Silver Leaf management been able to discover it. But that's a characteristic about

mining—"nobody knows."
So far as location is concerned the Silver Leaf is ideally situated and then are quiet rumors about that some morning, citizens of Cobalt will wake up to find Silver Leaf "has it."

Last week the Silver Leaf struck a nice ore shoot on the 75-foot level, which in one place was 8 inches wide.

The value however was inches wide. The vein, however, was irregular and aitho it carries high values would not average ever 2 inches in width.
Still there are persistent rumors that of Silver Leaf yet.

## INVESTMENTS AND SPECULATIONS

Hargrave closed at 60 bid last night, and was in great demand. Aside from any speculative movement in these shares, we believe they can be bought and held as a sure investment. We continue to advise buying of Silver Queen, Silver Bar, Silver Leaf, Beaver, Otisse and Rochester on any further decline for profits in the early future.

The dip in Rochester yesterday had the ear-marks of a premeditated drive, rather than any real weakness. La Rose and Niplasing are both good investment buys. Special staff employed to give information on mining securities.
