Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Itsing in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destrey. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure sir, fifth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tuberclas; in the glands, swellings; and on the surface, ecuptions or sores. This foul corruption, which genders in the blood, deproses the energies of lies, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, wast numbers perish by disorders stand the attacks of other diseases; consequently, was numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many districtive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and thair health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Sach a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla, the most effectual remedy which the medical akill of our times can devise for this every where prevailing and fatal-malady. It is compained from the most active-remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. disorder from the blood, and the rescue of the system from its destructive consequences. Honce it should be employed for the cure of not only scrotula, but also those other affections which arise from it, such as ERUPTIVE and SIN DISEASES, ST. ANTHONY'S FIRE, ROSE, OF ERYSTELLES, PLEFIES, PLEFUES, ROSE, TETER, ROSE, OF ERYSTELLES, PLEFIES, PLEFUES, ELLOYERS, BLAINS AND BOILT, FROMORE, TETER, and SALT RHEUM, SCALD HEAD, RINGWORM, RECUMATISM, SYPHILITIC and MERCURIAL DISEASES, DESCRIT, and, indeed, ALL COMPLAINTS ARISING FROM YITLE AND OR IMPURE BLOOD. The popular belief in "suspectify of the blobd" is founded in truth, for scrotula is a degeneration of the blood: The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC, are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so sample and inviting.

disease.

So wide is the field of its usefulness and so numerous are the cases of its cures, that almost severy section of sountry abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once twied, its superiority over every ether medicine of its kind is too apparent to escaps observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs thas are incident to out climate. While many inferior resuccies thrust-dopon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures been nameous, and too remarkable to be forgotten.
