

Send For a Copy of our January Investment List

It is now in the printers' hands and will be ready right away. It is probably one of the most important—if not the most important—which we have issued in the past four years. It comes at a time when the war is over, and when there is really a marked scarcity of the highest grade bonds on the market at war time prices and yields. Is your name on our list? If you are not sure, better drop us a line so that you will not be disappointed in getting it.

ORANGES ARE TO BE CHEAPER

Ottawa, Jan. 3.—The cost of living branch recently made investigation into the orange market, and reports that the chief cause for high prices having been removed, prices during the succeeding months should be decidedly lower. During the months of October and November the price of the better grades in the United States market, whereby the cost to the Canadian buyer is governed, was abnormal. High and conditions very unsettled, with limited quantity offering. As a result the smaller members of the trade hesitated to handle oranges and competition was to some extent reduced. Now, however, that normal market conditions are restored, with the main California crop on the market, competition should no longer be restricted, and the dealer's margin have declined from the former amounts. Nevertheless, we deem it advisable, the department says, to assure ourselves that profits through the winter are reasonable and for this purpose shall continue our investigations.
