Montreal, May 3, 1859. Circulars by the "North Briton" to date 19th April, describe the weather as bitterly cold with frosty nights, from which, however, no danger was apprehended to the growing crops. The markets throughout Brits in and the Continent were a shade dearular of R. S. M. Bouchette, with regard to er. Considerable arrivals at Inverpool of McMartin. Esq., County Attorney, with re-flour from France, convinued to demonstrate ference to a difference of rate on lnn Licenses. the extraordinary productiveness of that the extraordinary productiveness of that country which, besides supplying its own large population, has such a surplus to export It has been thought that the great sub-division of property which prevails in France was unfavorable to productiveness, but facts do not appear to bear out this the ory. Canadian wheat was quoted at 9s 2d to 10s per cental of 100 lbs., and Canadian flour at 11s to 12s 9d for the same weight. I his new mode of selling in Eugland, so sensible in it-elf, should, it appears to us, be followed in Canada, and so a step to it the barrel of flour should be made 200 lbs. weight, as is already the case with the barrel of oat-

> Ashes in Liverpool had gradually advanced to 30s 6d for po's, and 31s 6d for pearls; but at these prices they were very dull.
> In the New York market flour has been advancing 5 to 10 cents daily for about a week, so that prices are about 40 to 50 cents bigher on the lower grades, than they were a sbort time ago.

> Letters and papers from Western Canada and the Western States, mention that the weather has been cold, but, upon the whole, favorable to the growing crops, which are, generally speaking, remarkably promising. The weather in 'his vicini y has been bright and dry, and consequently, extremely favorable for seed time.

> Ashes continue to arrive freely, and sell eadily. The extreme price that we have heard of for superior bills of Pots is 31s. 44d.,-\$6.274- and Pearls 32s. 6d.-\$6.50. The price usually paid is about 5 cents less. By the comparative Ashes statement, furnished by inspectors to 1st May, we find that the receipt of this year to that date, as compared with last year, howed an incease of 1,323 bris., and as the stock on 1st January was also greater this year than last by 709 bris, it follows that there has been about 2,000 bris. more in the first four months this year han last; the whole quantity being ,742 brls., of which 1,503 are Pearls. Butter is rather firmer, on account of some

considerable sales for the lower ports. The price is 15 to 20 cents for old. There is lit; tle or so new yet in market.

Flour is buoyant, the asking price for Up per Canade Superfine being \$7 to day, which is a rise of 25 cents, but we have heard of no ransactions at that rate. Several considerable parcels have arrived since the opening of the nav gration, and during the same time the demand for Lower Canada and the Lower Ports has been active. The higher

grades are not much sought after. A considerable proportion of the unsound Flour that has been thrown on the market at \$4,to \$5,50, is so offensive to the smell that it cannot be wholesome for food. We have heard of a sale of sour Rye Flour, at \$5,55.

Pork.—The price of Mess has declined in consequence of the fail in New York, and may now be quited at \$18½ to \$18½. The former being the price offered by dealers. The lower grades, on the courary, are advancing both in New York and this market, robably on account of the war prespects. Prime Mess is he'd at \$15 here, and Prime

Superfine.

The prospect of war in Europe will probably exercise some influence on prices, as it must interfere with the exports of Breadstuffs from the producing countries of Europe, besides taking off a portion of the population from agricultural pursuits.
