

Adam H. Stephen.—Salmon-trout, 28th October to 5th November ; whitefish, 20th November through December. (p. 176, pt. I.)

John Nelson.—Salmon-trout, first run 1st October to 20th October (p. 178, pt. I.)

John McCrae.—Salmon-trout, 20th to 25th October. (p. 186, pt. I.)

Alexander McPhee.—Speckled-trout, some as early as September. (p. 267, pt. I.)

BARRIE.

John Hines.—Salmon-trout ripest 1st October ; close season for salmon-trout and whitefish should begin 1st October ; brook-trout, 1st September. (p. 276, pt. I.)

MIDLAND EVIDENCE.

Albert Hutchins.—Whitefish, heat of spawning 15th to 20th November, congregate about 20th October ; salmon-trout, end of October. (p. 227, pt. I.)

Charles W. Phillips.—Catfish spawn in June ; close season should be 15th May to 1st September ; maskinongé spawn a little later than pike ; bass, 15th June to 15th July ; pickerel in May ; salmon-trout, 1st to 15th November ; whitefish, same time. (p. 229, pt. I.)

Samuel Fraser.—Salmon-trout, 15th October to 15th November ; bass in May and June, also maskinongé ; herring largely in November, about the same as whitefish, which spawn later than salmon-trout ; pickerel in April, as soon as the ice breaks up ; mud-pouts in June. (p. 231, pt. I.)

J. A. Smith.—Salmon-trout, 15th to 20th October, on into November ; large black trout ripest 10th to 12th October ; pot-guts about the same, but spawn in deeper water, not on the shoals ; whitefish ripest 10th to 12th November ; a little later than salmon-trout and take longer to spawn ; herring in November ; bass in April and May and on into June, they guard their spawning beds and young in June and July ; pike and maskinongé, middle of April to middle of May. (p. 235, pt. I.)

Frank Bonter.—Bull-heads in June ; pickerel from 15th to end of April ; pike earlier ; bass in June ; suckers and mullet early in spring up the rivers and streams. (p. 239, pt. I.)

John Yates.—The male salmon-trout come on 18th to 20th October, females follow, 25th October, the month of November would only cover ten days of their spawning time ; whitefish, 8th to 9th November, done spawning 15th to 20th, they spawn very quickly ; black bass, 1st to 10th June, and watch their nests for two weeks. (p. 241, pt. I.)

Captain Whartman.—Salmon-trout, 20th October to 5th November ; whitefish, 1st to 20th November, ripest 10th to 12th November, with variations of five days, according to locality ; herring spawn later ; pickerel, 20th to 25th April ; pike earlier ; bass in May and June, the bulk 15th June, and then watch their young fry ; mud-pouts in June, they also watch their young. (p. 244, pt. I.)

William Hodgins.—Salmon-trout ripest 25th October to 10th November ; whitefish, 10th to 25th November, but both species spawn earlier and later ; pickerel, April and May ; bass, May and June. (p. 247, pt. I.)

W. W. Church.—Salmon-trout 20th to 30th October, some later ; whitefish ten days later ; herring, 10th to 20th November ; same dates for Lake Ontario ; pickerel in Lake Ontario from 25th April to 10th May ; bass in June ; pike in April ; maskinongé, 10th May ; catfish in June (p. 250, pt. I.)

W. Gerow.—Salmon-trout in Lake Superior come in to spawn 10th September, and on south shore of the Georgian Bay, 19th October ; north shore about the same ; they remain about fifteen days and then leave the shore ; in Lake Superior they have done spawning by 20th October, and in the Georgian Bay about 1st November ; no spawning of any account is done by salmon-trout after 1st November. Whitefish come to the shore to spawn about 1st November in Georgian Bay, and remain ten to fifteen days, some spawn before, some after ; herring spawn in November ; black bass in June ; pickerel between 25th May and 1st June ; catfish in June. (p. 255, pt. I.)

Joseph Cunningham.—Whitefish gather on the shoals to spawn in November ; ripest 10th to 15th ; salmon-trout come in latter part of October and through Novem-
