

Mr. Edison *Announces* The Final Perfection of the Disc Phonograph *as a Real Musical Instru-* *ment of the Highest Type*

THIS new instrument is the result of many years of experiment and investigation by Mr. Edison. All mechanical timbre is eliminated. All sounds are recorded and reproduced with absolute fidelity to the original, and every shade of volume and overtone is preserved. The tone is superb. This instrument opens to music lovers for the first time the great store of fine music which heretofore has been impossible of reproduction.

The Diamond and the Disc

Changeable needles or points are not used. The reproducing point which traverses the record is a genuine diamond, permanently mounted; it is never changed and never wears.

The records are in a disc form, of a material which is new in chemistry and of so great hardness as to permit the reproduction of the myriad of faint overtones which alone give quality to music. These records are truly indestructible.

The method of recording these new Edison records is also new, and the processes of manufacture are unique and new in every detail.

Special Motor

The mechanism of this new instrument is powerful, and is governed as accurately as a chronometer in order that the pitch shall at all times be accurately reproduced.

Several thousands of these new Edison Diamond Disc instruments have already been shipped from the factory to music dealers throughout the United States and Canada. Go and hear the records—you will be surprised.

Write for booklet illustrating and describing the different models

Thomas A Edison

115 Lakeside Avenue

Orange, New Jersey

The new principles and methods embodied in the Edison Diamond Disc have also been applied to the well known Edison Cylinder Phonograph, and the new Cylinder instruments are now on exhibition by Edison Dealers.
