**Greatest Fleet** 

## Ever Mobilized [By Special Wire to The Courier] MONTREAL, July 15.—A

London cable to the Daily Mail says the test of mobilization of the British navy, which this year is taking the place of the usual annual manoeuvres, began today. At the end of February the Admiralty issued invitations to the men of the Royal Fleet Reserve to volunteer for eleven days' training, and the results were so satisfactory that no fewer than 483 warships of all classes are fully manned with efficient ratings for the next ten days. No fleet approaching these dimensions has ever before been

United States Wants to Import Electric Energy From Niagara Falls.

Would Also Build a New Canal on the American Side, it is Said.

[By Special Wire to The Courier] WASHINGTON, July 15.—The House Foreign Committee had bewater diverted for power purposes Falls on the American side. committee has called a meeting for a general discussion of the Niagara diversion problems to-day when representatives of the Seneca Indians were expected to appear in support of their claim to rights in the Niagara under the Pickering treaty.

Secretary Garrison accompanied his letter with a report by Brigadier-General Kingman, chief of engineers of the army, declaring that the enormous commerce on the great lakes probably would soon demand a ship canal between Lakes Erie and Ontario on American soil. Secretary Garrison stated that there was apparently no good reason for an express limitation on the water diverted below the falls.

The committee had before it the Cline and Smith bills, which Secretary stating that they closely approach the of the Niagara River and for the best

Ontario on American soil." The chief of engineers added that to extend the present 15,600 cubic feet per second to 20,000 or to a daily average of 15,600 per second might materially increase the difficulty of adjusting the matter to the advantage of the nation, and interfere with the scenic grandeur of the falls.

Stating that while the Burton Niagara River diversion law was in opration, the average cost of administration was \$4000 a year. Secretary Garrison submitted an amendment to the proposed legislation so as to declare that the purpose is "to authorize such control and use of the waters of the Niagara River as shall be best adapted to conserve and utilize the water in the interests of navigation, full development of what power and other public purposes," and to appropriate \$50,000 for examinations and investigations to carry out this general purpose.
