Religion in China.

China proper is divided into nineteen provinces. Most Chinese are Buddhists and Confucianists at the same time; many of them are also Taoists. The Mahomedans in China number about 30,000,000, and are found chiefly in the northeast and southwest. There are about 1,000,000 Roman Catholics, Protestants number 60,000. Many of the natives are still nature worshippers. There are at work in the Flowery Kingdom about 66 societies, 18 of which are British, 13 Continental and 17 American, and they support about 1,500 missionaries. Native helpers number over 20,000 and native churches 525. Last year over 500,000 copies of the Bible were distributed.

The green grocer is one who trusts dead-beat customers. The only way to get a hen out of the garden is to go slow but shoo'er.

Spices are not as a rule noisy, but you have all heard the ginger snap.

Many a man who is a good shot in this world hopes to miss fire in the next.

A man never knows that a woman

has any old clother data.

tience-A Principle Which is Now Being Extended in Novel Directions-An Arti-

The strongest man on earth, to quote the play bills, and the gratest inventor of the streem man on earth, to quote the play bills, and the gratest inventor of the streem extremely at Menlo Park, New Jersey. The meeting was an interesting one, and the giant of brain and the grain of muscle found much to addite in each other. Sandow may reled at Elison's inventions, and the Wizard gazed longingly and enviously at the prodigious muscles of the strong man. The latest development of Edison's genius in the line of photography, on which he has been working for the past five years, the kinetoscope, was practically completed a few days ago, and in casting about for a unique subject for thirst photograph by the new process. Edison chose Sandow as the mostfitting and striking character.

The main principle of the kinetoscope, as is already known, consists in the taking of a great number of impressions by a camera in a limited space of time, thus obtaining a continuous photograph of the entire motion of the object or person. The photographs follow each other in seath entire motion of the object or person. The photographs follow each other in seath entire motion of the object or person. The photographs follow each other is seather than the samples from a current of the past of the great majority of the people no one has any right to complain of the ingenious devices and the arreaching experiences that have brought such things in past of the great majority of the people no one has any right to complain of the interesting the complain of the current of the object or person. The photographs followeach other in seath entire motion of the object or person. The photographs followeach other is not one that have brought such this such past of the such as a proper of the proper of the

A Few Facts.

Here are a few solid facts:

The poet Tennyson could take a worthless sheet of paper, and by writing a poem on it, make it worth \$65,000

—that's genius.

Vanderbilt can write a few words on a sheet of paper and make it worth \$5,000,000—that s capital.

The United States can take an ounce and a quarter of gold and stamp upon it an "eagle bird" and make it worth \$20—that's money.

The mechanic can take a material worth \$5 and make it into a watch worth \$100—that's skill.

The mercant can take an article worth 75 cents and sell it for \$1—that's business.

75 cents and sell it 40° \$1—that's outness.

A lady can purchase a very comfortable bonnet for \$3.75, but she prefers
one that cost \$27—that's foolishness.

The ditch-digger works ten hours a
day and shovels three or four tons of
earth for \$2—that's labor.

The editor of this paper can write a
check for \$\$0,000,000, but it wouldn't be
worth a dime—that's rough.—Young
Lutheran.

A Queen's Odd Needle,
Queen Victoria is in possession of a
curious needle. It was made at the
celebrated needle manufactory at Redditch, and represents the Trajan Column in ministure. Scenes from the
Queen's life are depicted on the needle,
so finely cut that they are only discernable through a microscope.

OF RED BANK BANCH

Reference is frequently made in technical papers to the fibre of iron and steel and the relative strength of these metals when the same is injured in manufacture. Either this is a misnomer—the fibre of iron—or else a very curi-cous transformation takes place in the manufacture of it. There is certainly no fibre in iron ore, the most enthusias-Extended in Novel Directions—An Artiste of Valuable Interest.

Cold storage of perishable meats, poultry, fish, fruits and vegetables has been practiced in primitive ways since the beginning of civilization. But the development of cold storage to such proportions that it has had a vast effect upon the commerce of the world has all been within very recent years.

The storage by the ancients of food in caves and the suspension of butter and meat by our grandfathers in deep wells were both in their way effective, but those methods are a far cry, indeed, from the storage of thousands of tons of perishable things in the great warehouses constructed for the purpose in every city.

There is a difference between cold storage and freezing storage and freezing storage. The latter is for meats and fish and generally the great butchers do their own freezing, and in refrigerator cars send the meats to the consumers or to the steamers with refrigerator storage compartments for shipment abroad. The freezing storage places should have a temperature of something like ten degrees above zero, but it is likely that more frequent ly than not the temperature rises to more than ten degrees higher than this in the refrigerator cars and steamship. By the use of ice alone it is difficult to get and maintain a low temperature. Where it is done successfully the chemical ice machines with powerful engines are employed.

These devices for freezing and transporting meat great distances while frozen have worked wonderful changes in meany crowded parts of the world.

A Remarkable Marriage.

A man in Lebanon, Ind., prominent in business, is married to a totally blind woman, who was blind when he married her. He was younger then by ten years than he is now, but he was prosperous, ambitious and successful. She had never seen the sunlight. She was as handsome as Nydia, and as poor. He married her, and they have lived together in a peace that passes understanding ever since. They have two did bright children, healthy and perfect a good home, thriving business, at a little fortune they have earned themselves, and a public regard that has the limit. She would give one-half of her life just to see her husband and children. It would touch your heart to see how gentle he is with her, how tenderly they lead her here and there. In this age, when marriage means too little, when insufficient thought is given to the only thing worth thinking of—the love that levels and exalts—when a husband true and a wife content are frequent exceptions, is it a wonder I bared my head in that presence? How noble a man he can be levels and exalts—when a husband true and a wife content are frequent exceptions, is it a wonder I bared my head in that presence? How noble a man he can be levels and exalts—when a husband true and a wife content are frequent exceptions, is it a wonder I bared my head in that presence? How noble a man he can be levels and the Captain at home. We have been insufficient thought is given to the only the problems of the seat end of the house and that when he was in town the other day he purchased a large supply of cartridges, but these things will make no difference to us. Our errand will be totalk metropolitan journalism, and as there are seven different hills which captain at home a large supply of cartridges, but these things will make no difference to us. well as to shippers.—English Mechanic.

Catarrh.

A prominent investigator, in a recent treatise upon the origin of catarrh, sets forth the interesting and alarming fact that in a large proportion of chronic cases he has found that the trouble could be directly traced to the irregular and mischievous habits of youth.

He asserts that often in childhood there is, accompanying an increased activity of all the functions of the body, a superabundant supply of mucus secreted by the membranes of the nose. In other words, there is present in children, along with the so called "scrofulous taint," a marked predisposition to "sunffles."

In addition to this, there is a tendency, which by no means reflects credit on the bringing up of the child, constantly to snuff up these increased secretions, a proceeding which is productive of the gravest results in after years, even if the practice be then abolished.

If the secretions of the nose, whether particularly increased or not, are forced backward for any length of time, not only will the posterior canals of the nose be overburdened with mucus, but the mucus will flow backward and down ward, and in the throat will cause the disagreeable and too familiar symptoms attending a case of chronic catarrh.

On the other hand, if we are always careful to instill in the minds of the young the importance of properly clearing out the nose as occasion demands, we shall at once begin a course of schooling which is of the greatest benefit, in asmuch as the increased secretion from the whole canal will follow the general course of the flow, and even the farthest recesses of the nasal cavity will partake of the attempt to remove the secretions from the body instead of allowing them to cacumalate.

of the attempt to remove the secretions from the body instead of allowing them

THE ARIZONA KICKER.

A GALL MADE ON CAPTAIN DELANO

by the Rural Editor.

Thursday of termoon next, as soon as the regular ise of 'se Kicker is in the mail, we shall unter to Red Bana and to pay a visit to Captain sent us in twelve goose eggs as a token of his affection, and the next week he bought twenty extra copies of the paper, expecting to see a half column article expressive of our surprise, delight and gratitude. It wasn't there. Six months ago, as he must remember, we distinctly announced that the Kicker was hereafter to be conducted on strict lines of metropolitan journalism, and metropolitan tincity announced that the kicker was hereafter to be conducted on strict lines of metropolitan journalism, and metropolitan journalism makes no announcement of butter, eggs, potatoes, carrots, pumpkins or apple sass laid on the editorial table.

The editor of a great metropolitan journal no doubt loves those things just as much as the editor of a weekly, but dignity will not permit their acceptance. Had Captain Delano called in person and offered to sell us those twelve goose eggs for fifty cents we should have planked down the money. Had he asked us to accept them as a present we should have reminded him of our change of programme. When he falled to find an article starting off with "Captain Delano, the genial, big-hearted owner of the Red Bank ranch, has laid twelve large and luscious goose eggs on our editorial table," he stopped his paper and began blowing around about our abilities as an editor.

As stated above, we shall ride over to the stanch. Thursday afternoon, reaching it.

to monkey with and were constantly shower benefits that he bought an acre of land in Buckhorn and gave out that he intended to establish a private graveyard, with a hospital for cripples close at hand. Residents of his town told us not over two weeks ago that Mr. Thomas was popularly supposed to have sand enough to go out to Bill Williams' mountain at night, scare up a grizzly bear of the largest sortand pode him in the eye with the lighted end of a cigar. We were pleased to see our esteemed contemporary of the Journal, and as soon as we could get away from the press of business we took him out to show him the town. We noticed that he had two guns and a bowie knife with him, and his demander of the largest sortand pode him is demander went to prove that anyone walking on his coat tails would get hurt. While proceeding down Apache avenue, to let him see the wonderful progress of civilization, we ran up against Hang Ling, the heathen laundryman. The critter stole ten pounds of roller composition from the Kicker office a few months ago, and we caught him and almost broke him in two for it.

We were passing the heathen almost unnoticed when he uttered a Chinese warwhoop and rushed at Mr. Thomas, and there was a mix up for a minute. The discovery that Hang Ling had sand paralyzed us for a time, and we did not offer our esteemed contemporary any assistance. We of course looked for him to pull his guns and open fire, or at least make use of the corn cutter in his belt, and the reader can imagine our feelings and those of the crow which quickly assembled when Mr. Thomas family shook the heathen off and started up the avenue on a gallop. Hang Ling not only followed close at his heels, but gave him the book the heathen off and started up the avenue on a gallop. Hang Ling to only followed close at his heels, but gave him the bown again, and as soon as the affair becomes known in Buckhorn and refused to pay it, but his victim kept right on travelning toward the Utah line. It isn't at all likely he will ever show up in this

AN OLD LADY'S STORY OF DEEP INTEREST TO OTHERS.

As an elderly man mounted the chair of a bootblack in a Smithfield street barber shop the other day he said: "Now, boots, if want you to be careful of that right foot; deal gently with it." "Oh! that's all right, boss," said the colored bootblack, as he set to work; "I knows what corns is, boss." "I haven's any corns," said the customer. The boy polished and rubbed away, but his curiosity got the better of him, and he ventured: "Well, bunions is just as bad as corns, boss." "It's not a bunion," was the reply of the gentleman, which more than surprised the bootblack, and piqued his curiosity. He kept rubbing away at the shoes, evidently weighing in his mind how he could get at knowledge of the trouble in his customer's foot. Finally a beam of intelligence spread over his thoughtful features, and he said: "Well, rheumatiz is worse as either corns er bunions." He then stopped and looked expectantly into his customer's face, but a look of bewilderment took possession of him when the man in the chair said: "No, I never had rheumatism." By this time the boots were polished, so the gentleman got up, and, after shaking himself, stepped down from the platform. But the bootblack's curiosity had been arroused to a point where it had to be satisfied, so he threw away the indirect method and asked his customer point blank: "Say, boss, would you mind telling me what's the matter with your foot?" "Why, certainly not," was the reply. "I lost my leg in the army, and I wear a wooden one. I didn's want you to get the mechanism of the ankle out of gear." The bootblack was so surprised that he dropped the dime which the man gave him.—Pittsburg Dispatch. From the Goderich Star. For upwards of three years the

A Huron Co. Miracle.

has been republishing articles from various papers in Canada and in the United States recounting miracles in healing, wrought, often in forlorn cases, by the use of the preparation known as Dr. Williams' Pink Pills for Pale People. A more or less intimate acquaintance with the publishers of several of the newspapers warranted us in believing that the cases reported by them were not overdrawn or exagger ated advertisements, but were published as truthful statements of remark able cures from human ills worthy of the widest publicity, that other sufferers might be benefitted also. For some time past we have heard the name of Mrs. Robert Bissett, of Colborne township, mentioned as one who had experienced much benefit from the use of Dr. Williams' Pink Pills after years of painful suffering. Curious to know the particulars, a representative of The Star called upon her "Once when I was in one of my back counties," said a Tennessee congressman, "I stopped at a small hotel where I was an object of curiosity to a couple of natives, evidently man and wife. I was stitting out on a little porch in front of the house reading a newspaper, and they were watching me as if I were some kind of new creation, but I tried to remain unconscions of it, behind my paper. Finally they began to talk.

> Acting on this cordial invitation, the reporter drove out to the Bissett homestead. Mrs. Bissett was found enjoying an afternoon's visit at the residence of a neighbor, Mrs. Robertson. She laughingly greeted

so, he ain't, said the man, he's the congressman frum this deestrick; that's what he is.'
"Did he tell you so?' she asked incredulously. she had no wish to figure in the new the facts in her case. "It is about nine years," she said, "since I was first taken down with rheumatism and for seven months I lay helpless in bed unable to raise or turn myself. I doctored with local physicians and I suppose the treatment I received must have helped me for I was able to go being able to put a foot under me, or help myself in any way. I tried everything, bless you—doctors, baths liniments and medicines, and of course suffered a great deal, being troubled also with asthma. But although I finally got on my feet again I was not

able to do anything, and could get across the room only with the help some one and leaning on a chair which they would push before me. By and by I was advised to try Dr. Williams Pink Pills, and though of course I had no faith in anything, I bought some at Wilson's drug store and began their use, and when I had taken two boxes me, although I have not taken them for a couple of months. I can now go around alone, and although I always keep my stick with me to guard against an accident or a mis-step, I can

safely say I am wonderfully improfrom the use of Pink Pills. I am longer a helpless burden and care of my children that I was, and Pink Mrs. Bissett has been a woman of great activity and industry, and is

"Well, I noticed that my husband always slept the soundest when it was time to get up. No matter how wakeful he had been all night, just as soon as rising-time came he went to sleep and slept like a log." 'That's just the way with Mr. Bloobumper, exactly. But tell me what you did." "Well, when Mr. Cawker woke up in the night and began to toss about and say he couldn't get a wink of sleep, I simply went across the room, pretended to look at the clock, and said: 'Oh, that's all right. You don't need to go to sleep again. It's time for you to get up.' That always put him to sleep in a minute."
