

SUNDAY SCHOOL LESSON

LESSON III.—JAN. 21, 1912.

The Birth of Jesus.—Luke 2: 1-20.

Commentary.—I. Jesus born in Bethlehem (vs. 1-7). The explanation of the presence of Joseph and Mary at Bethlehem at this time is found in verses 1-4. A decree had been issued by the Roman emperor, Caesar Augustus, that a census must be taken of the subjects of his empire...

II. His birth announced to shepherds (vs. 12). In the same country—in the region of Bethlehem, where the raising of sheep was an important industry, keeping watch by night over their flocks...

III. The angels' tribute (vs. 13, 14). A multitude of angels had realized that a great gift was being brought to earth, and their voices raised a song of praise to the God of grace and power. Heavenly host—This multitude of the heavenly host had just now descended from on high to honor the new-born Prince of Peace...

IV. The shepherds' visit to Jesus (vs. 15-20). Let us now go—The gracious words of the angel, and the chorus of the heavenly host had now been brought to their minds and they were determined to learn more of the blessed news of the new-born Prince of Peace.

WRIST WATCH FREE. Ladies! here is a splendid chance to win a beautiful watch. The watch is a beautiful timepiece with a gold case and a diamond-set dial. It is a watch that will last for years and years.

LADIES! here is a splendid chance to win a beautiful watch. The watch is a beautiful timepiece with a gold case and a diamond-set dial. It is a watch that will last for years and years.

Eight Years of Bad Eczema on Hands

Mrs. Mary A. Bentley, Montreal.

Cured by Cuticura Soap and Ointment. Mrs. Mary A. Bentley, 93 University St., Montreal, writes in a recent letter: "Some nine years ago I noticed small pimples breaking out on the back of my hands. They became very itchy and finally became so bad that I could not sleep at night. I consulted a physician who treated me a long time, but it got worse, and I could not put my hands in water. I was treated at the hospital, and it was just the same. I was told that it was a very bad case of eczema. Well, I just kept on using everything that I could find for nearly eight years until I was advised to try Cuticura Ointment. I did so, and I found after a few applications the burning sensation which I could not sleep with, and did not have any itching whatever. I began after a while to use Cuticura Soap, and I stuck to the Cuticura treatment, and thought if I could use other remedies for over seven years, why not try Cuticura? I used the Cuticura Ointment and Soap for nearly two months, and my hands were cured. I have hands as clear as anyone. It is my wish that you publish this letter to let the world, and if anyone doubts it, let them write me. Cuticura Soap and Ointment are sold by druggists and dealers everywhere. For a liberal free sample of each, with 32-p. book, send 10¢ to: Cuticura, Dept. 53, Columbus Ave., Boston, U. S. A."

unfit news for the persons to whom it was sent. God knew whom he was choosing when he opened heaven on those clear-headed keepers of flocks. They discredited neither messenger nor message. When the song ceased and the bright host vanished, the shepherds did not sleep. They verified the vision as earnest, constant men. They said, "Let us now go... and see." It was a grand journey of faith from the sheepfold to the manger. The trial of their faith came after God's awakening angels had gone away. Visions are transient, angels go away, but Christ abides. The shepherds were genuine preachers of the truth concerning Christ. They spoke from experience which fitted them for service and inspired them with a true zeal. Their gone out toward men. Prompt, honest, manly faith was known in their open confession. No sooner had they found Christ than they made it known abroad that they had found him. The gospel is self-propagating. Wherever it makes a convert it makes a preacher. The shepherds caught the strain of the angels' song, and the spirit of it. Angels sang of redemption with a view to God's glory. They glorified God for his goodness to man, and the shepherds glorified him because peace had come to earth and good-will toward men. They had already had because the fulfilling of a great hope had come. The shepherds investigated, proclaimed and exemplified the great truth which was made known to them. They accepted it as welcome news from heaven, allowing it to claim precedence over every other claim. They carried the great joy of finding a Saviour with them as they continued to pursue their ordinary duties. "Mary kept all these things, and pondered them in her heart," for the current of her soul flowed far too deep to reveal its emotions. The "ornament of a meek and quiet spirit" subdued the mighty swellings of her soul.—T. R. A.

THE BEST CROPS

Experimental Union Meeting at Guelph. Farmers should grow fewer varieties of potatoes.

Guelph despatch: It is impossible to get a carload of potatoes in Ontario all of the same variety, but if the farmers of the Province would get together and raise three or four varieties, whichever is best suited to the land in their locality, they would raise more and better potatoes and would secure greater prices. So spoke Professor C. A. Zavitz, of the O. A. C., to the members of the Ontario Agricultural and Experimental Union, which commenced its thirty-third session this morning in Massey Hall, which was crowded with the members of the union and students of the college.

In the unavoidable absence of President W. J. Lennox, of Newton Robinson, Mr. F. W. Gobie, of Woodstock, occupied the chair. Prof. C. A. Zavitz, secretary, presented his report, showing the membership of the union for 1911 to have been 4,490, an increase of 221 over 1910. Prof. R. Harcourt gave a paper on "Results of the Co-operative Experiments with fertilizers on fruits, and vegetables." Prof. Zavitz then gave an address on "Some of the Most Important Conclusions From the Co-operative Experiments on wheat in Ontario in 1911." He first looked up the crop of Ontario, which last year was reported at 3,000,000 acres. The leading variety grown is the Banner, with the Siberian second, this letter having been brought out by the Ontario Agricultural Union, while attending to their duties in their locality. They carried the great joy of finding a Saviour with them as they continued to pursue their ordinary duties. "Mary kept all these things, and pondered them in her heart," for the current of her soul flowed far too deep to reveal its emotions. The "ornament of a meek and quiet spirit" subdued the mighty swellings of her soul.—T. R. A.

Practical Survey. I. Announced by angels to low men. II. Welcomed and proclaimed among men. The redemption of fallen, guilty, helpless man was the grand design of the Saviour's birth. Jesus Christ is God excellency of God are manifest in his love and mercy in Christ. The miracle of the incarnation transcends every other miracle that has been or will be wrought. When Jesus was born in Bethlehem, the glory of God was most fittingly celebrated; for then was the glory of his grace manifested, and then was the glory that should be rendered him by our humanity assured. A minute prophecy so many times imperiled in the course of centuries was at last minutely accomplished. The whole of the world's history led up to that night. It was remarkable that Christ's birth should take place in connection with a great political engagement. While men were moving from all quarters in response to the decree of Caesar Augustus, the angels of heaven were gathering around the world's greatest event. An ambassador was sent from heaven to earth, from God to man. Particular attention was paid to time, place and other circumstances to show their agreement with ancient prophecy. The music that broke through the night was not an anthem, announced the advent of Jesus, with a strain of highest rapture. It was a bright exhibition of the glory of God, the means of bringing peace upon earth, marvelous display of the good-will of God to man.

II. Welcomed and proclaimed among men of the spirit of Simon. They quickly understood the message borne to them. They responded as if it were the intimation of that for which they had been waiting. They were men obscure and lowly, but the first to whom the proclamation was made. The lowliest and highest of God's rational creatures were thus brought together. It was not

MAGIC BAKING POWDER advertisement. Never any failure or disappointment when used. Costs no more than the ordinary kinds. Made in Canada. Includes an illustration of a woman baking.

Swine Breeder

If you have a sow that is a good breeder, keep her as long as she produces strong pigs. Have the hog pen a good instance from the house. The odors from them are not always agreeable. To many pigs should not be allowed to sleep together in the same bed. They will crowd in so close together that it will cause them to get too hot and catch cold, and as a result they will not winter so well nor make such good hogs as they otherwise would. A good way to slaughter hogs is to shoot them in the brain with a revolver or small rifle. They can then be stuck and bled with no fright or injury. The most desirable litters are generally obtained by breeding large, old sows to aged boars. Never feed potatoes to hogs unless they are cooked. Most of the nutriment in them consists of starch, and this exists in the form of granules in cells, containing water. Fed raw, these cells are only partly broken up, and a large percentage of the nutriment is therefore lost by not being digested. But if potatoes are well cooked the cells are broken up and the starch rendered as digestible as possible. It is possible, however, starch not being a well-balanced food, to boil the potatoes with corn or the like and then add some skimmed or separator milk. Study to get all the value you can out of the feed given your pigs. See that none is wasted and the proper combination made for the greatest gain. See that the hogs have a good warm place in which to sleep. Many pigs destined to make large porkers, fail to do so because of the cold they are subjected to in winter. Rots of various kinds with apples and meal make an economical food for swine. Pumpkins may be added, or pumpkins, apples and meal may be used. Provide no roots are at hand, boiled pumpkins and meal make an excellent combination, much appreciated by swine. When a hog has indigestion, change its diet to lighter feed at once, and if possible put it on grass. A slop of middlings, milk, bran, a very little corn meal and flaxseed meal is generally good to give, to which lime water is added at each meal. When the animal is doing well again the lime water by degrees may be discarded. Another important thing is to see that the slop barrel and feed trough are kept scrupulously clean. Avoid raising full litters of pigs unless you are able to provide good shelter and some kind of succulent feed that is suitable.

distributed, which had taken all the prizes in the standing crop competition at Toronto and Guelph Winter Fair. In plots at the Ontario Agricultural College the new oats gave sixteen bushels per acre more than the Banner, while the percentage of hull was two per cent. less than the Siberian strain from which it was produced. In other grains the following have been found by experiments to be the best: Wild Goose spring wheat, O. A. C. 61 spring eye, buckwheat, Early Yellow Soya or Soja beans, which are equal to cottonseed meal when ground up with grain, Early Britain and New Canadian Beauty peas, and for mixed grains one bushel of Mansuevia barley and Durban oats by weight, per acre. The best table corn is the Golden Banner, which is small, but sweet and juicy. Of the 400 varieties of potatoes tested, and of the forty-three leading varieties reported to have been grown in Ontario last year by the experimenters the best late potatoes are the Rural New Yorker No. 2, the Empire State and new variety of Scotch descent, "Davies Warrior," which gives twenty bushels to the acre more than the others. The Extra Early Eureka is the best early potato. It was while dealing with this that Prof. Zavitz made the appeal for fewer varieties for commercial use. The closing papers were given by a number of speakers on the "Source of Good Seed" for Ontario Farmers for the Spring of 1912. This afternoon practical work in stock judging, with discussion, was taken up in the live stock pavilion, under the direction of Prof. G. E. Day. This evening's session was held in the gymnasium, when Deputy Minister Mr. C. C. James spoke on "Improved Methods in Europe," and Prof. G. F. Warren, of Cornell University, Ithica, on "Some Important Factors in Farm Management."
