TWO MAY DIE FROM WRECK INJURIES

Passenger Train Derailed After Crashing Into Handcar.

[Canadian Press.]

Columbus, O., Oct. 10.—Big Four passenger train No. 41, westbound, was partially derailed and two trainmen were probably fatally injured as a result of a collision with a handcar at Eleventh avenue today. All of the passengers were badly shaken up, and several sustained bruises, but none were severely injured.

A steel horse car attached to the train is credited with having saved passenger coaches from leaving the rails. Six horses, the property of William Walker, of Toronto, en route to the Lattin, Ky., fall race meeting, were knocked down, but it is not believed any were permanently injured.

BOMB EXPLODED.

[Canadian Press.]
Milan, Italy, Oct. 10.—A bomb was exploded today in the vicinity of the royal palace and the archbishop's residence. No damage was done to the buildings, both of which were unoccupied at the time of the explosion.

SCHOOL FIELD DAY

St. Marys Students Enjoyed Fine Program of Sports.

[Special To The Advertiser.]

St. Marys, Oct. 10.—The public and separate schools held their field day jointly yesterday afternoon. About six hundred pupils assembled at the Central school and with their teachers formed a procession headed by the St. Marys Cement Company Kiltie Band, marched around by the water tower and down Queen street to the athletic grounds, where a fine program of sports was participated in. The Kiltie Band rendered choice musical selections throughout the afternoon. Ideal weather prevailed.

Last evening the St. Marys Cement Company Kiltie Band gave an excellent open-air concert, which was highly appreciated.

TEACHERS' INSTITUTE.

Sarnia, Oct. 10.—The Teachers' Institute held a very interesting meeting at St. Andrew's Presbyterian Church Thursday night. Rev. J. J. Patterson gave a very entertaining lecture on "The Bonny Briar Bush." Teachers from all parts of West Lambton were present.

SIX PERFECT "FLAGS" OF FIFTY-NINE EXAMINED

More Interesting Facts Concerning the Sidewalk Investigation.

Some interesting facts concerning the sidewalk investigation into the new cement walks laid a year ago on Dundas and Richmond streets, were revealed at the meeting of the board of works on Thursday night. City Engineer W. N. Ashplant, in submitting a report on the investigation, showed that of the 59 "flags" they had torn up, only three had been found to be according to specifications. This left 56 square feet to be paid for by the city (\$14.25), while the remaining 1,325 square feet was replaced by the contractor, W. J. Anthistle, who will have to maintain it in proper condition for the city. The engineer's report on the contractor agrees to these conditions he will receive nothing on the final payment for the original work.

In explaining the six perfect flags, Chairman B. W. Bennett said that four of them were broken into near the corner of Wellington street, Dundas, to ascertain the condition of the north side. They had been in good condition, and in justice to the contractor should be paid for by the city. The engineer's report on the question was accepted and filed.

Front Street Breakwater.

A deputation of Front street property owners appeared before the committee, asking that something be done to repair the breakwater there. It is in a dangerous condition, and unless something is done to repair it, Front street will be endangered by the spring floods of next year. Engineer W. N. Ashplant was ordered to report on the question at the next session of the board.

Some Assistance Anyway.

Mayor Graham declared again that something was wrong with the expert in working out the system, when part at least of the surplus steam energy could not be used for heating the hospital. He estimated that at least 50 pounds' pressure could be secured for the heating purposes.

"There must be some hitch in the apparatus," was one of his statements. In spite of the fact that it was declared that the incinerator steam would be sufficient to allow the hospital boiler equipment to be discarded, the mayor explained that "with the present hospital equipment and the assistance of our incinerator enough steam should be generated to heat the hospital."

Trust to Pay the Shot.

The suggestion was made that the hospital trust pay the shot for the boilers recommended by Engineer Elliott. However, as the appropriation will have to come from the council in the first place the financing of the proposition makes little difference, as was pointed out in the meeting. Coal will be supplied by the trust at present to allow the coal fire tests to be made with the existing equipment, to see whether, with a steady, continuous fire, instead of the fluctuating garbage fuel, a steady head of steam can be maintained in the "leads" and laterals of the newly-installed hospital-incinerator heating system.

DIED SUDDENLY

Mrs. A. H. Robertson Underwent Operation in St. Joseph's Hospital. Mrs. Robertson, wife of Mr. A. H. Robertson, of 89 Ridout street south, died very unexpectedly last evening in St. Joseph's Hospital following an operation. The new name as a great shock to a wide circle of friends, as she had only been ill a couple of days. She was a daughter of Mr. J. C. Ross, of Tillsonburg, and besides her husband leaves one son, Ross, at home. The funeral will be held on Monday at Tillsonburg and will be private.

TRYING OUT AEROPLANES.

[Canadian Press.]
Paris, Oct. 10.—The Minister of Commerce is organizing experiments with aeroplanes intended to transport dispatches regularly between Paris and Pauillac, the port of Bordeaux, on the days of the departure and arrival of the South American liners.

\$7,000 IS NEEDED TO EQUIP BOILERS FOR INCINERATOR

Present Equipment Insufficient to Heat the Hospital Buildings.

ENGINEER SO REPORTS

Big Addition to \$10,000 Already Spent on Heating System Required.

Before the incinerator equipment will be adequate to heat Victoria Hospital \$7,000 for boilers will have to be expended, according to Engineer H. P. Elliott, the expert in charge of the installation of the garbage destructor machinery.

Adoption of his recommendation means an additional charge of \$17,000 over and above the cost of the incinerator proper, in the neighborhood of \$10,000 having already been expended in installing the heating system, that according to its designer, needs an expenditure of \$7,000 more before it is adequate. His report, calling for the expenditure, was presented to the board of works on Thursday night. Following a general discussion on the heating capabilities of the present equipment, the question was laid over until the next meeting of the board, when the engineer will be requested to attend this session and explain the situation as it now exists.

When the incinerator question was first broached, and the present site of the building selected, the object was to supply heat to Victoria Hospital from the surplus steam from the burning refuse. Now it has been discovered that one of the primary objects of the plant's construction cannot be maintained. "Drawing blanks" from the incinerator fires causes a variation in the steam pressure available, under existing conditions, and a steady pressure cannot be maintained.

The recommendation of Engineer Elliott was for the installation of three additional boilers—the third being added to allow for the cleaning of the other two, at an estimated cost of \$7,000. One, at an estimated cost of \$2,000, should be installed immediately, according to the engineer, even if action on the proposal of \$7,000 outlay was deferred for some time.

Surprises Committee.

The fact that the hospital could not be heated from the present equipment was rather a surprise to the board of works. Mayor C. M. R. Graham, who engineered the now famous incinerator contract, was more than surprised. He declared that something had slipped up in the engineer's findings and that a considerable portion of steam should and could be secured from the present plant for heating purposes. The steam expert was at fault somewhere, according to the mayor.

"We have followed his suggestions in everything and now it's up to him to figure out a scheme for providing the utilization of the steam," declared the mayor.

Payment Is Held Up.

Chairman B. W. Bennett, of the board of works, announced that as no coal fire tests had been made with the present plant, the board of works, in the incinerator—passed by the council at its last session—was being held up. Preparations were in progress for this coal fire test.

In explaining the situation the chairman stated that in company with Chairman Col. Gartsshore, of the hospital trust, he had been present when the steam tests of the heating system were made. While the pressure was good at first it had dropped 100 pounds in less than two hours. He then suggested having a permanent fire under the boilers to see if that would maintain the requisite head of steam. The engineers had stated that there were not the proper draughts to allow this. He expressed the conviction, however, that there were.

Some Assistance Anyway.

Mayor Graham declared again that something was wrong with the expert in working out the system, when part at least of the surplus steam energy could not be used for heating the hospital. He estimated that at least 50 pounds' pressure could be secured for the heating purposes.

Trust to Pay the Shot.

The suggestion was made that the hospital trust pay the shot for the boilers recommended by Engineer Elliott. However, as the appropriation will have to come from the council in the first place the financing of the proposition makes little difference, as was pointed out in the meeting. Coal will be supplied by the trust at present to allow the coal fire tests to be made with the existing equipment, to see whether, with a steady, continuous fire, instead of the fluctuating garbage fuel, a steady head of steam can be maintained in the "leads" and laterals of the newly-installed hospital-incinerator heating system.

Ross, of Tillsonburg, and besides her husband leaves one son, Ross, at home. The funeral will be held on Monday at Tillsonburg and will be private.

MONTREAL HERALD SUES FOR \$100,000 DAMAGES

Alleges Conspiracy on Part of Star to Try and Ruin Its Business

Montreal, Oct. 9.—A suit for one hundred thousand dollars damages, on account of an alleged conspiracy to destroy the Montreal Herald and to ruin its business, was entered in the superior court today by the Herald Company, Limited. The defendants are the Montreal Star Publishing Company, Limited, the Montreal Standard Publishing Company, Limited, the International News Service (a New Jersey corporation controlled by William Randolph Hearst), Sir Hugh Graham, owner of the Star and Standard, and Charles F. Crandall, managing editor of the Star.

Particulars of the allegations upon which the suit is based are given in full in the plaintiff's declaration, alleging a protracted and widespread conspiracy on the part of the defendants and other persons unknown, to prevent the Montreal Herald from having access to certain sources of supply from which daily newspapers secure their circulation-building features.

It is also alleged that the Canadian defendants formed a so-called syndicate and induced the New Jersey defendant to break its contract with the Toronto World and transfer its services to their syndicate. The Toronto World was thereby prevented from delivering to the Herald features and services which it had contracted to deliver. The Toronto World yesterday secured an interim injunction restraining the New Jersey corporation from delivering its services to the Star syndicate until further hearing.

Part of Township Surrounded by City

Odd Situation That Municipal Board Is Asked to Settle.

According to the old-fashioned geographers "an island is a portion of land surrounded by water." The old-fashioned geographers and the newer ones, however, have no definition for a portion of a township that is entirely surrounded by city. The answer to that interesting little problem is affording the city officials some anxiety these days.

When the latest annexation order was passed by the Ontario railway and municipal board, joining that portion of London Township, in the vicinity of the Dominion Abattoir Company plant, to the city of London, a number of parcels of property were named. The parcels and the definition of their boundaries was all right, but when an investigation was started it was found that a portion in the very centre of this territory had been omitted. This interesting fact means that there is a portion of London Township, as yet unannexed to the city of London, that touches no other section of the said township, it being bounded on all sides by the city of London. The parcel in question, last week, has necessitated the application to the municipal board of an amendment in the last order, handed down by that body.

Paid \$4,000 Cattle Duty

Montana Sheep Man Sent Twenty-Three Carloads to Winnipeg.

Neches, N. D., Oct. 10.—Twenty-three carloads of Montana sheep entered Canada at Grétna yesterday, the owner paying \$4,000 duty. They are billed to Winnipeg.

CATTLE ARRE SCARCE.

[Canadian Press.]
Regina, Oct. 10.—Increased difficulty in obtaining stock cattle from Eastern Canada will be experienced by the stock men of the west as the outcome of the abolition of the United States tariff on imported cattle under the new law. In the opinion of J. C. Smith, live stock commissioner of Saskatchewan, placing cattle, sheep and swine on the free list will have a marked effect on the stock industry in the prairie provinces, within the next few months, while to cattlemen the change will be of especial importance.

CANON GOULD WILL VISIT CHINA SOON

General Field Secretary for Anglicans to Study Conditions.

[Canadian Press.]
Saskatoon, Oct. 10.—The principal subject of discussion yesterday at the missionary conference of the Church of England in Canada, held at St. John's Hall, was the relationship between home and foreign missions.

Canon Gould, of Toronto, and Canon Matheson of Winnipeg, gave forceful addresses on the subject, enlarging on the vision which less experienced men might have had on the subject. A letter from Right Rev. Bishop White, of Homan, China, was read, asking that a deputation from the church in Canada visit China early next year to study conditions. It was decided that Canon Gould, the general field secretary, should go.

The whole of the evening session was devoted to a discussion of the Jewish question in Hamilton, Toronto, Montreal and Ottawa. No definite line of action was decided upon. The sessions are all held behind closed doors. Archdeacon Dewdney furnishing the press with information which the conference desires to make public.

QUEEN TO DEDICATE NEW BATTLESHIP

Victoria of Spain and King Alfonso Will Review Fleet.

[Canadian Press.]

New York, Oct. 10.—A cable from Madrid to the Tribune says: President and Mme. Poincaré, accompanied by King Alfonso, Queen Victoria and the queen mother, the premiers of France and Spain, and a large suite, left today in a special train for Cartagena, where Queen Victoria will dedicate the new warship Espana. The king and President Poincaré will then review the Spanish fleet.

While the recent anti-French sentiment has subsided somewhat, a sensation was caused today by an article, signed by Senator Meila, a prominent politician, stating that France's strength in Europe is declining, and that an alliance with her would place Spain in the same position as Poland with regard to Russia. It is said that the Franco-Spanish treaty will be concluded at Cartagena. Gen. Lyautey left today for Morocco.

COMPULSORY EDUCATION NEEDED IN MANITOBA

The Hon. Herbert Samuel Found Lamentable Condition on Western Trip.

[Canadian Press.]
Montreal, Oct. 10.—The lack of compulsory education in Manitoba, which placed it a generation behind the rest of the civilized world, was deplored in a speech delivered last night by Right Hon. Herbert L. Samuel, British postmaster-general, at a banquet tendered him at the Montefiore Club.

After praising the west for the evidences displayed of material progress Mr. Samuel said that the lack of compulsory education system in Manitoba was a defect which might be made the subject of serious criticism.

He did not reprove to enter deeply into a question which constituted one of the controversial aspects of Canadian politics, but he would at least say this, that the result of the system in Manitoba was lamentable. He had found that among foreign children on the outskirts of Winnipeg there were many who had left school with the most meagre of educations, and many others who had not been to school at all.

"I cannot," he said, "refrain from expressing pain that, in one of the largest and most progressive provinces of the Dominion, I should find a state of things existing almost a generation behind the rest of the civilized world today."

MAY FORM JOINT STOCK COMPANY AT GUELPH

Guelph, Oct. 9.—The joint stock company controlling the Guelph Canadian League baseball team is one step nearer realization. Alex. MacAllister, Arthur Watson and Edward Stewart have been appointed a committee to work up the enthusiasm, and the subscription list. President Mahoney says he will let go the Guelph baseball franchise, team and everything else, for \$3,000 on the condition that a joint stock company be formed, and he will assume the obligations of the club. Bonds totalling up to \$3,000 will be placed on the open market. If the fans stand behind the movement as firmly as they should, and the committee meets with sufficient response, Guelph will have a team next year.

Bob Proctor won two races with Bismaya (2:09½), a daughter of Bingara and a Kremlin mare.

John L. Dodge expects to name Silk Hat in all of the 1914 early closing events to which he is eligible.

Director L. Braden Direct, Frank Bokash, Jun., and some others meet in the Tennessee Wednesday. Urban finishes with the Lexington meeting. The great gelding never again will be shown a mile at speed. A. B. Cox's Zombro Belle (2:13) has won all of the 3-year-old races in the Pennsylvania circuit.

FOR THE TOILET

We have about all the toilet aids or requisites that you can ask for. The perfumes, creams, lotions, powders and beautifiers that have real worth will always be found here. We have several of our own make that we sell under a guarantee, and which we know to be as harmless as they are effective.
