Groceries.

The soft weather is hard on groceries as on many other branches of trade. Canned goods are higher and stocks getting lighter with a good deal of demand. One of the sugar refineries is holding strong on yellows, as they cannot meet the market at prices they expect to buy at. Valencia raisins are firmer, with stocks light.

as a prices they expect to my at.

are firmer, with stocks light.

Leather.

Nothing is doing here. In the English markets business is looking up and should the improvement continue, surplus stocks can be put out there without trouble. There is no change in prices with payments poor.

Provisions.

Provisions.

Provisions are the same as last week with nothing doing. Business is said to be almost at a standstill. Quotations are: Bacon, i.e., 7%c to 7%c. tard.—American, 8%c to 8%c; Canadian 8%c to 8%c. Smoked meats—Hams, 11c to 111%c; bullies, 11c to 111%c; rolls, 8%c to be; backs, 10%c to 11%c. But iter. Orsamery, 2%c to 8%c. large rolls, 14c to 16c; dairy tubs, 16c to 18c; store packed tubs, 10c to 14c. Cheese, 10%c to 11%c. The Hides, Skins and Wool.

dairy trus, foliate to flc.

Hides, Skins and Wool.

Trade is unchanged with appearances of improvement. Hides are firmer and in improved demand. Car lots sell at 4%c, but more than this is now looked for. Very few sheepskins are offering at from \$1.10 to \$1.40 for lest, fresh, long wood skins. Tallow is unchanged, dealers buying at 5c and selling at 5%c. Some sales have been made in wool recently but the mill men hesimen hesitate at paying the advanced prices now asked. As the supply is light prices will be maintained.

Live Stock.

asked. As the supply is light press.

Live Stock.

The market to-day was weak with 17 or 18 loads received. Hogs were better. Outside demand was good, 6 or 7 loads being transported to Montreal. Though the demand was not brisk, the market was about cleared. Prices for cattle were only fair ranging from \$31 to \$27 each. Less than 100 sheep and lambs received. Values on both were off 50t to 50c a head, according to quality. Prices averaged \$5.40 each. Prime calves are in demand at from \$8 to \$10. Prices are firmer in hogs. Light fat and stores will bring \$4.40 to \$4.50 per cwt., heavy hogs \$4 per cwt.

Prices are weak. At Grand's over 100 were sold this week at 25 per cent. cheaper than a year ago. Bad crops in the Northwest seem to be the cause. The stock disposed of included worker, draught, drivers, general purpose, etc.

Fragrant and delicious is the universally expressed opinion of Dyer's Arnicated Tooth Paste in tubes. Druggists keep it. W. A. Dyer & Co., Montreal.

Ald. Hill has just recovered from a severe attack of la grippe.

This is the last day for the payment of the quarterly water rates.

The sub-committee an rank site. This is the last day for the payment of the quarterly water rates.

The sub-committee on park sites, which was to have met yesterday, was cancelled.

Judge McDougall has fixed Feb. 11 as the date of hearing appeals re the Dundas-street bridges.

The City Council meets on Monday at 7½ p.m., and the Property Committee on Tuesday at 3 p.m.

The Mayor was not so well yesterday, the number of visitors on the previous day having fatigued him.

The sub-committee of the waterworks re St. Alban's Ward Pumping Station is called for Monday at 2 p.m.

Engineer Jennings was in the Hall yesterday but the only thing he would talk about was the glorious weather.

Dr. Ogden, public school trustee for St. Patricks Ward took his declaration yester. number of visitors on the previous day having fatigued him.

The sub-committee of the waterworks re St. Alban's Ward Pumping Station is called for Monday at 2 p.m.

Engineer Jennings was in the Hall yesterday but the only thing he would talk about was the glorious weather.

Dr. Ogden, public school trustee for St. Patrick's Ward, took his declaration yesterday, thus completing the full list.

It is probable that legislation will be asked repealing the right of the Court of Revision to grant rebates on vacant houses.

The work of laying the 20-inch water main

"Can't you give a poor beggar a copper?"

to grant repates on vacant nouses.

The work of laying the 20-inch water main along McPherson-avenue to the high level pumping station commences Monday.

The City Cleft, will have the voters' lists for 1890 completed to-day. This means the dismissal of a small army of temporary clerks.

GENTLEMEN: Owing to Parliament meeting somewhat earlier than usual this year, and also to my state of health, I regret to say that it is not possible for me to be with you at the ninth annual meeting of the North American Life Assurance Company. This is especially ninth annual meeting of the North American Life Assurance Company. This is especially sinth annual meeting to me, as I always look forward with a great deal of pleasure to our annual gatherings, more especially so in noting the continued progress of the Company from year to year. This past year of 1889 has been no exception to the rule as to our progress, except that it has been the most successful in the history of the Company. The height of see waves has long been the subject of controversy. Eminent hydrographers have insisted that storm waves were usually not more than ten feet high, and rarely over twenty when the conditions of the sea were most favorable for wave development. Many a travellar reclining on a cabin

The height of sea we've has long been the is subject of controvery. Eminent hydrographers have insisted that storm waves were may have insisted that storm waves were may be a subject of controvery. Eminent hydrographers have insisted that storm waves were most favorable for wave development. Many a traveller, reclaining on a chiral light to see the waves not achieve in the control of the sea were most favorable for wave development. Many a traveller, reclaining on a chiral light to see the waves rearing their frothy footer; could show so high above a great slips dock. Many a sailor dowed by an up-driving when told that the highest waves were not above 20 feet, the rest being "heel" of ship and dip of yard. Now, however, ones expert testimony to prove that storm waves are often 40 feet and sometimes from the many of the company, are made on the Every care has been taken to see that their past year and that of 1885, the dash claims section the expendition some instructive data were gathered by a sensitive anerold barometer capable of recording its extreme rise and fall by an automatic register. "With a sea not subjected to an atmosphere of unusual violence, it indicated an elevation of 40 feet from the wave's base to creat." Admiral Fitzory, after a long series of careful measurements from the main top of his ship, came to a similar conclusion.

An Alarm Estitle fer Peiseas.

A Chicago man has invented a bottle stope on the wave's base to creat whill be a subjected to an atmosphere of unusual violence, it indicated an elevation of 40 feet from the wave's base to creat. "Admiral Fitzory, after a long series of careful measurements from the main top of his ship, came to a similar conclusion.

An Alarm Estitle fer Peiseas.

A Chicago man has invented a bottle stope of the company, it cannot control that the subject of the company in the front rails.

A Chicago man has invented a bottle is one of the company, it cannot control that the history of the company in the front has been establed to the company in the front

An Alarm Settle for Poisons.

A Chicago man has invented a bottle stopper to be used exclusively for poisons. The superiority over the old-fashioned article lies in the construction of the stopper. The protection which enters the neck of the bottle is ground glass with a small hole in one side, through which protrudes a little rod or trigger. The top of the stopper is covered with a small bell enclosing cog wheels, which are so arranged that when the stopper is removed arranged that when the stopper is removed arranged that when the stopper is removed in the bottle it again sounds an alarm. The mechanism is so arranged that it is absolutely impossible to remove or replace the stopper without first ringing the bell, thus making it impossible for a druggist, if he is careful in the filling of his bottles, to deal out poison in the filli

before you and upon the position the Company has attained as evidenced by these statements.

The exhibit as a whole I may safely affirm is an exceedingly cheering and encouraging one. Steady progress and advancement, not by leaps and bounds but gradual and sure, is one. Steady progress and advancement, not by leaps and bounds but gradual and sure, is one. Steady progress and advancement, not by leaps and bounds but gradual and sure, is one. Steady progress and advancement, not by leaps and bounds but gradual and sure, is one. Steady progress and advancement, is a sure of the year's business, which very considerably exceeds what was ever attained by any Canadian Life Insurance Company at the same period of its history. When in addition to this the Guarantee Fund of \$300,000 is taken into account, its history. When in addition to this the Guarantee Fund of \$300,000 is taken into account, the security offered to policy-holders by this Company can truly be said to be "unsurpassed on this continent."

The importance of hoarding up the premium receipts and converting these into undoubtred interest bearing securities so as to provide the means of arefully invested in undoubted interest bearing securities so as to provide the means of a paying death claims as they come in—which they surely will do; any departure from this sound principle must result in disaster to the Company and in ultimate disappointment to the policy-holders.

And here let me remark that nothing could be more satisfactory than the zeal and additive displayed by our Medical Director, Dr. Thorburn, who is most unwearied and painsability displayed by our Medical Director, Dr. Thorburn, who is most unwearied and painsability displayed by our Medical Director, Dr. Thorburn, who is most unwearied and painsability displayed by our Medical Director, Dr. Thorburn, who is most unwearied and painsability displayed by our Medical Director, Dr. Thorburn, who is most unwearied and painsability displayed by our Medical Director, Dr. Thorburn, who is most unwearied

work.

The business in force as at Dec. 31st amounts to \$9,068,862,00 (being an increase on the previous year of \$1,141,298) and the new business for the year just closed amounts to \$2,598,-217.00 (being an increase on the year of \$121,717).

Taking into consideration the keen and at times reckless competition that has prevailed, and the scarcity of money during the last three months of 1889, the results may well be considered gratifying.

while it is the policy of the Company's management to do an active and increasing business, it is ever steadily kept in view that it is just as possible to pay too much to business, it is ever steadily kept in view that it is just as possible to pay too much to secure life insurance as to pay too much for any other commodity. To go on paying too much for business can only result in shipwreck and disaster, and hence the management adheres to the rule of paying as much as is consistent with fairness, reason and safety but we more
