-	(18)	
•	The life Riches lies off the East-end of the life of Bois, it is about a Mile in Circuit, and pretty high; on the East-fide of it are fome finall Islands, and fome funken Rocks quite a-cross from the Island to the Main, fo that in fail- ing up the Bay of Defpair, you must leave this Island on your Starboard-fide.	
Little River.	This is an Arm of the Bay laying in to the Eaftward from the Isle of Riches, it is very narrow, and counted a good Place for a Salmon Fishery; its Banks are stored with various Sorts of Wood.	-
Bay Rotte.	This is a fmall Bay which lays North from the East-end of the lste of Bois, in which are some sunken Rocks near the Head.	
Bay of Conne	From the Isle of <i>Riches</i> the Bay extends itself to the Northward about five Miles, commonly called the Bay or River of <i>Conne</i> , then branches into two Arms, one still tending to the North, and the other to the Eastward; the Water is very shallow for some Distance from the Head of both. About these Arms, and the Bay of <i>Conne</i> , are great Plenty of all Sorts of Wood, common to this Country, such as Firr, Pine, Birch, Witch-Halle, Spruce, Se.	
Observations	All the Country about the Entrance into the Bay of <i>Defpair</i> , and for a good Way up it is very mountainous and barren, but about the Head of the Bay is appears to be pretty level, and well cloathed with Wood.	1
On the Tides	Between St. Laurence and Point May, an ESE. Moon makes high Water at the Islands of St. Peters and Miquelen, and in all Parts of Fortune Bay a S.E. Moon makes High Water. In the Bay of Defpair a SE. by S. Moon makes High Water; in all which Places it flows up and down, or upon a perpendi- cular Spring Tides 7 or 8 Feet; but it must be observed that they are every where greatly governed by the Winds aud Weather.	
Currente,	The Currents on the Sez Coasts from Cape Chapeaurouge towards St. Peter's, fets generally to the SW. On the South-fide of Fortune Bay it sets to the Eastward, and on the North-fide to the Westward.	
Winds.	The South Weft, and Wefterly. Winds generally blow in the Day during the Summer, and about the Evening they die away; and in the Night you have
