Mr. Gladstone is writing a series of articles on the Bible for the Sunday School Times. The first article appears in the number for March 29th, and the others are to follow at intervals of one month. Mr. Gladstone's attitude towards the Bible may be judged from the title of the first article, viz., "The Impregnable Rock of Holy Scripture." We take this opportunity of again commending the Sunday School Times to our readers. The regular price has been reduced to \$1.50, and the clubbing rates are such that it can be had as low as 50 cents. Those who have not seen this fine paper should send for a sample copy to John D. Wattles, 1031 Walnut Street, Philadelphia.

"OUGHT THE CONFESSION OF FAITH TO BE REVISED ?" Anson D. F. Randolph & Co., 38 West Twenty-third Street, New York, publisher; 181 pages, paper cover, price 25 cents. We heartily commend it to all who wish to know what Calcinism really is and how it is defended in our day.

We felt better after reading it, and now as we come to think of it we think we were better for having read it. It contained lessons of reproof, mild and gentle, some mingled with thoughts and words of dear departed friends. We were softer and purer hearted when we finished it than we were when we began it. Readers, if you have not read it of late and been induced by it, we advise you to write for a copy to the Boston office, directing to 'Our Dumb Animals." - Burlington (Vt.) Independent.

A GREAT POPULAR CYCLOPEDIA. -Tho last volume issued of "Alden's Manifold Cyclopedia" is fully up to the high standard of the preceding volumes, and readers will be pleased to learn of the rapid progress the work is now making; strong financial allies have recently been accured in the publishing department, two large printing offices are now at work upon it, and the publication is to be hastened to completion with all the speed that abundant resource and energy can give it. People have wondered how a work of such superior merit and magnitude, and so handsomely and thoroughly well got up -a rival of the Britannica, Johnson, Ap-

PRACTICAL PHILANTHROPY. - To do good to the utmost limits of our capability is the first duty, as it is the highest privilege of the Christian, and in no way can more real benefits be conferred upon mankind than in making known far and wide that deadly malady consumption. Where one victim to this direful disease? It choores the fairest, the brightest, the best, and when a fond parent sees pale consumption stealing into his loved daughter's bosom, flushing her cheek, bleaching her skin, and revelling like a living worm upon her vitals, who would not hail as a deliverer sent from heaven one bearing in his hand a remedy, which would save his darling from a yawning grave. The mother anxiously watching the boy of her love who at the threshold of manhood is seized by the destroyer and dragged with ruthless and unfinishing hand down to the tomb, would bless with all a mother's heart the power which could save him. Such a power exists, and a benevolent man, himself a brand plucked from the consumptive fire, holds out the hand of holp, and without asking for remuneration, is ready to communicate the means by which he was cured. All he wants is to behold who suffers. You can send a letter to T. A. Slocum, 186 West Adelaide St., Toronto, and by return you will receive free two bottles of remedy, which is a positivo cure.-Elmira Telegram.

No other article of human food has ever received such high, emphatic, and universal endorsement from eminent chemists, physicians, scientists and Boards of Mastit all over the world.

Note.—The above Diagnam illustrates the comparative worth of various Baking Powders, as shown by Chemical Analysis and experiments made by Prof. Schedler. A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schedler only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that, while it costs a few cents per pound more than ordinary kinds, it is far more economical, besides affording the advantage of better work. A single trial of the Royal Baking Powder will convince any fair minded nerson of these facts. fair minded person of these facts.

"While the diagram shows some of the alum powders to be of a comparatively high degree of strength, it is not to be taken as indicating that they have any value. All: lum powders, no matter how high their strength, are to be avoided as dangerous
