

NEW WATERLOO

All Cast Self-Feeding Furnace.

HILBORN

Hot Air Wood Burning Furnace.

CLARE BROS. & CO.
PRESTON.

Warranted the most efficient and Purest of the cost of operation of Coal and Wood of All Furnaces and Registers in the world.

is in advance of all others. The most economical, durable and powerful gas tight furnace made. Can be operated as self-feeding or fed through the front door. Is fitted with a New Dock-Ash Gear Grate, the best grate known—a simple turning of the lever instantly clearing the fire surface of all ashes and clinkers. Has large Ash-Pan, Sectional Fire Pot, a deep sand joint at the hottest part, allowing for expansion, renders the most durable pot made. The Radiator presents five times as much surface to the action of the fire as ordinary furnaces, and can be more easily cleaned. This Furnace fitted up in the best manner, with bronze hinge pins and knobs, dust door, etc., and undoubtedly the most economical furnace made.

This Furnace, made in six sizes, is unequalled for efficiency, economy, ease of management, durability. Is corrugated and made very heavy. The openings of heavy sheet steel (with cast iron ends and collar connections), well riveted together so as to prevent the leakage of gas and smoke from unequal expansion and contraction. It has been largely in use for several years, and has never failed to give the most perfect satisfaction to purchasers, thus differing and entirely superseding all other wood-burning Furnaces heretofore made. Farmers who have a surplus of wood to fit for the market will find their best relief from the vexation and annoyances of pulling down and setting up ordinary heating stoves and pipes, wood boxes, etc. We furnish the four finger sizes with other round doors, as shown on cut, or with extra large square doors.
