Wampole's Compound
Syrup of Hypophosphites.

CHARACTERISTICS. Heavy, pleasant, bitter taste, and deposits a flocculent precipitate when left standing for some little time. This precipitate, aside from its being the most assimilable form of one of the important ingredients, will serve to render our preparation distinct from the many now offered for sale under the name of Syrup of Hypophosphites.

Each fluid drachm contains $\frac{1}{8}$ grain STRYCHNIA, associated with the Hypophosphites of Lime, Soda, Potassium, Iron, Manganese and Quinine.

This combination, so long and favorably known to Physicians and Pharmacists as one without equal in the treatment of Phthisis (Consumption) Bronchitis, Anemia and General Debility, as manufactured by us, and offered at our present list price, will be found to overcome an existing difficulty, as heretofore it has been impossible to procure it in quantities of more than one pint, and, the price of the preparation being very high, has placed it beyond the reach of many who really require a medicine of this kind.

Put up in 16 ounce bottles, full measure.

\$8.50 Per Dozen, Net.

Put up in 5 pint bottles for convenience in dispensing, and as a regular stock bottle

5-Pint Bottles, each \$3.17, Net.
