

**MISSION FIELD.****SYMPATHY WITH THE MISSIONARIES.**

Let us not think of Foreign Missions as an abstraction, but as reality in which earnest, consecrated souls that have gone forth from us, sent by us, are contending with false systems and false worship, earnest souls striving and pleading, praying and planning and working in the name of Christ to make the people who sit in darkness see the great Light which hath shined from Heaven. God forgive us that we have permitted it to become an unreality to us, and have become so far separated from them! Our souls should be linked to theirs in loving concord, and our prayers blend with theirs in fervent entreaty that God would give success to their work. If we desire fruits of Foreign Missions and would see signs of success we must be helpers by every means in our power. If there has been lack hitherto, is not the fault in us who have been so faithless? The half-heartedness and selfish forgetfulness and stony coldness of Christians at home are a sufficient cause to account for want of great success.

The task of Foreign Missions is a difficult one indeed; but it is a task which God has set before His Church; and it will be less difficult when love is warm and faith is strong and the disciples at home hold up the hands of the workers and plead with the Lord of Heaven and earth to sustain and strengthen them and prepare the way before them. It is not a question of money so much as of love and faith and courage. We want a kindling from on high, a true revival of faith, and those whom we have sent ask, and they have a right to ask, our interest, our sympathy, our prayers for the work which they are doing, and long to do better and better. Let us go on praying daily "Thy Kingdom come," but let not our prayer be vain words; let us put meaning into the words, put heart into them, put the whole soul into them and think of those who are trying to make them real and to bring that blessed Kingdom nigh unto those who know not the joyful sound of the Gospel. The time is short. The movements of Divine Providence are rapid. Life is intensely earnest. Now is the season of glorious opportunity.

The native Christians of Tinnevely, in Southern India, have sent a gift of \$400 to the Church Missionary Society of England, as an expression of their sympathy with the persecuted Christians in Uganda, Africa.

**NEED OF WORKERS.**

Bishop Williams, of Japan, is in want of a lady, not over thirty years of age, in sound health, who is a trained teacher; another of about the same age and with qualification to teach Bible-women. The Bishop also wants two young, unmarried clergymen. All these are desired now, and we have no applications before us.—*Mission Field,*

**"ONLY AFTER DEATH."****WHAT WONDERS THE MICROSCOPE HAS DONE FOR US.**

NO LONGER OBLIGED TO DIE, TO FIND OUT "WHAT'S KILLING US."

One of the leading scientific publications states that many people are now using the microscope to discover the real cause of diseases in the system, and to detect adulterations of food and medicines.

This wonderful instrument has saved many a life. A microscopical test shows, for instance, the presence of albumen, or the life of the blood, in certain derangements of the kidneys, but medicine does not tell us how far advanced the derangement is, or whether it shall prove fatal.

The microscope, however, gives us this knowledge:

Bright's disease, which so many people dread, was not fully known until the microscope revealed its characteristics. It greatly aids the physician, skilled in its use, in determining how far disease has advanced, and gives a fuller idea of the true structure of the kidney.

A noted German scholar recently discovered that by the aid of the microscope, the physician can tell if there is a tumor forming in the system, and if certain appearances are seen in the fluids passed it is proof positive that the tumor is to be a malignant one.

If any derangement of the kidneys is detected by the microscope, the physician looks for the development of almost any disease the system is heir to, and any indication of Bright's disease, which has no symptoms of its own and cannot be fully recognized except by the microscope, he looks upon with alarm.

This disease has existed for more than 2,000 years. It is only until recently that the microscope has revealed to us its universal prevalence and fatal character. Persons who formerly died of what was called general debility, nervous breakdown, dropsy, paralysis, heart disease, rheumatism, apoplexy, etc., are known to have really died of kidney disease, because, had there been no disorder of the kidneys, the chances are that the effects from which they died would never have existed.

As the world becomes better acquainted with the importance of the kidneys in the human economy by the aid of the microscope, there is a greater alarm spread through the communities concerning it, and this accounts for the erroneous belief that it is on the increase.

As yet neither homeopathist nor allopathist is prepared with a cure for deranged kidneys, but the world has long since recognized, and many medical gentlemen also, recognize and prescribe Warner's safe cure for these derangements, and admit that it is the only specific for the common and advanced forms of kidney disorders.

Formerly the true cause of death was discovered only after death.

To-day the microscope shows us, in the water we pass, the dangerous condition of any organ in the body, thus enabling us to treat it promptly and escape premature death.

As the microscope in the hands of laymen has revealed many diseases that the medical men were not aware of, so that preparation, like many other discoveries in medicine and science, was found out by laymen, outside the medical code; consequently it comes very hard for medical men to endorse and prescribe it. Nevertheless, Warner's safe cure continues to grow in popularity and the evidences of its effectiveness are seen on every hand.

Some persons claim that the proprietors should give the medical profession the formula of this remedy, if it is such a "Godsend to humanity," and let the physicians and public judge whether or not it be so recognized.

We, however, do not blame them for not publishing the formula, even to get the recognition of the medical profession. The standing of the men who manufacture this great remedy is equal to that of the majority of physicians, and the reason that some doctors give for not adopting and prescribing it—viz: that they do not know what its ingredients are—is absurd.

Mr. Warner's statement—that many of the ingredients are expensive, and that the desire of the unscrupulous dealer or prescriber to realize a large profit from its manufacture by using cheap or injurious substances for those ingredients would jeopardize its quality and reputation; and that Warner's safe cure cannot be made in small quantities on account of the expensive apparatus necessary in compounding these ingredients—seems to us to be a reasonable and sufficient one.

The universal testimony of our friends and neighbours, and the indisputable evidence that it, and it alone, has complete mastery over all diseases of the kidneys, is sufficient explanation of its extraordinary reputation, and conclusive proof that it is, perhaps, the most beneficent discovery known to scientific medicine since the microscope revealed to us the all-important nature of the organs it is designed to reach and benefit.

**Dominion Line.****ROYAL MAIL STEAMSHIPS.  
LIVERPOOL SERVICE.****Sailing Dates:**

	From Portland.	From Halifax.

**Foods! Foods!****DESICCATED WHEAT.****HULLED AND ROLLED.**

This article is the perfection of human food designed for all seasons of the year. It is absolutely pure and partly digested as the starch is converted into dextrine. It is sure to cure dyspepsia and regulate other affections of the digestive organs. It contains all the elements necessary to supply the wastes of the body. It is cooked and densed so that one pound is equal to two of ordinary cracked, granulated, rolled or crushed wheat in their raw state.

**DESICCATED BARLEY.****HULLED AND ROLLED.**

This article when mixed with Desiccated Wheat is the best food in the world for active men, as the brain is fully supplied with phosphorus in the barley and nitrogen in the wheat. This admixture of barley phosphates with petonized wheat is a glorious food to a large class of people who work their brains constantly and have little out door exercise.
