

Three 20-knot container ships, each of 16,700-deadweight tons (dwt), built at a total of \$20 million, entered service in 1970 and 1971. All three 779-container vessels — *CP Trader*, *CP Voyageur* and *CP Discoverer* — are so designed that they can be “stretched” by an extra mid-section that increases their capacity to 1,150 containers each.

Canadian Pacific (Bermuda) Limited, formed in 1964, owns and operates a diversified fleet of tankers and bulk carriers for international trade. CP Bermuda has 29 vessels, totalling over two million dwt, in operation or under construction. Three other 59,000-dwt break-bulk carriers are scheduled for delivery in 1977 and 1978.

CanPac International Freight Services Limited groups under one financial and general management Canadian Pacific's activities in the warehousing, customs-brokerage, international freight-forwarding, ship-agency, ship-brokerage and terminal-operating fields-

Trucking

Canadian Pacific is Canada's biggest trucking operator and one of the largest in North America. CP Express, CP Transport and the Smith Transport group of companies haul freight in more than 6,000 units of modern road equipment. This fleet comprises approximately 1,330 trucks, 2,780 highway trailers, 600 highway tractors, 525 city trailers and 755 city tractors.

CP Express specializes in the distribution of small-package shipments and also functions as a freight-forwarder, consolidating non-carload shipments into unit loads for transportation and distribution. Sorting and distributing containers is an important part of CP Express business.

Smith Transport is also active in the container field, hauls highway freight in Eastern Canada and “interlines” with other carriers to move goods anywhere in North America.

In Western Canada, CP Transport specializes in heavy and bulk-haul contract movements and has developed a number of distribution systems tailored to the needs of specific customers. The company has specially-designated trailers for hauling commodities such as sulphuric acid, liquid sulphur, edible oils, fertilizers, potatoes and fruit.
