30TH YEAR.

MANUEL AT GIBRALTAR DOUBTFUL YET WHETHER ALL PORTUGAL REVOLTED

Round - About Despatches Tell of the First Day's Fighting at Lisbon—Casualties Were Very Heavy.

That King Manuel is safe out of Portugal is deduced by despatches from Gibraltar, which say that he landed there Thursday night with the Queen-Mother, the Dowager Queen and the Duke of Oporto. The royal family of Portugal is therefore now under British protection.

A rigorous censorship still prevents the details of occurrences in Lisbon from becoming known, but despatches that have come thru by way of the frontier and direct indicate that the fighting in the streets of the Portuguese capital was of longer duration and of a more severe nature than at first reported. Nothing is known of Thursday's events at Lisbon.

The situation in the provinces is very doubtful. A despatch from Oporto gives brief details of demonstrations held there on the day after the rising occurred at Lisbon. Since then, however, word from Oporto said that quiet had been restored.

Notification has been sent to the foreign powers by the provisional government of the proclamation of a republic.

LISBON, Oct. 6.—While the City of Lisbon is in the hands of the revolutionists, and a republic has been proclaimed, with Theophile Braga as provisional president, and other prominent Republicans constituting the ministry, there are still many thousands in and around the capital who are loyal to the monarchy.

The monarchists include a portion of the Lisbon troops massed in entrenched camps about the city. These have refused so far to ally themselves with the revolutionists, and the provisional government is taking steps to enforce allegiance.

The people of Lisbon are ignorant of events in the provinces, and it is therefore not known whether the movement is broad enough to sweep the country. Nevertheless, the Republicans are proceeding as the transformation of the monarchy into a republic was an accomplished fact, to stand for all time.

Revolution Precipitated.

For months past preparations have been going on for the overthrow of the King, and it was definitely arranged to raise the cry of revolt on Wednesday. It so happened that the King was about to take up his residence at Cascaes, and the arrangements were made to proceed there. The navy, which is the chief support of the revolutionists, thereupon decided to act immediately, otherwise that defensive arm of the country would be unable to assist in carrying out the plan.

Monday, at midnight, the Republican chiefs, accompanied by numerous parties, went to the barracks of the sixteenth regiment, where the doors were immediately thrown open to the populace, and arms were distributed to thousands. The barracks of the first regiment of artillery were also visited, and the guns were dragged forth. The revolutionists marched to the highest point in Lisbon, a fine strategic position, where artillery was promptly brought into action.

The government troops immediately took up a position in the centre of the town, about two miles distant from the revolutionists, where heavy guns and machine guns were pointed against the enemy. Meanwhile the insurgent cruiser Adamastor steamed up in front of Lisbon, ready for a bombardment while the revolutionists proceeded down the river, taking her station opposite the seamen's barracks, which, having joined the revolutionists, was surrounded by a force of municipal guards.

The cannonading commenced, and the whole town trembled to its foundations. A regiment of municipal cavalry made a brilliant charge in an endeavor to take the insurgents encamped near the railway, but were met with a terrible fire by the artillery. This regiment was almost annihilated, only three men escaping.

COUNCIL GO SLOW IN NAMING AN M.H.O.

With Two Hastings Supporters Away, Council Vote by 11 to 10 to Defer Decision for a Week—Goodchild and Hill Are Hardly in the Running.

The city's medical health department is still without a head, despite a feeling almost approaching certainty that when the city council met yesterday afternoon it would accept the recommendation of the board of control that Dr. Charles J. O. Hastings would be appointed to succeed Dr. Sheard at \$5000 a year. Despite the freely expressed determination among the aldermen to lose no further time, a motion by Ald. Maguire to refer back the appointment so that it could be given more consideration, was carried by a vote of 11 to 10.

Everybody appeared surprised at the outcome, including Ald. Maguire, who said afterwards that he had not expected to see more than three or four votes against Dr. Hastings. That the latter will ultimately be appointed is, however, regarded as practically assured, as the majority of the board announce a determination to adhere to their recommendation. Moreover, Ald. McCarthy and Hamby, both outspoken supporters of Dr. Hastings, were absent yesterday, and their presence would have turned the tide.

No definite instructions were given to the board as to when they are to report again. The board does not hold a regular session before Monday's regular meeting, but a special meeting will probably be called later next week.

The Votes.

The voting resulted as follows: Dr. J. F. Goodchild, nominated by Ald. Welch; For, the mayor, Ald. Dunn, Welch, Hilton, May and Maguire—5; against, Controllers Ward, Church, Foster and Spence, Ald. Graham, McBride, Weston, Rowland, Spence, Heyd, Phelan, McCausland, Anderson, Baird, O'Neill and Chisholm—16.

Dr. William Hill of Minneapolis, nominated by Controller Spence; For, Controller Spence, Ald. Anderson, Baird and Chisholm—8; against, the mayor, Controllers Ward, Church, Foster, Ald. Graham, Welch, Weston, Rowland, Spence, Heyd, Phelan, McCausland, Maguire and O'Neill—16.

Ald. Maguire's motion to refer back: For, Ald. Weston, Chisholm, Maguire, Baird, Anderson, May, McBride, Hilton, Welch, Dunn and Controller Spence—11; against, Ald. O'Neill, Heyd, Phelan, McCausland, Spence, Rowland, Graham and Controllers Ward, Church and Foster—10.

The motion carried on the casting vote of E. F. Johnston, K. C., solicitor for the company, were considered by the directors.

According to General Manager H. H. Macrae, the company regarded the proposal favorably. "A settlement has practically been reached," he said, "but the final points of dispute will not be arrived at until the court opens tomorrow morning."

Asked whether the city's attitude as set forth in the replies of Corporation Counsel Drayton to the company's series of questions had been modified at all with the aim of compromise, Mr. Macrae replied that it had been considerably.

So far as can be learned, it is only a temporary truce that is being patched up, however, so as to allow the city to proceed with the erection of hydro-electric poles without prejudicing the company's right to continue the litigation.

The idea was," said Mr. Johnston, when asked as to the basis of settlement and the proposals he made to the company, "that the suit remain as it is now, and that the city should have the opportunity of getting rid of the danger from the wires, but, in the meantime, the rights of the parties will not be affected, and the company can go on with the suit at any time. I did not think it proper to stop a public work."

Corporation Counsel Drayton said last night that he was not aware of any modification of the city's stand. The city had sent a statement of its terms to the company and had not had a reply, but he looked for a settlement.

A SOUND SLEEPER

SETTLEMENT IS IN SIGHT IN THE POLE DIFFICULTY

Directors of Electric Light Company Favorably Consider Proposal Which is Hoped to Satisfy City.

There is every possibility of at least a temporary settlement of the injunction suit brought by the Toronto Electric Light Co. against the city, when the case is resumed before Justice Middleton in the non-jury assize court this morning. The terms of a basis of settlement, which were revised yesterday afternoon by E. F. Johnston, K. C., solicitor for the company, were considered by the directors.

According to General Manager H. H. Macrae, the company regarded the proposal favorably. "A settlement has practically been reached," he said, "but the final points of dispute will not be arrived at until the court opens tomorrow morning."

Asked whether the city's attitude as set forth in the replies of Corporation Counsel Drayton to the company's series of questions had been modified at all with the aim of compromise, Mr. Macrae replied that it had been considerably.

The idea was," said Mr. Johnston, when asked as to the basis of settlement and the proposals he made to the company, "that the suit remain as it is now, and that the city should have the opportunity of getting rid of the danger from the wires, but, in the meantime, the rights of the parties will not be affected, and the company can go on with the suit at any time. I did not think it proper to stop a public work."

Corporation Counsel Drayton said last night that he was not aware of any modification of the city's stand. The city had sent a statement of its terms to the company and had not had a reply, but he looked for a settlement.

When the suit came up for hearing yesterday morning Mr. Johnston wanted an adjournment for two or three days, with the idea of reaching some settlement, but Mr. Drayton did not favor such a course. Mr. Johnston said that the matter was one in which the public was interested, and the result might affect the city for years to come. He thought the whole trouble would be obviated if both the city and company were required to put all their cards on the table.

ANTICIPATES A GENERAL ELECTION NEXT SUMMER

Government Afraid of Borden's Western Tour—Appeal to Come While Farmers Feeling Good.

OTTAWA, Oct. 6.—(Special.)—The number of Liberal politicians who are in the city to-day, or have been here during the past week, is extraordinary. Most of them are after some position which will ensure comfort, if not opulence, in their declining years. At least this is the common report. So far no one is heard to claim successful presentation of his case, though some of his friends declare that Mr. Prowse, a Liberal member from Prince Edward Island, has been promised a senatorship towards the end of next session.

Many hold the opinion that there will be a general election next summer. They anticipate a short session, with very little debatable legislation, which would leave the opposition in the predicament of having to go to the country without a final fighting session.

Sir Wilfrid Laurier will attend the imperial conference in London and the King's coronation in May and June, and meanwhile the farmers will be collecting the payments for this year's crop from the banks. With this important section of the electorate in a pleasant and satisfied frame of mind, their crops in the ground and growing green, the premier would hasten to the hustings, gather in a majority of the constituencies and give his government another term. The belief is not ungrounded that Sir Wilfrid Laurier will defend the great body of the electorate if he goes to the country before the redistribution of seats, which must come after the census of 1911.

It is certain that the government fears the effect of R. L. Borden's proposed tour of the west next summer. His western tour three years ago was eminently successful. The opposition claim that he will be successful again.

CALL TO PROF. LAW

Will Be Decided at Special Meeting of Presbytery.

The recent call by Old St. Andrew's Church to Prof. Law was supported yesterday at the regular meeting of the presbytery by R. S. Gourlay and Jos. Oliver on behalf of the congregation. It was allowed to stand for a special meeting of the presbytery in the Temple Building on Oct. 20. In the meantime, the board of management of Knox College will be advised of the situation.

SPECIAL TRAINS TO BERLIN

Will Leave Toronto and London on Tuesday Noon.

A special train service on the Grand Trunk has been arranged for Tuesday, in connection with the hydro-electric power display at Berlin.

J. HOWARD HUNTER DEAD A VICTIM OF PNEUMONIA

Was Provincial Inspector of Insurance Since 1881, Having Been a Successful Teacher.

John Howard Hunter, provincial inspector of insurance, passed away at his home, 82 St. Mary-street, last night, after a week's illness, from pneumonia. Mr. Hunter, who was 72 years of age, was at his office in the parliament buildings on Thursday of last week, but returned ill to his home in Horn at Bandon, Ireland, in 1859, he came to Canada as a youth and graduated from Toronto University in 1861, taking the degree of M.A. next year. He followed the teaching profession for some years. His first principalship was that of the grammar school at Beauséjour, and in 1865 he became head of the united grammar and common schools of Dundas. In 1871 he was made principal of the grammar school at St. Catharines, and three years later accepted charge of the provincial institute for the blind at Brantford. Here he remained until 1881, when he was placed in charge of the department of insurance for Ontario, for which his knowledge of law, mathematics and finance fitted him.

Mr. Hunter was well known as a writer of subjects, both in the insurance matters. He was associated with his sons, W. T. and A. T. Hunter, in the authorship of treatises on insurance. He received the commendation of both English and Canadian journals.

Mr. Hunter leaves a widow and a family of four sons and three daughters. His eldest son, George, is chief justice of British Columbia, and the other sons are W. H. Hunter, Capt. A. T. Hunter and John H. Hunter of Toronto. His wife is Mrs. Hunter, nee MacFarlane of New York, and the Misses Annie and Grace Hunter.

FATAL ELEVATOR ACCIDENT

One Killed and Three Injured, Two Fatally, as Result of Fooling.

LONDON, Ont., Oct. 6.—(Special.)—As a result of a peculiar and distressing elevator accident at the biscuit factory of D. E. Perrin & Co. yesterday afternoon, one young man was killed and three injured, two fatally. Earl Barrett, aged 15, who lost his life, was putting in his first day's work at the factory. John R. Wellapring and Sam Gover are in Victoria Hospital with fractured skulls and it is stated cannot live. Alexander Russell, also of this city, sustained a fractured shoulder and knee cap.

Barrett was the elevator operator, and the others were fooling and someone shoved a truck under the car when it was going down. The elevator was blocked, the cable kept uncoiling and when the truck was knocked out the car fell with all four. The impact snapped the cable and the boys dropped about six stories.

Crew Were Saved.

KINGSTON, Oct. 6.—Members of the crew of the steamer Phoenix, which sank on Saturday above South Bay Point, have reached Kingston. They say the tow line holding the barge Sherman was cut as the steamer sprang a leak and was filling fast. The boat sank after a race for shore, and the crew was saved.

SCHOOL MEDICAL INSPECTION A FARGE

That's the Opinion of Dr. Helen MacMurphy, Who Places the Fault on System Designed by Inspector Hughes, and Declines to Proceed Under It.

What is it that the poet had to say about the fury of a woman scorned? Perhaps Chief Inspector James L. Hughes, of the city school system, recalled it last evening at the meeting of the board of education, when Dr. Helen MacMurphy, one of the recently appointed medical inspectors for the schools, in a carefully prepared communication, fully acquainted the board with an opinion, not alone on the present red tape "system" of medical inspection, but of the chief inspector personally.

"The information and statements in that letter are incorrect," said Trustee Dr. Bryans, after only two pages of the eleven long typewritten sheets had been read by the secretary. "It is too long, anyway, and I think that every member of this board should have an opportunity of perusing such a communication personally before any discussion. I would move that each member be supplied with a copy, and that the matter be referred to the management committee for consideration."

Trustee C. A. B. Brown challenged Dr. Bryans' right to make such statements in regard to a communication to the entire board, but with little more discussion it was decided that the matter should come before the management committee.

System Too Involved.

Dr. MacMurphy, after noting that she was not an applicant for appointment, but feeling that "the medical profession, at home and abroad, having done me the honor to consider me fit for such a position, it was for me to do my best to fill it," declares that the letter of instructions issued to Dr. Graham was an error by "one of the officials of the board, makes it only too evident that it is the intention of that official at least, that my colleague and I shall be placed in a subordinate position, both to the chief inspector of public schools, and possibly also to the school nurses."

The instructions work out as follows:

1. The teacher decides whether or not a child requires attention.
2. The teacher reports the names of those requiring attention to the principal.
3. The principal reports the names to the chief inspector.
4. The chief inspector decides whether or not the case should be dealt with at all.
5. If the chief inspector decides in the affirmative, these cases will, except in special cases, be first investigated by the staff of nurses.
6. The superintendent of nurses will then report to the chief inspector daily the cases which should be attended to by the medical inspectors, and the chief inspector will send the names and addresses of the boys to Dr. Graham, and the girls to Dr. MacMurphy.
7. Cards are to be sent out to notify parents of matters requiring their attention.
8. The principals are to report to the chief inspector once a week the names of those who have been sent.
9. These cases are then to be given once more to the nurses, who are to ascertain what has been done for the children.
10. If the nurses think that the child should be sent to a hospital, dispensary, etc., for treatment, the superintendent of nurses is to notify the chief inspector, and he is to communicate with the hospital, dispensary, etc.

Trouble From the First.

"The first three cases dealt with, occurred on the same day, and I was on duty, show how the above system works," wrote Dr. MacMurphy. Before we left the city hall on Friday, Sept. 23, about 11:30 a.m., the chief inspector said to Dr. Graham (who was not stated that the child was a boy), "the principal of the school has just telephoned to say that a child is away from school with infantile paralysis, and he wishes to know whether the other children of the same family should be sent home. Now, Dr. Graham, what do you say?"

"I listened to this with the deepest interest. Only two days before, I had seen the records and pathological findings of three fatal cases of this disease occurring in the city since Aug. 29, and discussed with the pathologist at Toronto General Hospital, and with other physicians. Besides, the medical health officer of the city is a man of high interest.
