

STORE REGULARLY LOOTED PROPRIETOR FINDS HOW

**Manager of Walker House For
Eleven Years, and Well-Known
Resident, Succumbs.**

Thomas Mackenzie Bayne, manager of the Walker House and one of the best known men in Canada, after being unconscious from 2 o'clock Friday afternoon up to the time of his death, died at 5.30 Saturday night.

Mr. Bayne was the manager of the Walker House for the past eleven years, and during that time and in his business career before he made friends from coast to coast.

Mr. Bayne was born in West Zorra, Ontario, on Oct. 22, 1842. When a young man he taught school in Oxford County for about seven years and

A black and white portrait of an elderly man with a full white beard and mustache, wearing a dark suit and a white shirt with a bow tie. He is looking directly at the camera with a serious expression. The background is dark and indistinct.

The Manufacturers Life Insurance Company on the 31st of December, 1908 (in its 22nd year) had Insurances in force amounting to

\$54,286,240.00

During 1908 the applications (for new Insurances) received were \$10,011,253, the largest amount in the history of the Company.

On these applications policies were issued for \$8,690,944.

Such results prove the popularity of

Insurance Company
Head Office:—Toronto, Canada.

THE LATE T. M. BAYNE.
For Eleven Years Manager of the
Walker House.

then took a position as traveling salesman. He was with the Crompton Co. set Co. for several years, and then went into the millinery business, being a member of the firm of Reid, Bayne and Reid. Mr. Reid, now secretary-treasurer of S. F. McKinnon & Co., and Robert Taylor, now president of the firm of Taylor & Smart, were his partners.

After being in that business for a number of years the firm dissolved, and Mr. Bayne assumed the management of the Walker House. David Walker was the proprietor of the house when Mr. Bayne assumed the management, and he remained in charge when Geo. Wiggins & Co., the present owners, purchased the hotel. The new taking active part in politics Mr. Bayne was a strong Conservative. He was a member of the Calumet Club, and was also a member, many years ago, of the Gaelic Society, and a member of St. Andrew's Presbyterian Church.

About two years ago he went to the Mediterranean for the purpose of making a tour of inspection in that respect, and he had a severe attack of grip, and he never fully recovered. At New Year's he had another attack of grip, brought on a general breakdown.

Mr. Bayne was the youngest son of the late John Bayne of Westport. His parents were natives of the Village of Dore, Inverness-shire, Scotland. Two brothers and two sisters survive him. Alexander Bayne, Woodstock; D. M. Bayne of Lakeside, Oxford County; Mrs. Alice Bayne of Fortwile, Ontario; Mr. James J. Laird of 336 Brunswick-avenue, Toronto.

Mr. Bayne's wife and son died about two years ago.

AFTER WELSH IMMIGRANTS

Brookville Man Gets Dominion Appointment as Commissioner.

BROOKVILLE, Feb. 14.—(Special.) From the Dominion Government Mr. Griffiths of Brookville has received the appointment of Commissioner of the Wales, where he resided before coming to this country a few years ago.

NEW ORLEANS, Feb. 14.—A sensation was created in the United States district court when a grand jury returned indictments against Mayor Paul Felix and other members of the Orleans parish, charging them with "conspiring and agreeing to arm themselves with pistols and knives, and to attempt to injure, oppress and threaten certain voters."

The indictments grew out of the cutting off of the whiskers of E. A. O'Sullivan, a prominent attorney of New Orleans, at the Kenner police station last night. O'Sullivan went to the polls for the avowed purpose of giving legal advice to certain voters, but he refused to let his beard be shaved.

As he approached the voting booth he was seized and his flowing whiskers with a state-wide reputation for luxuriance were summarily clipped.

LIFE IN MINING TOWN

What the Prospector Endures Up In the North.

ELK LAKE, Feb. 11.—(From our own man up there.) It is questionable if there is more cosmopolitan life in the same size, and of the same age, in the whole of Canada, than Smyth- or Elk Lake, as the postoffice is known. There are people here of all ages, and from every clime; and one called by the possibilities of procuring wealth.

First and foremost there is the hardy prospector who comes into this silverland of the north with the object of unearthing some of the earth's treasure in the form of silver. He has no time and life is by no means an easy one. He has to walk many miles over the forest trails with his pack-saddle, which is loaded with anything from thirty to one hundred pounds. Sometimes he is compelled to walk long distances on snowshoes carrying his pack, and snow-shoeing as a business and with a load is much different from snow-shoeing for pleasure without a load, which is the only kind the people here do.

But traveling or "hitting the trail," as it is known in the woods, is not the only hardship to contend with. At night, if there is not a log cabin near at hand, he has to pitch his tent, lie down in his sleeping bag, and get under his clothing, and while one man sleeps another sits up to keep the fire in the little camp stove from going out. Sleep is very difficult, and the temperature outside anywhere between thirty and fifty

A study of the great scientist was the first lesson of the University of Toronto, where the Canadian Institute held its annual geological holding in the city on Saturday night.

The occasion was the commemorative anniversary of his birth, the conclusion of a number of addresses by various professors of the university Prof. Ramsay proposed that the institute in recognition of the great man make a special medal to the next year university student accomplished in the study of philosophy.

Sixteen addresses were delivered by Ramsay Wright, Prof. McTear, Dr. Paul, Dr. Abbott and others. The subject was an outline of Darwin, his student subsequent education, his work in geology, and how he began the study of evolution. An immense amount of obscure animal life.

Prof. Huxley Darwinism had different things, according to Mr. Murrich, the latter being tempted explained the variations among wild animals and the same as in domestic animals. He also mentioned the natural selection carried on in animal and kingdoms thru long periods of time.

Prof. Macalium spoke of a fearful change that had taken place upon the world since he was a boy Darwinism concentrated in him the sciences of biology and geology produced. The doctrine of evolution from the standpoint of the present day was dwelt upon by Prof. Paul, who pointed out that the theories were prepared to accept that had promulgated.

Dr. Paul, who dealt with Darwin's philosophy and showed why his doctrine had upon philosophical regard to conduct.

Tennison, George Elliot was showing the effects of evolution, thought, his introduction of generalization, and generalization pointed out that in many kinds of writing to-day the Darwinian theory of evolution is occurring.

TEMPLEMAN GETS

WHEAT

YOU CAN'T SLEEP

There is many a man and woman tossed all night after night upon a sleepless bed. Their eyes do not close in the sweet refreshing repose that comes to those whose heart and nerves are right. Some constitutional disturbance, worry or disease has so debilitated and irritated the nervous system, that it cannot be quitted.

Or again, you have, a sinking sensation, a feeling you are going to die, or perhaps you wake in your sleep feeling as though you were about to choke or smother, and rest leaves you for the night. If you all these conditions to continue for a short period even, you will begin to feel your health declining. It is the nerves that start not acting rightly, and they can be set right by the use of Milburn's Nerve and Nerve Pills. They soon induce healthy, refreshing sleep, not by deadening nerves, but by restoring them to healthy action.

Mrs. E. Nutt, St. Mary's, Ont., writes: "I can gladly recommend your Milburn's Nerve and Nerve Pills. It was great trouble with my nerves. I was so debilitated that I could not sleep at night without the burning, but after taking four boxes of pills I became all right again."

Price, 50 cents per box; 3 boxes for \$1.25, at all dealers or The T. Milburn Co. Limited, Toronto, Ont.

ity degrees below zero is not a luxury.

The prospector's grub" consists of a few beans and cornmeal, and he is compelled to eat for indefinite periods, ranging from a week upwards. His lot is by no means an easy one, and it takes a muscular, of steel perfect physique and stiff backbones should undertake such a task, and he deserves well all that mother earth can give him.

But there are other people who come to a mining town. There is the financier who buys claims, promotes mines and thus gains much wealth. Then there are hotel keepers and merchants of various kinds, who come to the advantage of the rush. Doctors and lawyers find it profitable to locate in a mining town. The Chinaman comes with his lunch counter and his food stand, and opens up branches and finds it profitable. The miner and the laborer come, and the carpenter finds it particularly profitable as he has many things which are of great frame construction, and last, at least the newspaper man comes along, and makes an effort to keep the great public informed of what is going on in the little mining town, through whose eyes the whole country are directed.

The number of college graduates and professional men who find their way into this north country is astonishing, and along with these there are many young men who have had studies at their college courses come here to mingle with the many others in the great hunt for glittering gold.

Life in a mining town is full of interest and nowhere in the world has one a chance to study his fellow man to better advantage than here. Stories are told around the evening fire, and the listener goes away with a better knowledge of his fellow man than he has before hearing.

Fronteacne Liberal.

KINGSTON, Feb. 27.—The annual meeting of the Fronteacne Reform Association was held Saturday afternoon. These officers were elected: President, John Davis; first vice-president, J. Baxter; second vice-president, Coleman Craig; secretary-treasurer, John Keenan.

tection in the North

VANCOUVER, B.C., Feb. 26.—Wm. Templeman, who returned from Prince Rupert, declares that the improvements in the navigation taken up without delay.

After obtaining the views of the dians in the fishing industry, he stated that he was quite satisfied with the necessity of more extensive protection in northern waters. He promised his hearty support of any scheme tending to make the fisheries of one of the best and safest parts of the Pacific, and urged the sending of a mission to Ottawa. He added establishment of harbor com-

Brockville Syndicate Gets Lick
BROCKVILLE, Feb. 14.—An upper lake grain carrier, the barge Bermuda, has passed hands of a Brockville syndicate will ply her the coming season between Chicago and Montreal. This was purchased from Capt. W. H. Bay City, Mich., and is of the Canal size, 288 feet long, 20 ft. She is an American boat, operated from Brockville by Russell in command.

Silver

Cobalts Have

Saturday's Toronto market showed a decided upturn in the price of silver during the week, and in the afternoon showed an incline in the price of the metal. The market was reported from New York to be unlimited. However, in most districts during this week, a substantial gain as a ten point closing price, six points to the maturity in Temiskaming land and the decline to a loss, had an inclination to work stocks, probably operators seeing quick profits.

Crown Reserve during the week points yesterday in Temiskaming and the general was helped somewhat by favorable reports from the miners in the district.

The market was a cover quarter for the Copper and Silver mining engineers, and the silver field was generally the work and fresh this week.

The market with a much higher opinion of the markets have diverse rumors strengthen the future.

Conservative to the two metals, and the Government, and the effect of lesser order secured increasing field of production to offset the Toronto Stock
