MONTREAL WITNESS SCORCHED
\$10,000 Damage Done—Fire Started in Upper Floor.

MONTREAL, Sept. 23.—(Special).—The Daily Witness office, at Craig and St. Francis-streets, was badly damaged by fire which broke out in the upper flat after the paper had been issued at four o'clock. The fire in the upper flat is about ruined, although the composing room escaped damage except by the loss of the press room, however, got down into the press room in the basement. Thirty thousand dollars will likely cover the loss. There is insurance of \$150,000.

Interpreter Also Accused.
MONTREAL, Sept. 23.—(Special).—John Lesage, interpreter, here in connection with the Dominion Coal field case against Duke McBois, of the U.M.W.A. was arrested to-day on the same charge.

FALL SKIN DISEASES.
An Article For Mothers.
When the children "break out" with eruptions and skin diseases, so common in the fall, don't run to useless and nauseating medicines. Zam-Buk is what is needed. It is a skin food as well as a healing balm.

MONTREAL, Sept. 23.—It was announced this morning at the head office of the C. P. R. that the management had practically decided not to duplicate the line beyond Peterboro.

A Favorite With Banks.
The Merchants Bank, the Bank of Montreal, the Metropolitan Bank, the Home Bank and the Farmers Bank use the Underwood typewriter. They do not buy it because it is cheaper than others.

PLENARY COUNCIL
All Members Attend a General Session at Laval.

QUEBEC, Sept. 23.—(Special).—The general convention of all members of the Plenary Council was held at Laval University this afternoon. To receive reports from various committees.

OBITUARY.
HALIFAX, Sept. 23.—(Special).—Hugh Fletcher of the geological survey of Canada died this afternoon at Lower Cove, Cumberland County, of pneumonia. He had largely charge of the Nova Scotia district of the survey and had been engaged of late in mapping out the coal sections of Cumberland County.

THE WEATHER

OBSERVATORY, Toronto, Sept. 23.—(8 p.m.)—Showers and local thunderstorms have occurred to-day in Ontario attending the eastward movement of the disturbance from the south. In the prairie provinces the weather has prevailed with unusually high temperatures in Alberta.

Minimum and maximum temperatures: Dawson, 26-38; Atlin, 34-39; Victoria, 50-66; Vancouver, 41-61; Sanloope, 40-51; Edmonton, 34-44; Battleford, 28-70; Prince Albert, 26-54; Calgary, 34-70; Moose Jaw, 31-51; Qu'Appelle, 36-55; Winnipeg, 31-54; Port Arthur, 36-56; Parry Sound, 51-64; London, 52-57; Toronto, 51-59; Ottawa, 51-59; Montreal, 54-59; Quebec, 52-74; St. John, 54-60; Halifax, 48-75.

GUELPH'S GREAT SUCCESS
WITH PUBLIC OWNERSHIP

Continued From Page 1.
The banquet this evening took the form of a municipal reunion. Representatives from all municipalities in western Ontario were present, as well as from financial papers in the Sixties.

Responding to the toast referred to, the Hon. Mr. Guelph occupied an advanced position in regard to the public ownership of utilities generally. That which is a large question. Some utilities were properly placed under public control, and every municipality should be capable of managing such utilities. It was always advisable for a municipality to own its utilities.

It was an advantage to state these utilities directly or by commission. Guelph in this respect had been fortunate in its representatives. His Honor and the Principle.

"The street railways," continued the speaker, "is not a utility that can be placed under public ownership. It is a utility that can be operated as a side show or incident to the operation of other utilities, but in ordinary circumstances, it is not a utility of any city of considerable size, the arguments are entirely against that sort of thing.

A city of two or three times the population of Guelph would do better, placing it under the control of private enterprise. The right kind of utility, subject to the control of the city, is a utility that can be operated as a side show or incident to the operation of other utilities, but in ordinary circumstances, it is not a utility of any city of considerable size, the arguments are entirely against that sort of thing.

The whole question reverted to the original position. The speaker said that he must appoint the right kind of utility, that there would be continuity of effort, policy and management. His honor looked to the future of the city, instead of tax bills, civic officials would distribute dividend cheques.

In concluding, his honor admitted that he had skimmed closely to a live political subject, which he had no business to touch upon. "A lieutenant-governor has no right to have views of his own manufacture. He is expected to fit them ready made, and to get them from the same concern," he added.

Commissioners Prove Success.
The presentation of illuminated addresses to the four water works commissioners by R. L. McKinnon, secretary of the joint committee of the council and board of trade, showing the appreciation of the city in the completion of the water works, was the practical talk from G. B. Ryan, chairman. He emphasized the fact that direct control by the city council, which the water works had not been enough to carry such work to a successful issue. There was no continuity of effort.

Contrasting his experience with those of his honor, the street railway in Guelph under private ownership had been operated at a loss, whereas had been a surplus ever since the commission took hold. One objection to control under a municipal council was that it involved too many parties. He took his example from the large corporations and banks, where a small number of men comprised the management. Guelph was like a stock company, with a capitalization of several million, and five thousand ratepayer shareholders. Two many ratepayers he thought stayed at home election time. The net results depended upon the men elected.

As a commentary upon management by the city council, the commissioners had made enough profit in 1908 to equal the entire income of the two years in which the water works had been under control of the council, and the consumers are now getting 25 per cent more water at 50 per cent reduction in cost.

R. L. Torrance, secretary of the commission, following the chairman, declared that some well-meaning elements of hydro power had unintentionally misled the people about the price of power. All they could expect was the proportionate cost of transportation, added to the price at the falls. That was fair.

J. W. Lyon, one of the originators of municipal ownership, offered \$1000 for a statue of J. P. Jones.

The New Water Supply.
R. P. Slater, Mayor of Niagara Falls, declared that he had some well-meaning elements of hydro power had unintentionally misled the people about the price of power. All they could expect was the proportionate cost of transportation, added to the price at the falls. That was fair.

Every ratepayer in the city of Guelph believes that every dollar put into the system here has been well spent.

Major J. H. Mackenzie, who spoke for "sister municipalities," referred briefly to the hydro-electric situation. His chief objection was that this was the Falls of power and carried it five miles past Hamilton to Dundas, and then back, and that Hamilton was expected to pay a pro rata cost for the additional distance.

The New Water Supply.
R. P. Slater, Mayor of Niagara Falls, declared that he had some well-meaning elements of hydro power had unintentionally misled the people about the price of power. All they could expect was the proportionate cost of transportation, added to the price at the falls. That was fair.

Guelph, and \$1000 for series of fountains, contributing the sums on a 10 per cent basis.

Other speakers were Mayor Welden, Waterworks, James Osborne, general superintendent C. P. R. E. A. James, a Canadian engineer, and J. P. Downey, M.L.A., South Wellington. The surplus water for Guelph through the new system is ample as well as pure. The source is a series of large springs in the hillsides of Arden a distance of 1-2 miles from the city. The water is piped in thru a 24-inch conduit at the rate of 4-1/2 million gallons a day into a reservoir with a capacity of half a million gallons from which it is pumped by 150 horsepower pumps to a standpipe, and of half a million gallons capacity.

The water scarcely sees the light of day from the time it enters the pipe line at the springs till it flows from the tap. The reservoir is covered, the ground around the springs fenced in, and every precaution taken against pollution.

The gas and electric light services are under the management of the Pilgrims, Dutch scenes, etc. The man of which is S. Carter. The gross profits for the year from the light and heat commission were \$38,303.55, and after payment of general expenses amounting to \$22,222.22, the net profit of \$16,081.33, was a profit of \$25,218.77, carried to the credit of profit and loss.

The commission have a balance on hand of approximately \$100,000, which represents the earnings of this department since its start in operation, and above the payment of interest and sinking fund upon debentures. The prices of electric light and gas have fallen since the city purchased these utilities, showing that the \$100,000 surplus has not been built up at the expense of the people.

Gas is now \$1 a thousand and has fallen to \$0.75 a thousand. The water works had a net profit of \$264,933 last year, and the city has a surplus of \$150,000.

Beats Private Ownership.
Under private ownership it did not pay operating expenses. It was not purchased by the city with the expectation of dividends, but rather in the interest of the city.

Under private ownership it did not pay operating expenses. It was not purchased by the city with the expectation of dividends, but rather in the interest of the city.

withheld, that a man and woman who lived a short time at her house, but left some time ago acted very suspiciously regarding a baby and she thought from a conversation she overheard that they intended to murder the child.

The police say Mrs. Turner lived for some time in Cleveland, and are making investigation along that line. The New York Coroner Charges Murder. NIAGARA FALLS, N. Y., Sept. 23.—(Special).—Coroner Walter A. Scott, who has been conducting the investigation following the finding of the body of an infant girl thrown from a train on the Lewiston branch of the New York Central, on Thursday last, and in connection with which Mrs. Maud Turner (alias Gmelin) is now under arrest in Toronto, this evening rendered a verdict, which formally charges Mrs. Turner with the crime of murder in the first degree, finding, according to the evidence, that "death was the result of asphyxia, due to strangulation, and that said strangulation was the result of tightly drawing a rope or cord about the throat of the infant, or by throttling by hand, or by both."

A copy of the verdict will be forwarded to the authorities in Toronto. An inquest will be held in Toronto on Wednesday night of next week, and Coroner Scott, Dr. J. L. Bishop, Frank Fleming, the switchman, and a newspaper man have already been requested to appear and give evidence.

San Francisco Police Interested.
SAN FRANCISCO, Cal., Sept. 23.—The chief of police, alias Maud Turner Gmelin, incarcerated for child murder at Toronto, may be the same woman who operated in San Francisco and in Reno, Nev., in 1906, the Boston authorities here, Dr. Marion Thrasher of this city, asserts that he made a medical examination of a child for a woman named Gmelin, who wished to adopt it. Later the woman removed to Reno, where the child was taken from her by the authorities. This woman was also accused of murdering another infant.

Early Submission of His Records is New Anticipated.
EARL HARBOR, Me., Sept. 23.—General Thomas M. Hubbard, president of the Peary Arctic Club, who had a conference to-day at Bangor with Commander Robert E. Peary, returned here to-night bringing with him some of the preliminary data and records which are to be used to maintain the position of the explorer in the Cook controversy.

The records will be carefully considered and General Hubbard and Commander Peary will confer here either next Sunday or Monday. This conference may result on an announcement, making public any information in the possession of Commander Peary concerning Dr. Cook.

Peary has placed his case in General Hubbard's hands and a meeting of the officers of the Peary Arctic Club in New York will be called at the earliest possible moment.

This action will be taken because General Hubbard believes that Commander Peary's interests will benefit by an early submission of his records and observations of the trip to the pole.

"Concerning Dr. Cook," said General Hubbard to-night, "I would say, let him submit his records and data to some competent authority and let that authority draw its own conclusions from the notes and records taken in the field."

"I may say that Commander Peary will also be expected to turn over his data and observations for the same purpose. What proof Commander Peary has that Dr. Cook was not at the pole may be submitted later."

His Holiness Pleased.
King Edward's Message to Plenary Council Gratifying to the Pope.
LONDON, Sept. 23.—(C.A.P.)—A Rome despatch, says the Pope was extremely pleased by the receipt of a telegram from Quebec giving the text of messages exchanged between Mr. Sheppard and King Edward on the occasion of the Plenary Council of the Canadian Catholic Church. His holiness was especially satisfied the solemn resolution adopted by the King of the religious freedom granted to all British subjects throughout the empire. It was reported that the Pope said such an attitude was the part of his ruler of the greatest power in the world contrasted strikingly with that of other countries from which better things might have been expected.

SUICIDES AT WIFE'S GRAVE.
E. Hamilton of New York Shoots Himself at Ottawa.
OTTAWA, Sept. 23.—This afternoon a New York City man named E. Hamilton committed suicide at St. Joseph's cemetery here by shooting himself thru the head with a revolver. His wife died here a year ago, and he suicided at or near her grave.

It is stated that Hamilton a year ago married a Miss Ring, of Ottawa, that she died in about a month, and that despondency at her death led to his death of this afternoon.

The People's Cut-Rate Drug Store
THE KARN COMPANY
F. E. KARN LIMITED
COR. QUEEN AND VICTORIA STREETS
PHONE M. 3389

THE DRUG STORE
THAT SETS THE PRICES

This business has grown to its present great proportions because through all the past years we have sold the people the purest and best goods at the lowest prices. The bigger we grew the larger quantities we bought; we go direct to the supply sources for our goods; save all the middlemen's profit and turn the goods over to you with only our small profit added. AND WHEN WE CUT PRICES there's no going back to the old figures again, depend upon that—no juggling with figures—no baits for the public here—straight, square-deal business every time at Karn's.
