FIRE INSURANCE RATES.

One of the greatest drawbacks of many an inland town are the high insurance rates that have to be paid, and only in a few towns is the rate at all moderate. New Liskeard is one of the few. The insurance rate, in this town is lower than that of any well supplied with water, and has an was more serious than one this after excellent water and fire service. Then again many of the buildings are of a substantial character, being of Hen. Mr. Paterson resumed the bud-brick and concrete. This has been get debate in his usual breezy manmade possible by the brick-yards and concrete works located in New Liskeard.

Suffragettes Not Strong.

The Laborites are not likely to be so strong in the new parliament as in the last. They have already lost several seats and several of their members have won only by narrow majorities. This loss of ground by the workmen's party has been one of the surprises of the election. Suspicion that they op-posed a larger navy doubtless had its effect, for a number of other opponents of the government's belated action in meeting Germany's building

program also suffered defeat.

The surprised which the suffragettes were expected to spring have not yet materialized. They have been actively canvassing against the government and they made a strong stand against Sydney Buxton to-day, but thus far they have not engaged in the militant tac-

THE LIGHT THAT NEVER FAILS

CHRISTMAS ANNOUNCEMENT

THE Company has allotted extraordinary BONUSES to its Industrial policy-holders payable in 1910. These are CASH BONUSES which may be used in payment of premiums upon their Industrial policies. They were not promised in the policies, either expressly or by implication, the policies being strictly non-participating. No such bonus has ever been given by any company to its policy-holders, and no such bonus ever will be given by any other company.

BONUSES TO LIVING POLICY-HOLDERS

To every holder of an Industrial whole life policy of the Company who shall pass the age of 75 during 1910, a bonus on its anniversary date thereafter equal to premiums for52 weeks

To every holder of an Industrial policy in force issued in 1879 and 1880, a honus To every holder of an Industrial policy in force issued in 1881-2-3-4-5, a bonus on

To every holder of an Industrial whole life policy in force issued in 1886-7-8-9-1890, a bonus on its anniversary date equal to premiums for......15 weeks To every holder of an Industrial whole life policy in force issued in 1891-2-3-4-5.

a bonus on its anniversary date equal to premiums for 10 weeks To every holder of an Industrial whole life or increasing life and endowment policy issued in any year from 1896 to 1905 inclusive, a bonus on its anniversary date equal to premiums for 5 weeks

These bonuses are thus for percentages varying from about TEN to ONE HUNDRED PER CENT. of the amount of weekly premiums for a year. It will be observed that the bonuses are graduated by the age of the policies. The whole life policies issued between January 1, 1907, and July 1, 1909,

have received a reversionary dividend of about ten per cent. of their face during the past year (that is, have been increased in amount about ten per cent). This cost the Company \$600,000 in 1909; and will cost many hundreds of thousands of dollars in subsequent years in increased Reserve. The whole life policies, issued since July 1, 1909, have been increased about ten per cent. in amount above the amount of insurance previously provided for the same respective premiums.

BONUSES ON DEATH CLAIMS

Death Claimants on whole life policies issued between January 1, 1907, and July 1, 1909, whose claims had been settled, have received in the last six months a payment of mortuary bonuses of about ten per cent. in addition to the amount previously received, at a cost to the Company of over \$250,000.

Payment on Death Claims in 1910 will be increased over and above the face of the Industrial policies by amounts determined by the following scale: When death occurs after policy has been in force over 5 years..... 5%

When death occurs after policy has been in force over 10 years..... 10% When death occurs after policy has been in force over 15 years..... 15% When death occurs after policy has been in force over 20 years 20% When death occurs after policy has been in force over 25 years 25% When death occurs after policy has been in force over 30 years 30%

The cost to the Company of these CASH bonuses is estimated at

\$5,204,639.95

Added to the bonuses heretofore paid for the last sixteen years OVER AND ABOVE THE PROMISES MADE IN THE POLICIES, this will bring the total CASH bonuses up to

Twenty-one Millions of Dollars in CASH in 17 Years!

The Additional Cost of Concessions in Reserve Liability has been Four Millions of Dollars

The sources of these bonuses are:

Decrease in expenses—TEN PER CENT. in nine years to the close of 1908.

Saving in the Mortality which was expected when policies were issued. Gains in Interest actually earned over the amount required by statute for accumulation of Reserves. The fact that on a premium income of nearly \$50,000,000 a year the Stockholders receive only \$140,000, which is more than earned from the income of their own capital and surplus; the balance of such income going

to the increase of the fund from which Bonuses are paid. METROPOLITAN LIFE INSURANCE CO.
