JEALOUS MAN'S CRIME SHOOT'S WIFE AND SELF

Kisses Children Good-bye Before He Suicides, Saying That He Has to Kill Himself or Be Hanged.

MONTREAL, Aug. 18.—Urged on by jealousy, John O'Keefe, laborer, 1350 Logan-street, shot his wife, Rosa Anna de Lima Soukist, dead, and then killed himself at 1 o'clock this morning. There were two families in the house, and it is said that the attention paid to his wife by the other man led to the deed.

There is a certain amount of mystery, as there had been no quarrelling, and the first intimation that there was anything wrong was the ringing shot which ended the wife's life. This was followed in a minute by another, and when the neighbors rushed in the wife lay dead in the bed, having been shot in her sleep. The body of the husband, with the head blown off by a shot upwards thru the mouth, lay across that of his wife.

Barnard, aged 14, and Winnie, aged 12, the two oldest of six children, said that they were awakened by the first shot, and rushed into their mother's room. The mother was lying on the bed, and the father was standing beside with smoking revolver.

"Good-bye, children," he said, and kissed them. "I have killed your mother, and if I do not kill myself I shall be hanged."

Then he fell down on the bed beside his wife and lay there for several minutes; then he got up and said: "I must not let the police get me."

He shook the woman to see if she were really dead, and then ran out into the hall, where he fired again and fell dead. The only quarrel which the children knew of was over a sister of the mother, who was refused admittance to the house by the father, and there was a quarrel.

O'Keefe had been a foreman in the cotton mills for years, and was not drinking. He had bought two revolvers previously, and both had been thrown away by his wife.

PARKDALE RINK

Reopens for the Season, Saturday Night, Aug. 20.—New Features.

The fall skating season opens in earnest next Saturday evening, on that night Canada's leading skating academy throws open its doors and begins a season which promises to be the most successful since the rink first opened, nearly five years ago. The high standard always maintained at Parkdale will be more in evidence this season than ever before, and the rink will keep its reputation as being a favorite with particular people. To make roller skating a real enjoyment, it is always necessary to have a perfect skating surface; the floor should always be white and kept in a clean, sanitary condition, free from all dust and so treated that the skaters will not slip, but at the same time the surface must be fast and lively; a dead floor, as is found in many places, makes roller skating hard work, takes all the pleasure out of the popular pastime, and robs the skaters of that pleasing, graceful glide which is so much appreciated by the lady devotees.

The Parkdale rink is conceded the fastest skating surface in America; it practically no effort skating here, and no matter how much skating a person does, he never gets tired, on this fast anti-slipping floor, and this is the reason why the lady skaters of Parkdale appreciate it so much. The rink is now equipped with a noiseless floor, and the result is that the skating is practically done away with. No greater improvement in the rink business could be thought of, as the continual deafening roar was a very disagreeable feature, and as a matter of fact, it kept quite a few people from skating who would otherwise have been regular patrons of the rink.

Parkdale rink has the most modern skating surface, and there is no more noise than you would find on an ice rink.

Parkdale has become known as the rink with the noiseless floor. The musical director, J. Andrews Wiggins, has perfected a new and original idea, and has secured the services of a very popular as a rink attraction. This new musical arrangement will be put on next Saturday night for the first time. Mr. Wiggins has also been fortunate in securing a new New York copy of a number of the coming musical comedy hits.

The band alone is a one big attraction; the band always well filled with spectators who enjoy good music. A new lot of velvet tread skates has been added to the equipment.

The interior of the building is being painted and decorated, while the floor is being re-surfaced to a perfect smoothness.

Parkdale rink will present a pretty appearance on Saturday night, and the management is making arrangements for handling a big crowd of skaters and spectators.

Beginning Monday, Aug. 22, there will be three sessions daily at the rink; the first session, the morning and afternoon sessions will be for beginners, when instructors will be present to teach those wishing to learn roller skating.

Yukon Bars Fight Pictures. OTTAWA, Aug. 18.—The western pioneer and the hardy men of the Yukon who looked forward to whiling away the tedium of the coming winter by watching the tattle of the Reno conflict on July 4 last, are doomed to disappointment.

NEW BOAT TO COME HERE

R. & O. Steamer Rochester to Run to Toronto During Exhibition.

During the exhibition season the new R. & O. boat Rochester, which was launched at Detroit a couple of months ago, and has been plying between Youngstown and Charlotte, N.Y., will run regularly from Rochester to Toronto. It was thought for a while that arrangements might be made for this boat to run during exhibition time between Hamilton and Toronto, but this is prevented by the law which requires American built vessels to set out from a United States port when they sail for a Canadian one.

J. C. Eaton, president of the Turbulence Steamship Company, has donated one hundred tickets for a trip on the Turbulence to Canon Dixon, pastor of East Trinity Church, to be distributed among the poor families of his congregation. There will be an excursion of the boat to Hamilton on the Turbulence Saturday.
