

JOHN LEWIS AT PEACE CONGRESS

"Canada and U. S. Have Set the World an Example of a New Kind," Says a Toronto Newspaper Man.

ST. LOUIS, May 3.—"Canada and the United States have set the world the example of a new kind of international relation," said John Lewis of the Toronto Star, at the fourth American Peace Congress here today.

"The modern peace movement is not visionary or sentimental, neither is it wholly based upon business interests," said Mr. Lewis. "It is simply a part of the progress of civilization. It advances with the growing recognition that the true interests of nations are not conflicting, but identical."

The growing interest of governments in social reform is one of the forces making for peace. The international gatherings of scientists and others having common interests are the beginning of the parliament of man. The scientist who is seeking a cure for tuberculosis in Germany can have no rational cause of quarrel with the man who is seeking a cure for tuberculosis in France, in Canada or in the United States.

"Canada and the United States have set the world the example of a new kind of international relation. Disputes far more serious than those that have led to war elsewhere have been settled by arbitration. But we must not be satisfied with a mere negative advantage. Freedom from war and from the apprehension of war must make full use of our exceptional advantages. We must look, not backward to the year 1813, but forward to 2013."

"The three stages of development may be thus indicated—in 1813 war, in 1813 peace, in 2013 friendship and active co-operation in social reform inspired by all the courage and energy which were once devoted to war. Our anniversary celebration should be not merely peace, but of civilization, the principles of industry and science."

Judge Riddell's Address. William Riddell, justice of the supreme court of Ontario, reviewed the history of British-American relations for the last hundred years, and said that questions more difficult of settlement than any settled by war had been adjusted peacefully between the United States and Great Britain.

"The determination of the English-speaking peoples," he said, "that they will conclude their disputes by peaceful means is final and irrevocable and must in the nature of things have a tremendous influence on the world at large."

"No one expects or desires a political union between the United States and Great Britain. But there is a growing sense of unity that must guide the future actions of both peoples."

Justice Benjamin Russell of the supreme court of Nova Scotia said it was a settled understanding among the English-speaking peoples of the world that no possible question could arise between them that was incapable of adjustment without recourse to the sword. "That being so," he said, "our first duty is to have this understanding formulated in a treaty, from the provisions of which there shall be no exceptions."

President of Haiti Dead. PORT AU PRINCE, Haiti, May 3.—The president of the Republic of Haiti, General Tancrede Auguste, died at 9 o'clock last night after a brief illness.

The Oxypathor CURES INFANTILE PARALYSIS AND PNEUMONIA

No curative agency yet discovered compares in efficiency with the Oxypathor, the only instrument which enables the human body to absorb oxygen from the atmosphere. Wonderful cures have been made every day, and in many cases after the most expert medical treatment has failed. Hundreds of testimonials as grateful in tone as the following may be seen at our office:

Toronto, Oct. 17, 1912. The Ontario Oxypathor Co., 701 Yonge Street, Toronto.

Dear Sir:—I purchased an Oxypathor from you last March to give it a trial on my boy, Ernest, then aged three years, who had infantile paralysis a year and a half before, which left him with his left leg utterly paralyzed. He could not raise it, or even move a toe, and the doctor said his leg would always be dead. He was in the Sick Children's Hospital on a month, but derived absolutely no benefit from the treatment he received there. Mere words cannot express my gratification at the wonderful improvement effected by him by the Oxypathor. He can now stand alone and walk across the room quite unaided, whereas before he could only crawl on his hands and knees. I only wish I had known of this instrument when I was sick with this terrible disease. It cured him. He had an attack of pneumonia in three days during the latter part of the year, and he is now suffering from colds, but he has only this week from a badly-sprained and swollen ankle. If you will send anyone to see Ernest we will gladly show what it has done for him. Faithfully, Charles E. Barker, 24 Price Street.

PHOTOGRAPHY REVOLUTIONIZED BY NEW INVENTION

Films, Plates and Dark Room Made Unnecessary.

New Camera Takes Finished Pictures in Two Minutes.

Mr. Edmond F. Stratton, of New York City, has invented a camera that takes and completes pictures ready to see in two minutes. It does away with the expense of buying films or plates and the trouble, expense and delay of having them developed and pictures printed by a photographer. The camera has a fixed focus lens and there is no delicate focusing mechanism to get out of order or for you to learn to operate.

This camera, which is called the Gordon Camera, is being manufactured by the Gordon Camera Company, of New York. As they are desirous of making it known in every locality, they are making a special offer to our readers. For a limited time upon receipt of \$2.50 (and 90 cents additional to cover express charges, sensitized cards and developing powders) they will send you a regular #5 Model A Gordon Camera.

The sensitized cards, which make pictures 2 1/2 x 3 1/2 inches are wrapped for daylight loading, and the powders make the developing solution to be put into the developing tank, which is inside the camera. The camera itself is 8 1/2 x 4 1/2 inches and weighs 2 pounds 4 ounces.

The cost of taking pictures with the Gordon camera is almost nothing in comparison to all other cameras. Extra sensitized cards can be bought for 1 1/2 cents each and 10 cents' worth of developer will develop over 40 pictures. The Gordon Camera Company sells flash light lamps for 80 cents, which will enable you to take pictures at night in your own parlor, or out of doors.

The operation of this new camera is so simple that any little boy or girl can easily take good pictures with it after reading the directions sent with each one. There is no customs duty to be paid as the Gordon Camera will ship to you from their Canadian factory which is near Toronto. All orders and letters, however, must be sent to their office, which is at 1787 Stuyvesant Building, New York, N.Y.

When ordering a camera under this special offer, be sure to mention that you are a reader of The Toronto World.

SECOND PETITION FOR RELIEF OF SUFFERERS

Continued From Page 1.

ther or not the certificate should have been given; that the information which had been conveyed to the minister (Mr. Fielding) had come from gentlemen of standing, and if it was accurate, the declaration Travers had made was untrue and it would seem to have been almost an idle thing to ask for an assurance that there was no foundation for the statements that had been made to the minister from the very man whose honesty was in question and unwise to have acted on the assurance; that an enquiry would undoubtedly have resulted in the discovery of the manner in which the \$100,000 had been raised and in the refusal of the treasury board to give the certificate.

Culpable Neglect. The petitioners say they have never imputed any intentional wrongful or default to the minister or department of finance. The minister and the treasury board were deceived and deceived by a plausible, unscrupulous, dishonest and dangerous pirate, who was at the time of his application in debt and had no personal credit and who was not entitled to a certificate. "The whole case," they say, "has been rested upon the culpable neglect and default of a department of government, because the government has, in the face of all this accumulation of evidence against the application, given an official government certificate which enabled this dangerous promoter to go into the country and establish bank branches and gather in the savings of the people and waste them in speculation."

The petition further points out that the certificate was given on Nov. 30, that the letter of Sir Edward Clouston, president Canadian Bankers' Association, is dated on the same day and that the certificate was not acted upon and the bank was not opened till the following 2nd of January.

Criticism Finding. A portion of the petition criticizes the finding and report of Sir William Meredith. The commissioner stated that notwithstanding the irregularities in connection with the application for the certificate, "the evidence satisfies me that if the bank had been properly established by an honest manager there is no reason why it should not have succeeded. The promissory notes that had been given by subscribers were for the most part paid, and it is true that the certificate of the treasury board had not been granted the money of the shareholders and depositors would not have been lost. The efficient cause of that loss was the recklessness and fraud of those interested with the management of the bank and not the granting of the certificate."

This, the petitioners say, is erroneous in law and fact. It is a violation of the report and the facts reported therein: 1. That the provisional directors sold the charter to Travers; 2. That Travers disregarded and mocked at the provisions of the Bank Act; 3. That the application made by him for the certificate was false, deceitful and fraudulent; 4. That he continued to make false monthly returns and squandered the money; 5. That he concealed the criminal mismanagement until the appalling state of affairs was disclosed by the

THE LAST WORD IN PHOTOGRAPHY You are invited to our Studio to inspect what we believe to be examples of photographic portraiture excelling in artistic value anything before shown in Canada. We have recently added to our equipment lenses which produce portraits free from sharp contrasts and outlines, but retaining in an artistic, subtle way the exact likeness of the subject. These portraits have the effect of a well-executed painting. This is a form of portrait-photography which is deservedly popular, because it not only produces a faithful likeness, but has excellent art value and interest. We would appreciate the opportunity of showing you samples of portraits produced by this means under varying conditions. The Curtis Studio, 107 Avenue Road, Toronto.
