**INFLAMED GUMS—CAUSE OF LOOSE TEETH**  
Pyorrhea is undoubtedly a vital danger to both gums and teeth. Tender gums indicate it, and with it come loosening teeth. Imperceptibly, at first, the gums recede from the normal gum line. They inflame. They present many tiny openings for millions of bacteria to attack the uncleaned tooth base. Tooth-base decay quickly follows. Even if the cavity be filled and the tooth saved, the gums continue to recede. Remember, too, that inflamed and bleeding gums act as so many doorways for disease germs to enter the system—infecting joints or tonsils—or causing other ailments.  
Against this Pyorrhea (Riggs' Disease) ordinary tooth-pastes are powerless. Yet Pyorrhea attacks four out of five people who are over forty, and many under this age. But Forhan's—  
—if used in time and used consistently—positively prevents Pyorrhea. It is a scientific tooth cleanser as well. Brush your teeth with it. See how promptly bleeding or gum tenderness ceases and how your teeth are kept white and clean.  
If gum-shrinkage has already set in, start using Forhan's and consult a dentist immediately for special treatment.  
35c and 60c. tubes. All Druggists.

It's getting so now that if you step into a soft drink store and lay down a five cent piece the clerk involuntarily heads for the "B" Brand container.
