Tweet has being existed a public demand for an effective purgative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to neet that demand, and an extensive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all pills—one which should have mone of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortunate for the patient hitherto that almost every purgative indiction is actimonious and uritating to the bowels. This is not. Many of them produce so much griping pain and revulsion in the system as 50 more than counterbalance the good to be derired from them. These pills produce no ireitation or pain, unless it arise from a previously existing obstruction of derangement in the bowels. Being purely vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are given on the bex. Among the complaints which have been speedily cured by tean, we may mention Liver Complaint, in its various forms of Jamdice, Indigestion, Languor and Loss of Appetite, Listlessness, Pritability, Bilious Headache, Bilious Fever, Fever and Ague, Pain in the Side and Loins; for, in truth, all these are but the consequence of diseased action in the liver. As an aperient, they afford prompt and sure relief in Gestreness, Piles, Colic, Dysentery, Humers, Scroftia and Scurry, Colds with seriences of the body. Uters and impurity of the blood; in short, an and every constructions in the spring of the year, to purify the bleen and prepare the system for the change of seasons.

C. A. Davis, M. D. Sup't and Surgeon of the United States Marine Hospital, at Chelsen, Mass.

Did space permit we could give many hundred such-names, from all parts where the Fills have been used, but evidence even more convincing than the certificates of these entinent public men is shown in their effects upon trial.

These Pills, the result of Josq investigation and study, are offered at the public as the best and must complete which the present state of medical acience can afford. They are compounded not of the drugs themselves, but of the insdictal virture only of Vegetable remedies, extracted by chomical process, in a state of purify and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in the Cherry Pectoral and Pills both, to produce a more efficient remedy than had lattherto boson obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or lessed actinomics and injurious qualities; by this, each individual virtue only that is desired for the curative effect is present. All the inert and obmoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effect rhendl prove as they have applied the accurate Parishal, and the Fills a surer, more powerful antidute to disease than any other medicine known to the world body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be promptly forwarded by mail to his address.

Of all the Patent Medicines that are offered, how few outfelts th

few world-be taken if their eemposition was known; I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject, freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many emment Flysicians have declared the same thing of my Fills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the bloed and stimulate it into healthy action—remove the obstructions of the storach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting wherever they exist such derangements as are the first origin of disease.

Being sugar wrapped they are pleasant to take, and being purely vegetable, no harm can arise from their use in any quantity.

For minute directions, see the wrapper on the Box.
