NOTABLE SHIPBUILDER COMING TO VICTORIA

Was Engaged by Largest Firms in the World-Sketch of His Career.

Within eight or nine days, R. L. Newman, of New York, is expected to arrive and take up his residence in this city. Mr. Newman has been one of the most prominent naval architects and consulting engineers in the United States and Great Britain. He is about to change his field of activities from the of \$1,000,000, divided into 1,000,000 east to the west for the reason that he shares of \$1 each; to purchase, take on believes that the Pacific slope will short- lease, or in exchange, hire or otherwise iy offer the greatest field for business the world, and he is coming to Vic- face rights thereof) lands bearing toria for the reason that he admires this city for a residential location, and because he has been induced to come by the Victoria Machinery Depot, for which been incorporated with a capital of \$10,concern he will act as consulting engineer. Almost as soon as he arrives his to take over the fish business of Jervis expert counsel will be sought on a & Co., now carried on at Nanaimo, B. C., couple of important undertakings which and all the property, goodwill, stock in the local company have on hand.

Mr. Newman was in Victoria a month

or two ago visiting at the home of C.

J. V. Spratt, one of the managers of
the Victoria Machinery Depot, and while
here expressed his determination to retion connected with or pertaining to the
said business.

The Northern Gold Mines Company,
Limited, Non-Personal Liability, has
been incorporated with a capital of \$1,turn to the city as soon as business arrangements would permit. That the Machinery Depot should be successful in managing, developing, working and sellsecuring so competent and reputable a man as consulting engineer is just cause

A sketch of Mr. Newman's career has been published from time to time in the big papers of the East. He joined the Savings Company is authorized and firm of Messrs. John Penn & Sons, engineers, Greenwich, London, England, in 1881, and during his engagement with them continued studying at the Birkwick institute and King's college, London. Four years were spent with the firm, during which time be worked. firm, during which time he worked on some of the best marine machinery de-yeloped up to that date, namely, the Italian cruisers Italia and Lepanto, of 18,000 indicated horse-power. These vessels were fitted with 26 boilers. Half of bia extends. The head office of the comthis battery was of the marine loco type, about the first large installation of the about the first large installation of the design ever used. For the pressure and conditions then obtaining, they proved eminently satisfactory. During the same period the machinery for H.M.S. Sphinx, which included the only compound oscillating engines ever fitted then, were designed, as was also that for the then fastest stemphoat in the world, the fastest steamboat in the world, the Mary Beatrice, which plied between Folkstone and Bolonge (this boat on trial attained a speed of 23 knots), and many others, including vessels for the Russian, Italian, Peruvian and Brazilian navies. Two of the best known of the latter are the Blanco and Enclado and Almiranti Cochrane, which were in the late war between Chile and Brazil.

From London Mr. Newman went to the Earl's Shipbuilding Company, of Hull, England, and became its chief draftsman. During his stay there H. M. 10 a. m. S. Narcissus, Magpie, Red Pole and Red Breast, also the gunboats Blanche and were designed and constructed and H. M. S. Malabar and Immortalite were re-engined. In addition to these the firm built quite a large number of seagoing tramps, the major number of which were for the Wilson line, sailing There was a good attendance, and which were for the wison inc, same, out of Hull, namely, the Colorado, it was decided to hold regular sessions Rosario and Frankfort, and many fishing and passenger steamers. .

From Hull Mr. Newman went back to London as the leading draftsman with district, so that strong representations Messrs. Maudsley Sons & Field, who may be made to the proper authorities to had just closed a ten-year contract with have desired improvements carried out. the Italian and Spanish governments to Among the subjects dealt with last night furnish designs for them for their new were the extension of the sewerage sysnaval programmes, Mr. Newman remained with those people for about four years, and developed the designs for the machinery of H. M. S. Blake, Thesius, Centaur and many others. Some of the warships built for Spain during this warships built for Spain during this warships built for Spain during this warships built for Spain during the months and the severage of the reservation of the reservation of the reservation of the sewerage system, and repairs to roads and sidewalks. Prof. Conway McMillan, of the Minnesota University, who returned with a In addition to what appeared in the Times Friday, last week's Provincial party of 20 students from the Port Renfrew hotanical station vesterday, says Gazette contains the following announcetheir visit to the West Coast was both The Standard Oil Company of British Columbia, Limited, Non-Personal Liabil-time was spent in holiday making, practime was spent in holiday making, prac-tically the whole six weeks being taken up in study. "We don't come to the Pa-cific Coast every, year on a pleasure trip," explained Prof. McMillan yester-day. "The institution is operated directacquire (either with or without the surly in connection with the university, and petroleum and other mineral oils and those who come to British Colum come for a purpose. We are up at 5 o'clock most mornings in order to catch the tide out, when our investigations of the character of marine life can best be pursued. Following this laboratory

work and several lectures." This year the studies embraced sev eral subjects that had not previously been taken up on this station. On this account there were no less than five in-structors in attendance, each of whom is a specialist in some particular line. Prof. McMillan acted as director, and assisting him were Dr. Hall, a prominent eastern educationalist, who taught geo-logy; J. P. Munson, of the Ellensburg Normal College, taking up zoology; Dr. Albert Snider, who took up bacteriology, and Dr. C. E. Bessie, of the University of Nebraska. The latter conducted a

One of the most important of the new subjects studied, the professor said, was geology. There was an exceedingly enthusiastic class on this, and Prof. Mc-Millan states that there was not a minproperty within reasonable distance Port Renfrew that was not carefully inspected. These students also set out one day and climbed to the top of per cent. Mount Edinburgh, no ordinary feat when it is considered that included in the party were a number of women. is a performance," laughingly remarked the professor, "that appailed me, al-though the scenic reward granted those who reached the top was no doubt

Prof. McMillan is particularly imessed with the marvellous supply of fine timber to be found on Vancouver Island, and expressed surprise that so little effort apparently was being made to exploit these resources. In his opinion there was sufficient to supply the forms of tender and contract may be seen on and after August 22nd at the office of a shame to see so much of this valuable timber rotting away, and he looked forward to the time when the residents of British Columbia would realize the magnificent opportunities right at hand. under the Assessment Act, in accordance with section 101 of the Assessment Act, "It isn't possible," he added, "for a country with the wonderful resources in mineral and timber of this Island to be

> be the beginning of a new era." In conclusion, Prof. McMillan stated that next year there would be a much larger party of students from eastern ersities. Owing to the exposition at St. Louis some difficulty had been experienced this spring in securing stu-dents willing to spend the best part of the summer in the west. The Portland exhibition to be held next year would naturally have a tendency to attract at-tention to the Pacific Coast, and he expected to bring out an exceptionally

large party. As mentioned yesterday, Prof. Mc-Millan and party have left for the Sound en route east. A number of the students in charge of Dr. Hall, the geology instructor, are making the trip east by the different points in the Selkirks and Rocky Mountains for the purpose of inspecting various mining properties.

IMPORTED FRUIT SEIZED.

Provincial Inspector Found San Jose Scale and Codling Moth at Rossland

"Infected fruit from Washington or chards was discovered in Rossland on Monday by Thomas Cunningham, provincial inspector of fruit pests," says the Rossland Miner. "Mr. Cunningham came into the city from Nelson, where he had attended the Fruit Growers' As sociation convention, and proceeded to examine the fruit offered for sale in the city. He quickly found several lots infected with San Jose scale and codling moth. Had the inspection regulations been complied with the fruit would never have reached the market, but laxity has been manifested lately through the ill-

ness of the official charged with the and it will be destroyed. Hereafter the inspection will be vigorous, and the public will get the benefit in the shape of perfect fruit. In addition, the danger of the spread of these dangerous fruit pests will be obviated, as the regulations provide that condemned fruit must be returned at the shippers' expense or de-

with the shipper. "Mr. Cunningham will visit this sec siderations lumped with theirs," and it times. Mr. Townsend formerly officiated in a similar capacity.
"Discussing the question of fruit cul-

ture here and the unusually desirable climatic conditions as compared with the The province has much to offer in the shape of guarantees to settlers who elect to go in for fruit raising. In the

first place the law says that vendors of fruit trees in British Columbia must deposit with the government a bond of \$2,000 guaranteeing all stock sold to be exactly as represented in variety, etc. Then the inspection of incoming fruit has a double measure of protection for prov-incial fruit raisers. It prevents diseased fruit entering the country and spreading to local trees, and in addition compels shippers from the south to send in clean, healthy fruit, thereby preventing them from flooding the market with diseased products at a low price. Further, the public has an assurance that fruit pass g the inspection is clean and perfectly fit for food, so far as pest's are concerned "San Jose scale is one of the commonents pests we encounter in inspecting fruit. The codling moth is also common in apples and pears, while the peach borer is common in imported peaches.'

CURATIVE POWERS OF DR. AG-

LABOR CARNIVAL

A FINE PROGRAMME IS BEING ARRANGED

A Splendid List of Attractions Has Been Drafted - Committee Meeting Tuesday.

As a result of the energy and enthusi asm displayed by the committees i charge of the preparations for the forth coming Labor Day celebration, every thing points to one of the greatest suc cesses ever achieved by the local trades unions. There are still a couple of weeks before Labor Day, but so little time was lost that already a splendid programme has been drafted for the occasion. It represents the greatest The Alaska Packers' Association has care, the endeavor being to provide nnounced the prices on Puget Sound ample entertainment for the whole day, sockeyes and the Alaska pack with the exception of reds. The market opens in too much and thus tiring instead of pleasing visitors.

Appended is a complete programme of

Parade of united unions, starting at 11.15 o'clock from Labor hall, and passing through the principal streets of the city. Luncheon at 12.30 o'clock, when about 200 guests will be entertained by local Trades and Labor Council.

Sports at the Caledonia grounds, ncing at 1.30 o'clock and continuing al

thoroughfares from 7 until 9 o'clock in th Grand union muster at Institute hall, th chair to be taken at 8 o'clock, and ad

Before the start of the parade, which ly after II o'clock, the reception com nittee will meet the different excursions from Vancouver, Nanaimo and other points. Members of the visiting unions will be tendered a hearty welcome, and will be immediately escorted to Labor hall. Here they will be allowed the free

dresses delivered by prominent labor lead

fore being required to take their positions in the procession.

Luncheon will be served after the par ade, and at a meeting of the general reception committee held last evening, i the topography and other conditions per-taining to the country. The erection of the monuments with the started next sum-legislature, the Mayor and members of the international survey and in charge of the field party now in this vicinity, was in Rossland recently. The summer work in Rossland recently. The summer work was started at Port Hill, and the party | Labor Council, the officers and member worked west to Waneta. The survey will be continued west to Cascade, from where an American party will take up visiting unions and the president and

It was practically decided last evening Wilby, E. Gilligan, E. Kermode and J. Carmichael. Badges will be supplied to all those invited. Up to the present the final report of

the sports committee has not been re-ceived, but is expected to be submitted The old St. Andrew's and Caledonia Society, of Victoria, through lack of interest, went out of existence, and the Scotsmen sub-committees. It is not likely, however, that the programme published in sidering the question of organizing a St.

Andrew's Society. Recently several meetings were held, and a constitution and bylaws draws up. At the last meeting the matter took a practical shape and officers tion to arrange a track on the grounds

As a wind-up of the celebration mem-

bers of the reception committee and local unions will be gathered at the wharves and E. & N. depot to give the visitors from Vancouver, New Westminster and Nanaimo a fitting send off.
