

Civil, Chemical, Electrical,
 Mechanical and other Engineers will find our
 modern Army professionally exciting, remun-
 eratively attractive and generous as to pension
 benefits. The Army has kept pace with the
 rapidly changing times. It is preparing for
 the future . . . a time when its eyes will be
 radar and infra red equipment; its punch -
 guided missiles; its mode of transport and
 supply - helicopters and air trucks. The design
 testing, maintenance and operation of this
 new equipment offers a real challenge
 to young engineers.
