SENATE MUST KILL NAVAL BILL

Ottawa Tory Organ Condemns Its Party for Gag Tactics

SEES TROUBLE AHEAD

Says Passing of Closure Will Be a Peril to Canada—London Press Deplores the Attempt to Force \$35,000,000 from the People of Canada by Such Means.

London, Eng., April 10.—London papers are handling the Canadian situation with caution and reserve. The Times, while printing two columns from its Tory correspondent, strongly taking the government's side, makes no editorial comment.

The Pall Mall Gazette treats the debate as the principal item of the day's news, describing as the greatest party struggle in the history of the dominion and depicting that a great party conflict should have come on an issue so important to imperial interests.

The Daily News says editorially:—"It is hardly a pleasant anxiety for the promotion of imperial unity that the first result of the proposed contribution is to provoke a domestic crisis of the most acute description. It is clear that the more is discussed the more the advantages of Laurier's alternative are approved in Canada. It avoids the constitutional problem both here and in the dominions. It plan weakens the already important control of the British Parliament over armaments and withdraws from Canadian hands the management of their own ships."

"Obviously, there is no element of permanence here, but rather an ample warning of these future opportunities for friction which all wise statesmanship seeks to avoid."

Canadian Comment.

Toronto, April 10.—Commenting on yesterday's proceedings in the House of Commons, the Globe says:

"There is no longer a pretense of fair play in the parliament of Canada. That the revered child of the Liberal party, a statesman of world-wide reputation, whose parliamentary methods have always been most courteous and considerate should be allowed down in the country by a mob of opponents after the speaker had signified that he had the floor, is a black, ugly stain upon every man who took part in the infamous affair."

From Premier-Borden town."

Senate Must Kill Naval Bill.

Ottawa, April 10.—The Ottawa (Conf.) says:

"If the naval bill is put through by closed methods, with the Liberals fighting the battle of free speech and minority rights the principal effect it will have will be to force the senate new recruits for existence and for exercising the veto power for which it was originally intended."

"The closure means a dangerous revolution in Canadian parliamentary methods. It is a perilous step, and it is to be regretted that it is being taken by a party which is clearly approaching a twilight. It might develop into a tool which, in the hands of a less scrupulous principal effect it will have will be to force the senate new recruits for existence and for exercising the veto power for which it was originally intended."

I have in my possession a prescription for nervous debility, lack of vigor, weak manhood, falling memory and lame back, brought on by excesses, unnatural strain, and the follies of youth that has cured so many worn and nervous men in their own homes—without any aid or help or medicine—that I think every man who reads this paper should have a copy. So I have determined to send a copy of the prescription free of charge, in a plain envelope, sealed envelope, to any man who will write me for it.

This prescription comes from a physician who has made a special study of men and I am convinced it is the surest and best remedy for the cure of debility and manhood.

I think I owe it to every man to send him a copy in confidence that he can have it free.

Send man anywhere who is weak and tired, and with repeated failures may stop, and send a copy of the prescription free of charge, in a plain envelope, sealed envelope, to any man who will write me for it.

NOTICE TO MARINERS.

Str. Chignecto (Ger), reports April 1, at 40.28 N, 101.03 W, saw a red buoy marked with many in this gulf and province owing to the probable effect on market conditions. Producers, manufacturers, shippers and shippers will find their interest affected to a great or less extent. The general impression among the business men of the city seems to be that the opening up of larger markets will be of great advantage to this province and will add materially to the prosperity of the people as a whole. Some of the views follow:

John E. Moore—"Placing lumber on the free list would be a great boon to the maritime provinces. Under present market conditions the American market can take all the lumber which will be shipped from here without any material decrease in price and as a result the shippers from here will be able to save the cost of duty on the lumber. The fact that lumber products are also brought in the free list would be a great benefit to the mill owners and workmen of this province."

Speaking of the effect of the reduction of duty on the lumber, Mr. Moore said: "If the reduction was sufficient to enable Canadian lumber to enter the states, as it appeared to be, it would prove a tremendous stimulus to the business which has been excluded from the American market by the heavy duty on the McKinley tariff."

P. C. Battley, Stetson, Cutler & Co.:—"It is doubtful whether the reduction of the duty on lime will be sufficient to enable the New Brunswick product to enter the states, as it appeared to be, it would prove a tremendous stimulus to the business which has been excluded from the American market by the heavy duty on the McKinley tariff."

Edwin Peters, of C. H. Peters Sons, Ltd.:—"It is difficult to tell how the lime trade will be affected by the proposed reduction in the duty should be a long step towards relieving the American business. One feature of the business we are active in, namely, the lime trade, is that of handling the lime from Rockland, Me., where a cheap system of transportation by barge to the larger markets is employed."

J. A. Clements—"It would be difficult to over-estimate the value of the American tariff reductions to the agricultural interests of this province. Placing potatoes on the free list will greatly encourage their production as it will afford a market of sufficient size for all that can be raised. The reduction of duty on other farm products will also enable the New Brunswick farmers to take advantage of the tariff."
