British Columbia and Pacific Coast.

The lights shown from the gas buoys at Roberts Bank, Vancouver rock, Hodgson reefs and Browning entrance, Vancouver, have been made white instead of red, in contravention of the general rule to show red lights from starboard buoys, in order that their range of visibility may be as great as possible. Notwithstanding the color of the lights, these buoys remain starboard or red buoys and must be so treated.

With reference to the recent statement that the Robert Dollar Steamship Co. was arranging to transfer two of its vessels from the U.S. to the Canadian register, Robert Dollar is reported to have stated, July 8, on his return to San Francisco from Vancouver, B.C., that he went to the latter place with the intention of making the transfer of the steamships M. S. Dollar and Robert Dollar, but found out when there that a sale would be more profitable. He stated that the s.s. M. S. Dollar had been sold to Birkhall and Co., Shanghai, China, and that negotiations were then progressing for the sale of the s.s. Robert Dollar. He is reported to have stated that he had come to the conclusion that the new U.S. regulations made it impossible for the profitable operation of U.S. vessels in any other than the coasting trade.

Vessel Losses During the War.

A record of merchant vessels of all classes destroyed from Aug. 1, 1914, to June 30, 1915, compiled by the Journal of Commerce, Liverpool, shows a total of 511, with a gross tonnage of 915,547 (approximate). Naturally the greatest proportion of the total loss has fallen on Great Britain. This amounts to 170 steamships of 577,986 gross tons, and 157 trawlers, smacks and sailing vessels, of 31,948 tons, a total of 327 vessels of 609,934 tons. Other vessels owned by the allied nations destroyed during the same period are: France, 24 vessels of 42,233 tons; Russia, 17 vessels of 16,024 tons, and Italy, 2 vessels of 3,826 tons. Of the enemies' vessels 34 German vessels of approximately 102,062 tons, 4 Austrian vessels of 5,691 tons, and 9 Turkish vessels have been destroyed. These figures are only of vessels actually destroyed, and do not include the numbers and tonnage of vessels which have been interned in neutral countries, of which the greater number are German. Taking the last figures available of the total merchant tonnage of the various countries of the World, the loss of tonnage by Great Britain shows approximately $4\frac{1}{2}\%$, and of Germany approximately 3%.

Ships for transportation of war supplies. A memorandum issued in Ottawa, July 6, Senator Lougheed, acting Minister of Militia, respecting orders for war materials placed in Canada by the allied Governments, Contained the following paragraph: "In February last representations were placed before the Admiralty as to the inadequacy of transportation facilities across the Atlantic, as that condition prevented our producers and manufacturers from availing themselves of opportunities which might otherwise be open. As a result of these ef-18 ships were detailed by the Admiralty for the purpose of transporting across the Atlantic supplies purchased in Canada for the British and allied Governments."

The Marine Department has issued lists of all lights and fog signals on the Atlantic coast of the Dominion, including the Gulf of St. Lawrence River to Montreal, and also on the Pacific coast, corrected to Apr. 1.

Car Ferry on Lake Ontario for Niagara, St. Catharines and Toronto Railway.

The N., St. C. and T. R., a subsidiary of the Canadian Northern Ry., applied to the Board of Railway Commissioners, July 16, for an order providing for the transfer of traffic between the Toronto Harbor Commissioners' dock at the mouth of the Don River, as diverted, and the Canadian Northern yards at Chery St. A. Lewis, Secretary of the Toronto Harbor Commission, stated that the actual agreement for the lease of the dock to the N. St. C. & T. R. had not been drawn up, but the parties had agreed to terms, the dock to be leased for five years, the commission reserving the right to take over the dock when three years of the lease have expired, in which case the commission would provide another dock. The N. St. C. & T. R.'s intention is to operate a car ferry steamship between its terminus at Port Dalhousie and Toronto, the switching of the cars between the dock at Toronto and the Canadian Northern's Cherry St. yards and vice versa to be done by the G.T.R. G. Ruel, Chief Solicitor, Canadian Northern Ry., who made the application to the Board, on behalf of the N. St. C. & T. R., stated that negotiations were under way for the purchase of a car ferry, with capacity for 16 or 17 freight cars, and that the service would be carried on until the completion of the N. St. C. & T. R., which it is proposed to extend to Toronto sometime in the future.

The Board ordered that plans of the dock and the connecting railway lines be filed, and that the G.T.R. and C.P.R. agree on a

tariff for the switching.

Mail Subsidies and Steamship Subventions Voted.

The following amounts for steamship services were voted at the Dominion Parliament's recent session:

All vessels must be marked with names .-Further precautions are being taken against the presence in Canadian waters of suspicious craft of any kind. A notice sent out by the Customs Department states that "complaint having been made that schooners and other small craft are sailing Canadian waters without being marked with their names and port of registry, as required by law, attention is directeed to the section of the Merchant Shipping Act which provides that the name of every British ship shall be marked on each of her bows and the name of her port of registry must be marked on her stern." Customs officers are instructed not to grant clearance to or allow to ply within the limits of any port any vessel not so marked.
