

or sharp! In the same strong sweet natural tones, well mixed
 how are you, ~~how are you~~ ^{I should have got but business} ~~how are you~~ ^{I was very well, I said we}
 had a picture of him in the room, he said it was not too bad for
 an old man was it, He repeated questions as to how I was feeling
 and said I would come you to this house. I told him how I was
 feeling and had been doing and asked him what he thought of
 the meetings, he said very good. He asked me how I was getting
 on with my surroundings, and said very well. But some-
 times I get tired, for example in, he said just 'bunch up'
 forget that you forget, and remember that you must re-
 member. He said well your brother and I have been
 giving you an examination - he said it might be your arteries
 it is not hardening of the arteries, he knows that, but
 forget that such a thing was ever suggested. Her suffering
 that you have in the joints is due to a climatic con-
 -dition. Now your brother and I have talked it all over,
 he thinks I am old fashioned, he has some never remaining
^{some things} ~~things~~ ^{into the stomach}, there is no need for medicines
 you know about taking soda, I said yes, he said bicarbonate
 of soda, it is done up in small packages. Just a small package
 in a tub of water, have the tub as hot as you can stand
 it, do this when you go to bed at night, it will take the
 poison out of the pores, do not rub yourself with a towel
 but just wrap a towel around you. If you have an old nightgown
 that you can put on, just get into bed without drying, rub
 on morning in the morning. The secret is in this wiping it
 off at night with the towel. You can keep the soda in
 small divisions, sit in the water as long as it is not
 have the water up to the hips. This is only a surface
 thing that is troubling you. You are in good condition
 first rate condition, we will go over an operation shop
 have no medicines inside, but outside. It is an old
 fashioned remedy. Your brother is more up to date. But we will
 agree on these things.
