

FOUNDATION OF ROADS is the subject now under most earnest investigation by Engineers throughout the World. Poor foundations and good surfaces are found everywhere—well, most lived roads. THERE IS NOT ONE FOUNDATION ON THE MARKET TODAY THAT PROPERLY SUPPORTS THE SURFACE. The steel rail and the wooden cross tie is always the same, but the highway is a different thing; different surfaces and different foundations are required for different services. We have these different foundations; they DO properly support the surface, and, IN OTHER WORDS, they give it to the surface that was never before even contemplated. The Nash Road, Borough of Brooklyn, N. Y. City, U.S.A.
