QUESTIONS AND ANSWERS. Miscellaneous.

SUCCESSION DUTY.

Supposing a farmer has property valued at over \$10,000, and wills it to his family, will the Government claim succession G. T. duties out of it?

Ans.-It depends on how much the property exceeds, in value ten thousand dollars. No estate is dutiable which does not exceed in aggregate value \$50,060, and the whole of which passes to, or for the use of, the father, mother, wife, child, daughter-in-law or son-in-law of the deceased. "Child" includes adopted as well as lawful children, and lineal descendants.

KING SYSTEM OF VENTILA-TION.

Seeing a piece in "The Farmer's Advocate" under the name of H. & H. A. Baird, Brant Co., Ont., in reference to the King system of ventilation: where could I get a catalogue of said system? Where is it made? SUBSCRIBER.

Ans.-The King system of ventilation is not patented, therefore not catalogued. It has often been described in this paper. In it, the air is admitted through apertures in the walls, near the ground, and conducted upwards to the ceiling in close boxes or pipes, and there discharged into the stable. The foul air is carried off by flues at the side or in the center of the stable, or both at the sides and in the center. The flues start near the floor so as to carry up the heavy carbonic acid gas, but they also have openings at the ceiling of the stable to admit the lighter gases and vapors. The opinings have registers that may be closed wholly or partially at will. The flues are carried to the peak of the barn, and there connected with a main shaft extending to the top of the cupola, where the foul air is discharged from a revolving cowl that turns from the wind, or else under a simple cap that serves to keep out rain and snow.

TENANT IN DEFAULT.

A rented a new farm to B for a term of three years, for the yearly rental of \$100 and taxes, the whole of the \$100 to be improvements made by B. B gave A chattel mortgage on three horses and four cows, a wagon, harness, etc., for security that he would perform the improvements as mentioned in the lease. A schedule described one of the horses, and not the other two, nor any of the other chattels. The chattel mortgage contained a blanket clause. B disposed of all the horses and got others in their places. He failed to perform the improvements, and A seized horses, harness, waron, etc., then in B's possession. A settlement was effected, and the same chattel mortgage renewed. B then disposed of the horses seized, and has old valueless animals in their place. He again failed to make the improvements.

1. Can A seize the horses sized a year ago, or must he take the two valueless nags in the place of the three? The one horse described in the schadule was sold by A to B, and to be paid for in bringing 25 acres under cultivation-8 acres per year the first two years, and 9 acres the third year. At the end of two years, no land is cleared?

2. What horses is A entitled to spize? 3. Can B continue possession of the farm for a third year under the lease? All of the caws have been disposed of (seized for taxes and store debt). The horses seized a year ago would satisfy, A's claim. The horses B now owns are not worth \$10 each. B lives on the farm, which has comfortable house and good barn, with basement stables, and about 40 acres cleared when he went on it. The balance of the hundred acres was bush pasture land. B has kept 8 cows on the farm each summer, and draws a milk route. Sells his cows in the fall, and does not cultivate the farm at all.

Ans.-1 and 2. Under the circumstances Stated. A could only seize the horses now owned by B, and upon the premises mentioned in the mortgage, making such Seizure by virtue of the "blanket clause" referred to.

3 Probably not, as the lease most likely contains a provision for reentry by A upon default by B in respect of the constaint on his part.

THE FARMER'S ADVOCATE.

It Tells at the Pa

Give the cows what they need and they will give you what you want. No mystery about it. We don't claim to balance the ration, but we do claim to improve digestion by supplying the animal with exactly what the noted medical colleges and authorities claim the animal needs to increase production. No one can doubt that all growth depends upon digestion—we know that only about fifty-five per cent. of the food of a healthy animal is digested.
What the average animal digests we don't know—but Dr. Hess Stock Food will make every cow, steer and hog digest the largest possible amount of food and convert it into profit. If we fed a cow or steer for the same purpose we feed ourselves, they perhaps would not need a tonic continuously. But we make it a business to overfeed

the steer, crowding him to an early market, and that's why they should have something to aid digestion.

the medicinal stock tonic and prescription of Dr. Hess (M.D., D.V.S.) is just what the overfed animal needs. It does not supply additional protein to make bone, musele, etc., but it does make the food of the farm produce the maximum amount of growth and milk production, besides curing and preventing stock diseases.

Professors Quitman, Winslow, and Finlay Dun, the most noted medical writers of the age, tell us that hitter tonics improve digestion, iron makes blood and the nitrates assist nature in expelling poisonous material from the system. These ingredients make up Dr. Hess Stock Foodmin't this pretty strong proof? But besides this every pound is sold on a written guarantee. 100 lbs. \$7.00 25 lb pail \$2.00

Smaller quantities at a slight Smaller quantities at a slight advance. Duty paid,
Where Dr. Hess Stock Food differs in particular is the dose—it's small and fed but twices day, which proves it has the most directive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic, and this paper is back of the guarantee.

Free from the lat to 10th of each menth—Dr. Hess (M.D., D.V.S.) will prescribe for your alling animals. You can have his 85 page Veterinary Book free any time for the asking. Mention this paper.
