#### THE SITUATION.

The German offensive has once more spent itself and the gallant French have fought the enemy to a standstill in counter-attacks. #### Will be Floated in October Next—Will be the Greatest Financial Effort Yet Recorded

By Courier Leased Wire. Ottawa, June 14.—Preparations by the finance department for well in advance, are being made the successful flotation in October next of Canada's next victory loan, which will probably be the greatest financial effort in the history of the Dominion. It is thought here that the amount asked for in the prospectus will be \$250,000,000, with a real ob-jective of \$500,000,000. No doubt is entertained as to the ability of Canada, even after four years of war, to raise this huge sum, but the effort will be a prodigious one backed by the most efficient organization which can be brought during the next four months. The money is need to meet the Dominion's growing military expenditures, and to furnish Canadian credits from which Great Britain may purchase Canada's production of munitions, airplanes, grain, meats, cheese, and other food stuffs and supplies. No other means exist whereby Canada's products may be purchased.

The minister of finance believes

in one great effort every year, in order that the business of the Dominion may not be disturbed by campaigns at intervals of four or six months. He is entirely confident that the coming victory loan will eclipse all former ef-forts both in the number of subscribers, and the aggregate their subscriptions.

v Courier Leased Wire. Paris, June 14.—In its summary of the expert opinion, the Havas Agency

notes the unanimity with which the commentators have abandoned their reserve of the past few days, and agree with M. Barres, of the Echo de Paris, in his opinion that the offensive against Paris is ended, for the present at least. They admit the possibility of its resumption sooner or later, and see further hard struggles ahead, but think it probable that the heavy fighting, when it is resumed within a few days, will be on another

The results of the offensive against Paris are enumerated by M. Barres

"A territorial gain absolutely out or proportion to the losses sustained. Compeigne still in French possession The Allied reserve manoeuvering forces intact."

In another article, The Echo de Mrs. Hamilton, Mrs. as the Germans did not get Compeigne, so they will never get to Paris. The enemy, it points out, has been mastered on ground of his own

choosing,
M. Clemenceau's organ, L'Homme Libre, expresses no surprise at the slackening of the bombardment, the enemy, it declares, has engaged eighty divisions since May 27, nearly half of which left fifty per cent. of their men on the battle ground. It expresses the opinion that General Ludendorff has a maximum of thirty reserve divisions, of which two-thirds have already taken part in the strug-

gle. The Havas correspondent at th ront says the indications are that the Germans have exhausted themselves on the Montdidier - Noyon front, which fact is compelling their inactivity, whereas the French are extremely active in this area. Regarding the German effort to get through Villers-Cotterets forest, he estimatethat the Germans used as many as five division (nearly 70,000 men) on a front of three and a quarter miles, and declares that this operation, which was to decide the issue of the present German offensive, has already tailed.
