MOVEMENT OF PEOPLE.

The Government realizes that the present movement in reference to Niagara power, is a movement of the people rather than the movement of any political party. For this reason it is well to discuss it among the people and to explain every step which has been taken! Politics should be removed from it entirely, and it should be made a great public question and a great public ublic question and a great public sue. It is of interest to everyone the Province, for the result will reate a sentiment which will apply to the administration of all of NEED OF PUBLIC-SPIRITEDNESS.

the natural resources of the country.

We have no coal fields. The question is, how shall we maintain our industrial superiority in the Dominion of Canada. This Province is dependent upon others for fuel. In spite of this we have to compete with the other provinces and the countries of the world for commercial and industrial supremacy. White Coal, as the Niagara Power is called, will be a great factor in this fight. That is, if it is properly managed, and not allowed to get into the hands of the milliomaires, as the coal in Pennsylvania is at the present time. There is great danger of the water-ways falling into the hands of the monopolist if the proper precaution is not taken. If this is not done, the rest will follow and the transportation facilities and the natural resources of the country will also fall a prey to monopoly.

** FEAR FOR GAS.

since the state of the counterform of pulpword. In this connection the following editorial, which appeared in the Toronto World on the same day, will be of interest:

"As the existence of a protective tariff in the Dominion has unquestionably compelled many United States manufactories to receive the control of the properties of the states manufactories to receive the properties of the states manufactories to receive the properties of the states are cannot be stated by a pulpword. At the present moment in United States paper companies are consuming 4,000,000 cords of pulpword year. It was not constructed to the present moment in United States paper companies are consuming 4,000,000 cords of pulpword year. It was not consumed to the present moment in United States paper companies are consuming 4,000,000 cords of pulpword year. It was not consumed to the present moment in the United States paper companies are consuming 4,000,000 cords of pulpword year. It was not consumed to the present moment in the United States paper companies are consumed to the present moment in the United States paper companies are consumed to the present moment in the United States paper companies are consumed to the present moment in the United States paper companies are consumed to the present moment in the United States paper companies are consumed to the present moment in the United States paper companies are consumed to the present due to the care taken to sapport the home industries and a sensible thom to compete on the most favorable terms in the paper mark kets of the ward. While little United States paper enters Canada, considerable quantities are exported to Britain, South Africa and Australia. "The Northern States that are conveniently statuted depend largely on Canadian approach of the prosition at least as regards their foreign trade. Under the present of the prosition at least as a regards their foreign trade. Under the present of the Board in extending to this present dependent of a least paper while and the present dependent

SHOULD SERVE THE PEOPLE.

SHOULD SERVE THE PEOPLE.
The Government of the day, call it what you will, may be short lived. It will be better if it is shorter lived than it has been in the past. There is much to be said of the independence of the old land parties. A man in public service should think not of himself, but of the people he serves. He should forget political allegiance and serve the people. He should forget all that pertains to partyism, and consider the people whom he represents. When he forgets to serve the people he should be turned out of office.

THE PILPWOOD QUESTION.

THE PULPWOOD QUESTION

minerals would be treated cheaply by electrical methods. The pulp areas and ore deposits should all be developed by the creat water powers of Ontario. Electric light would be made a commonity instead of a luxury. There are lamps now being made which will reduce the cost of electric light 70 per cent. The light which is now being given to Chathamites for eight to fourteen cents a kilowat hour could be supplied through Niagura Power for six cents per kilowat hour, and with the use of the before-mentioned lamps the cost would be reduced to two cents per kilowat hour.

per kilowat hour.

NEED OF PUBLIC-SPIRITEDNESS.

The men of to-day are thinking too much of themselves. They should think of the country and the future. They should look on what Ontario is destined to become. With cheap power such as can be supplied from Niagara, every small town could be made an industrial centre. One advantage would be that the power would be supplied to the small consumer at the same rate that it would be supplied to the large consumer Western Canada is more fortunate than-Ontario in that they have coal if Ontario is to maintain he supremacy as an manufacturing province, she must get cheap power Even in Winnipeg efforts are being made to get water power, with good chances of success. If Ontario does not keep up with the pace, the bit industrial interests will be going westward. The chief point to keep in view is that the power question must be so administered that ther will be no discrimination, and a hold-up.

A NEW STATEMENT.

A NEW STATEMENT.

Mr. Beck then made a statement which has up to the time that he made it last night, never been mad public. It was the reason why the Government does not develop the Niagara power. He said that ther were three companies developing morpower than can be used in the province. They at present export hat they produce. The Dominion Government has control of the exporting. What is desired is that they prohibit the export of this power if it is required in Ontario, and it is under stood that they are preparing to do this. It they do, the Speaker though they were deserving of support in this case at least. There are two reasons why the commission does no develop power at Niagara them selves. In the first place the tower ment created those rights enjoyed by companies at Niagara, and in the second place the Government can Mr. Beck then made a statem not, in all fairness, develop power at Niagara. These com rights have been created, and must in all fairness be respected.

A GOOD TENDER.

or President of the Board in extending to him such grazilous treatment, the problem of the Board in extending the him such grazilous treatment, and also think grazilous treatment, and the treatment of the Board bank grazilous treatment, and the compering the Board and also the concerning the Board and also concerning the Board and also concerning the Board and also concerning the was a great admirer of the mobilest of all ansimals, the suppose of the mobilest of all ansimals, the board of the pride which he fatt the mobilest of all ansimals, the spoke of the pride which he fatt there was great and all and the pride which he fatt there is a count of nine spoke of the pride which he fatt there is a count of nine who have all and the pride which he fatt there is a count of nine who have all and the pride which he fatt there is a count of nine who have all and the pride which he fatt there is a count of nine who have all and the pride which he fatt the spoke of the pride which he fatt there is a count of nine who have all and the pride which he fatt the pride which he fatt there is a count of nine who have all and the pride which he fatt the pride which was shown by the fatt the pride was planted the pride which was shown by the fatt the pride was planted the pride which was shown by the fatt the pride was planted the pride which was shown by the fatt the pride was planted the pride which was shown by the f

a great ovation.

At the conclusion of the speach,
M. Wilson moved a vote of thanks
to Mr. Beek, and John Piggott seconded it. This was carried unanim-

Some ask why we have the question before the public to-day. They say that it will not run away, and that there is lots of time. There is a danger, however, that it will fall into the hands of the few and not of the reary.

DO YOUR EARS RING!

When they buzz and seam slightly deaf, beware of catarrhal inflammation. This grows steadily worse, but can be sured by Catarrhozone. J. A. Hammill, of Greenmount, P. E. I., proved the merit of Catarrhozone and writes: "No one could have worse Catarrh than I had for years. It caused partial deafness, bad taste, upent my stomach, made me sick all over. Catarrhozone cleared my nostrile, stopped the cough and gave me a clear feeling in my breathing organs. I am shootutely cured." Doctors say nothing is better than Catarrhozone. Try it and you'll say so, too. Two sizes, 25c. and \$1.00, at all dealers. When they buzz and mean slightly

Most of our misfortunes are more supportable than the comment of our friends upon them.

The Northway Co., Limited The Northway Co., Limited Buy "Northway Made" COATS

There is no other garment in the Canadian market to-day that has such a reputation for STYLE, QUALITY, WORKMAN-SHIP and FIT as "NORTHWAY MADE" COATS.
