ENGLAND.

ENGLAND.

FEARFUL THUNDER-STORM AND DELUCE.—Two TROUSAND SREEP DROWNED.—The county of Worcester was visited during Saturday night and Sunday morning, by one of the most awful thunder-storms within the memory of man, followed by an enormous destruction of property. The storm was general throughout the counties of Worcester, Gloucester, and Hereford, though its violence concentrated itself over the county of Worcester, westward of the Severn. The rain poured down almost incessantly, and occasionally in a perfect waterspout, for nearly twelve hours, ancompanied by thunder and lightning. Upon the Teme and its tributary streams, the destruction of property has been most afficting. A great majority of the bridges upon those streams have been blown up, or are so for damaged that they will require rebuilding. The destruction of crops and live stock along the Teme valley has been immense. Large fields of beans were ewept away, and the whole hop-yards were destroyed. The number of sheep washed away in the parish of Powick alone is recknowed at two thousand. The real extent of the damage, however, cannot be accertained, until the waters have totally subsided. The whole of the sheep on the Ham were awept away. On Sunday, the carcases were seen lying about in all directions, where the water had partially subsided. They were chiefly lodged in the hedgen, and men were employed with boats sailing over the meadows and picking them up. Many of the carcases were sold at 2d, per lb. All the millers have suffered. In Henwick, two men were journeying from Worcester market, when they were rescued half dead with fright. It is feared that many lives have been sacrificed. A water spout a said the tower of the coach between Worcester and Birmingham ran away, and the coach came in collision with a wagon, whereby the conscheme was killed, and the nassencers injured.

away, and its occupant, a poor woman, drowned. The horses of the coach between Worcester and Birmingham ran away, and the coach came in collision with a wagon, whereby the coachman was killed, and the passengers injured.

The 50-gun screw-frigate Impereuse, built at Deptord dock yard, and the screw three-docker Windsor Castle, 140, built at Pembroke, will be launched on the 15th instant. The Impereuse, like the Windsor Castle, will be first ship of her class affost.

(From the New Brunswicker, of Sept 28, 1862.)

The Railway finally agreed upon.

Great News for the People!

We have this morning the most sincere and heartfelt satisfaction in announcing that the Railway negotiations, which have during the last week been pending between Mr. Jackson, M. P. and the Executive of the Province, were last evening brought to a happy termination. The substance of the agreement entered into, we are enabled to state, is as follows:

The European and N. A. Company abandons all claim to the ungranted lands heretofore secured to them under the Land

The European and N. A. Company
the ungranted lands heretofore secured to them under the Land
Facility Act of 1851, which Act is to be repealed.
Mr. Jackson is to receive from the company for building the
road from Shediac to St. John, £6,500 sterling, per mile, of
which the Province risks £1,900 sterling per mile, by subscription for stock, amounting to £250,000 in the whole, being
the sum provided for by the Money Facility Act of 1851; and
lease to the company in the sum of £1,800 sterling per mile in
addition, such lean bearing 6 per cent. interest in favour of
the Province, secured by a first mortgage on the whole road,
rolling stock, stations, &c., and to be advanced under proper
restrictions as the work progresses. ns as the work progresses.

the Province, secured by a first mortgage on the wastered. Tolling stock, stations, &c., and to be advanced under proper restrictions as the work progresses.

The contract embraces the entire road from Shediac and Nova Sootis boundary, via St. John to the State of Maine, being left open to future determination, the positive goats not having been yet surveyed or located.

The road, rolling stock, bridges, stations, and other equipments to be of the very first description, such as an English road, and of the character termed "a permanent road," and expalle of being travelled over at the greatest speed.

The agreement as made between Mr. Chandler and Mr. Jackson in England to be adhered to in all other respects, and to be extended to, and embraces Miramichi and Frederistes; the whole agreement to be subject to the approval of the Logislature. Such alterations to be made in the sol, of incorporation of the European and North American Railway Company as will carry out the above arrangements, and protect the interest of the Province.

We are happy to learn that Nova Scotis responds to these views, and it will depend upon the Legislature of New-Brasswick at an early day to settle the question, and destruine whether the great achievement, that these Provinces have so long desired, of bringing into closer union the vast continent of America with the Mother Country and Europe, uniting the millions of one with the millions of the other, developing the resources of the Colonies, binding them with stronger ties to each other and their parent land, and perfecting that system of rapid communication which has been so long dwelt upon, shall now be happily and definitely realized.

Canada has put forth her strength, and her railways will extend from Detroit to River Du Loup. New Brunswick will connect the United States, and perfecting that system of rapid communication which has been so long dwelt upon, shall now be happily and definitely realized.

We have reason to helieve that the Lieutenant Governor and Council have given th

CHINGSE EMPORANTS TO CALIFORNIA.—Since the 1st January, 5189, 29 vessles, conveying 7537. Chinese emigrants, have been despatched from Hong Kong, Marao, and Whampoa. On the 27th March the vessels yet to sail numbered 31, to convey 9270 passengers. This makes a total of gone and going of 16,807; and taking the average passage-money at forty dollars per head amounts to 672,280 dollars.

THE LATE FARTHQUAKE IN CUBA THE LATE FARTIIQUAKE IN CUBA.

We continue to receive accounts of the disastrous effects of the earthquake that St. Jago de Cuba, last amonth. Nearly all the churches were dreadfully shaken. One of the towers of the Cathedral was thrown down, and the church of Santa Anna was rent in four piess. At the barracks of St. Frances the earth opened with a fearful gap, and swallowed up a corperal and top soldiers. In the first quarter of city of St. Jago, one hundred and fifty houses were rained; in the second quarter eventy two were destroyed. In the direction of Limones, it was reported that a volcane had made an eruption. Rocks were rent asunder from the tops of mountains, and fell into the plains with a terrible power.—Boston paper.

HASZARD'S GAZETTE

TUESDAY, OCTOBER 12, 1852,

The Proprietor of this Paper, intending on the 1st January next, to make considerable improvements and alterations in his Establishment, again calls upon all persons indebted to him, to make immediate payment, so as to enable him to meet the very heavy expense which he will have to incur in carrying out his designs. He intends importing a Power Press, this Fall, and a quantity of new Type, which will greatly facilitate the labors of his Office, and enable him to devote more time and attention to the other Departments connected

time and attention to the other Departments connected with the business.

We have inserted in snother part of the paper the resolutions entered into by the Prince Edward Island Branch of the Associated Alumni of King's College, Windsor. It will be long, before we shall be enabled to give our youth a liberal education at home, however desirable it may be and however much we ought to strive for it, and as it becomes more and more necessary, that our children should be sufficiently educated in order to enable them both abroad and at home, to cope with these already possessed of such advantages, the next best thing we can do, is to secure for them a place where they may acquire the requisite knowledge, without being too far removed from home. Such a place is Windsor, the access to it is easy and inexpensive, and when there, the pupil is enabled to perfect the education, of which the rudiments have been faithfully instilled into him here. Prince Edward Island has already been made acquainted with the benefits to be derived from a residence in the Institution at Windsor; several of the youth educated in Charlottetown have graduated and borne off honors to their own credit and to that of the place, in which their education was begun, and of that where it was finished. Is it not fair then, that the Island should contribute to the funds of an Institution, which has been of much service, and which may be of still more, in training the youth of the Colony, in those branches of knowledge, ancient or modern, arred or profane, which are indispensably necessity in these times to their success in life? Many are of opinion that a collegiate education is of little or no service, rather a bar to advancement, than otherwise. Never was there a more sad mistake. Take a look over the institutions for learning in the neighbouring republic; see the immense number of well-educated men that are sent out, year by year, to every part of the habitable globe, and in every possible class of life, who not only acquire riches and knowledge, and

UNIVERSITY OF KING'S COLLEGE, WINDSOR, N. S.

AT a Meeting of the friends of the above Institution, held in the Colonial Building, on Monday, the 27th September, the Honorable Captain Swabey was requested to preside, and John Lawson, Esquire, to act as Secretary, when after prayer offered by the Reversed Dr. Jenkins, the following Resolutions were severally but and adopted:

sy the reverence Dr. Jenkins, the following Resolutions were severally put and adopted:

1.—Resolved, that an Association be now formed in aid of King's College, Windsor, to be called the Prince Edward Island Branch Association of the Alumni of King's College, Windsor, and that every person—without regard to religious denomination—paying annually the sum of Ten Shillings, Whites Courses.

JOHN LAWSON, Secretary. Charlottetown, 27th September, 1852.

Kino's College, Franchicton.—At a special Conversion, held at this University, on Wednesday, the 22d inst., the Rev. J. H. READ, late of St. John's College, Cambridge, having performed the exercises required by the statutes, was admitted to the Degree of Bachelor in Divinity.—The Church Wilness.

The Legislature of New Brunswick is summoned to meet on the Sist inst. for the despatch of business.

The Crapand Races will take place on Friday next, the 15th

QUEEN'S COUNTY CATTLE SHOW.

QUEEN'S COUNTY CATTLE SHOW.

As noticed in our last, this Show came off at Charlottetown on Wednesday the 20th ultimo. Thiry Cours and Fillers were brought to the ground to compete for the prizes, and presented a very creditable appearance. Upwards of one handred head of CATTLE were exhibited in competition for premiums, exclusive of extra Stock, amongst which we particularly remarked those sent by His Excellency Sir A. Banerman, namely, an imported Bull, 2 years old, of the Argus breed, and two Cows, of the same breed and age; also two Ayrshire Cows, of the same age. The Bull was a very fine animal, and much admired. The Bulls and Heifers of both the Durham and Ayrshire Breeds were much admired, and presented strong proof of the benefits arising from the several importations made by the Society, as well as by private individuals. The two year old Heifers shown by Mr. Thorn and Mr. Heath Haviland, and the year old Ayrshire Heifers of the Hon, G. Coles and T. H. Haviland, Esq., attracted particular the strength of the stren

The Show of Sheep was rather inferior to what we have

petition:
A very fine collection of Sows were shown, amongst them
two presented by His Royal Highness Prince Albert, to His
Excellency the Lieut. Governor.
A sale by auction of Stock was held on the ground in-A sale by auction of Stock was held on the ground immediately after the close of the show, at which several sales of Cattle were made at fair prices—a two year old Heifer, of a cross between the Durham and Aynhire, being knocked down for £15. Several Ram Lambs of Leleester breed were also sold at from £3 to £4 6s. a head. A much greater number of this description of Stock would-have been offered, we are informed, but for the fact that the flocks of the best breeders in this neighbourhood having been thinned by purchases recently made by gentlemen from some of the Agricultural Societies in Nova Scotia, at prices much lower than those realized as above mentioned. Perhaps it would be better if breeders were to retain such of their stock as they wish to dispose of until the day of the Show each year,

be better if breeders were to retain such of thair stock as they wish to dispose of until the day of the Show each year, when an attendance of buyers from the neighbouring Provinces might be looked for, and better results obtained.

At five o'clock, the business of the day being over, about fifty gentlemen, including the President and most of the Office-bearers of the Society, sat down to a dinner at Carrier Hotel—which was served in excellent style, and reflected great credit upon the Host and Hostess. On the removal of the cloth, and the customary toasts having been proposed and responded to, the Prizes were distributed by the President, when a discussion upon subjects connected with the agricultural interest assued.

PRINCE COUNTY CATTLE SHOW.

This Show was held at St. Eleanor's on Tuesday last, the Fifth instant. The early part of the day was unpleasantly wet, notwithstanding, a large number of persons were present from all parts of the County, and many from Charlottetown. The Stock, generally, offered in competition [for the Society's Premiums, was of a description much inferior to what we expected to have seen. The Filly, to which the first prize was awarded, was a large heavy animal of its age, and admirably adapted for farming purposes. The Ayrabire Bulls and Heifers gave ample evidence of the benefits derived by the importations of this breed, made by the Society. A remarkably fine Bull Calf, 44 months old, sent to the ground by Mr. John Adama, of Lot 16, pure Ayrabire Breed, being the produce of one of the imported Heiters, by the Society's Bull, imported in 1849, bids fair, if taken care of, to be a handsome and useful animal. We could not but remark the number of very fine Horses, for general purposes, to be seen on the ground, notwithstanding the recent large exports to the neighbouring Provinces. The Judges awarded premiums to the following persons—

Best Filly, for Agr. purposes, F. Henderson,

PLOUGHING MATCH. The Ploughing Match took place in a field of Mr. H. C. Broad, St. Eleanor's. Ten Ploughs started. The Prizes were awarded as follows were awarded as follows—
