pete with English tools with the cost of carriage added i—Monetary Times.

The Great Westman Rallway.—The Buffalo Engines is informed that the Great Western Bailway Company of Canada, finding difficulties in the proposed connection of their "Loop Line "with the Grand Trunk Railway, at Caruga, now contemplate extending the Loop Line to Niagara River at Blick Creek, and their making an independent crossing of the river, by beidges from the Canadian whore to Grand Island, to Tomwanda Island and to the extentions of the river at Tomwanda, where connection can be made with both the Eric and Courtar Railways. It is understood that anginesses are now engaged in making survers for carrying the proposed road across Grand Island at the point indicated. The Express notes that the Stock of the Great Western Railway has reached the pier point, and something over. For many years it was quoted at little more than 50 per cent, upon the amount paid, but during the last 4 years the rise has been steady and continued, and this gain in the value of the stock, and the appreciation in which its held by the commercial world, is in the face of the opposition which the Great Southern proposes to offer. It is not usual that railway stock is found to gain in public estimation under such directures tances, but in the case of the Western, has indicated the firmest confidence in the enterprise itself, as in the ballity of the staff under the Board of Directors.—Hamilton Times.

Directors.—Hamilton Times.

It is a rare thing to find a whole family of eleven children live to an old age, as is the case with a family who long ago came from Nova Scotia and settled in Niagara Township. The St. Catherines Times asys the family contains eleven children, the eldest of whom is now seventy years of age, and all are still living. The parents names were Gilbert and Elizabeth Andersor.

The travelling and freight-moving public will be pleased to know that the Board of Directors of the Michigan Central have decided to lay an additional-track between this city and Detroit, of the best steel rails. At the present time, there are eighty miles of double-laid, and the Board proposes to lay fifty miles of new track each year. This important decision has been brought about in consequence of the increase of freight which has taken place of late, and the fact that more has been ofered than could be handled by the present capacity of the road.—Chicago Journal.

A CRUEL DOUBLE MURDER.—The Guelph Mercewy contains an acc unt of the brutal murder of a former resident of that town, together with her little boy, at Kane, Penn, during the night of the 20th ult. The victum was formerly a Miss Farrell, daughter of Andrew Farrell, who still lives on the Waterloo Road, near Guelph; and the murderer was her husband, one Patrick Burns, who married her in Guelph. After leaving Guelph they settled in Hespeler for a time, where Burns kept tavern; they then moved to the Township of Normanby, from whence they eventually wandered off to the States. The murder appears to have been a most cold blooded affair, the unfortunate woman having been strangled and kicked to death, while the little boy's skull was crushed in by a blow from some blunt instrument. The murderer was arrested. On learning of the horrible affair, the brothers of the murderer was a strested. CRUEL DOUBLE MURDER. - The ment. The merdere was arrested. On learning of the horrible affair, the brothers of the murdered woman at one left Guelph for the scene of the tragedy, and the remains of the victims were taking the scene of the tragedy, and the remains of the victims were taking the scene of the tragedy, and the remains of the victims were taking the scene of the tragedy.

Two or three colds in succession will, with many constitutions, securely establish the seeds of consumption in the system, thus converting what was originally a simple, curable affection, into one generally fatal. Ordinary prudence the constitution of the constituti one to take care of a cold util it is got rid of. Fortunately 'Bryan's Pulmonic Waforn' are thoroughly adapted to remove specific all couries and colds and are equally effective in the primary state.
