How to Tell Diphtheria.
"I was called out of bed last midnight to go four miles in the country and attend what the messenger stated was a bad case of diphtheria. 'And you went?' 'Had to. When I arrived I found a ten-year-old girl crying with a sore throat. I looked into it, asked the girl a few questions and found that she had done a big washing that day. Had a little cold—nothing else.' 'How can you tell the difference?' 'I'll give you a rule by which you can always determine,' was the response. 'If the throat is red and smaller, no fear of diphtheria; but if it looks as though some one had thrown a handful of ashes into the throat—a dull gray color—look out. It's diphtheria, danger signal.'"

The oyster is described by the London Daily Telegraph as "a morsel that is suddenly swallowed, leaving the most adumbration of a flavor upon the palate, a faint aftermath of the may sea, such as might linger on the unfortunate lips from which some mermaid had snatched a passing kiss."

The terrific gale of Monday night did much injury to orchards, knocking the fruit from the trees. Hand-picked apples will be scarce in this section.

Most of you have heard the Irishman's description of good liquor. Said he, "Sure it's the stuff it's all in and drinkin' all at once; it cools ye in the summer time, an' it warms ye like a cotnamoor in the winter; but it must be the pure stuff, or ye'll lose yer head widout gettin' any av the benefit." We are glad to see the society again at work, and believe that under the management of the present executive committee its former credit and interest will be sustained.

AN ATTRACTIVE SHOW.—We had the pleasure on Wednesday of seeing the showy sign board just executed for W. H. Smith, of Clinton, by Harry Cleaves, the well-known Goderich artist. The painting is a caricature of Sir John A. Macdonald, depicting to Hon. Alex. Macdonald on Smith's motto as a caricature, the latter taking it in very attentively. The likeness of each of the political leaders is excellent, allowing for the exaggeration of a caricature, and as the faces are nearly double natural size, the board is sure to be attractive. Mr. Cleaves is extending his reputation as a fancy sign board painter, his cartoons being a big hit. He has several orders from outside points. His figure signs are a great improvement on the old style clumsy sign board. Mr. Cleaves has also on his easel a couple of steamboat pictures, representing the United Empire and the Ontario entering the St. Clair river by moonlight. As a marine artist, more especially as painter of lake steamers, Cleaves takes high rank.

UNHAPPY IRISH INQUIRY.—Kavanagh, Hanlon, Smith and other Irish inquirers in the Phoenix Park murder trial, who arrived at Melbourne, Australia, were not permitted to land, and have been reshipped to Europe.

Speaking of the "across" match between the junior clubs of Goderich and Kincairdine, the Reporter says—"The game was stubbornly contested for an hour, both sides exhibiting fine play, and was finally won by the Shamrocks."

The Kincairdine men were bigger than the Hurons, although they were pretty evenly matched on the field.

The editor's desk is brightened, and the editor's sanctum is made fragrant, by a beautiful bouquet of flowers sent by Mrs. C. A. Humber. We are fond of flowers, and like to have a well-scented bouquet at hand as we write. The ones before us, bright with dahlias, gladioli, petunias, zinnias, marigolds, etc., and redolent with the odor of the scented geranium, is calculated to inspire us with a still fuller love of the floral.

Jordan, the druggist, now illuminates his premises with gasoline. On Wednesday evening there was a grand display. There are twenty-two "napoleon" jets, and the light thrown is of a beautiful, clear white color. The work of putting in the gasoline machine and fittings was done by Jas. H. Byrne, of Toronto. The same gentleman has the contract for illuminating the North Street Methodist church.

Major D. Crane, who has been up in the Warton district for the past few weeks searching for the body of his brother, Walter, who was drowned on the Explorer, returned home on Tuesday evening without being successful in his mission. On Thursday morning, Mr. Albert Crane, of Chicago, father of the deceased, left Goderich for Warton to continue the search. The bereaved family have our sincere sympathy in their affliction.

The family of Mr. John McLay left Walkerton last week to take up their residence in Toronto. They were early settlers of the county, having come to it in 1858. For a number of years Mr. McLay and his family resided in the neighborhood of Kincairdine, where he published a newspaper previous to his appointment to the magistracy. For several years the office was in Southampton, but was removed to Walkerton when it was made county town in 1867.

In our last issue we stated that G. N. Davis on his recent visit to the old county met a former resident of Goderich—Thomas Yeo—in Plymouth. Those of our readers who were acquainted with Mr. Yeo during his residence in Goderich will remember that his front name is William not Thomas. At any rate, it was our old townsman that Mr. Davis met. He is keeping the South Western Hotel at Plymouth, and seems to have a warm corner in his heart for old Goderichites.

KICK THEM OUT.—An exchange—the following lively paragraph—The "week-covered" culture of this city who take out a fat living by imposing on the credulous at the various fairs throughout this district, should be taught a lesson this year. At every township exhibition last season, quite a number of these unfeeling contrivances for making money from the unsuspecting and the unwary were, to the great amusement of the public, in full blast during the holding of the agricultural shows. If the law lived up to these matters more fully than it seems to at present, these human parasites would be prevented from preying upon the youth of the land in emptying their pockets of money and in producing demoralizing effects on their minds.

KEEP THIS CLIPPING.—A disinfectant introduced to the medical profession by the late Dr. Godden has been used in London eight years. Half a drachm of nitrate of lead should be dissolved in one pint or more of boiling water, and two drachms of common salt in a bucket of water. Pour the two solutions together, and let the sediment subside. A cloth dipped in this and hung up in a room will sweeten a fetid atmosphere instantly, or the solution thrown down a drain or over a heap of rubbish will produce a like result. Clothing worn by a patient with infectious disease, or bed linen, can be put at once into this solution without injury to the material, this destroying the risk of infection for those persons who wear the clothing. Although a strong poison taken internally, it does not injure the skin. A room could be scrubbed with the solution, and would be sweetened at once by the process.
