THE LATE ECLIPSE.

We lately saw a full eclipse, the sun was hidden by the moon; we had to light our tallow dips, for darkness shrouded us at noon. The ignorant who stood around believed the day of doom was here; they looked for celestial signs and heard the summons, loud and clear, from the chickens sought the hay, in disgust the roosters grew, thought it was the shortest day

that mortal roosters ever knew. It was a spectacle sublime that much impressed all thoughtful lads, and it was pulled off right on time, in strict accordance with the ads. I stood amid a concourse great, and at my elbow was a gent who said, "No doubt we'll have to wait six hours to see the big event. I never yet have seen a show begin at the appointed hour; we have to wait nine hours or so, which makes the spirit sick and sour. I know there's something out of whack, and this eclipse will be delayed; the moon has surely jumped the track; the good old sun can't make the grade." But even as this prophet spoke, the darkness gathered at high noon, the sun applied its

four-wheel brake and took a rest behind the moon. The solar system runs on time, and noon means noon, and naught beside; would that this method most sublime were to our own affairs applied!

Nfld. Highlanders Dance, C.C. C. Hall, Prince's Orchestra, Wednesday, October 31st, Halloween Specials. Caterers: Ladies' Auxiliary. Tickets from W.O.'s, N.C. O's and Officers of Brigade.

For an attractive dessert serve diamond-shaped pieces of cinnamon-nut sweetened cup cake put together with sweetened whipped cream.

\$20.00 to \$45.00

Mixed Tweed & Plaid Sport Coats

with and without Fur collars.

\$17.50 to \$40.00

Steer Brothers

A Relic of the Anglo Saxon

AND HOW IT WAS FOUND—TRUTH STRANGER THAN FICTION.

(H. F. SHORTIS.)

About a week ago, I gave some details about the loss of the steamship Anglo-Saxon at Clam Cove, near Cape Race, in the year 1883, and described how the ship was last seen by Capt. Henry Snow and his crew of the sealing vessel Charles, which was returning from the seal fishery, after being driven to the Banks. I made special reference to the clock that was saved from the Anglo-Saxon, and which performed excellent work, and kept regular time for many years previous to and after I entered and worked in the Anglo-American Office in Harbour Grace.

The fact of my mentioning about the clock being saved and doing service, brought to the mind of Sergt. White of the Constabulary at Catalina a circumstance which will be perused with interest by the numerous readers of the Evening Telegram. This is only natural to suppose; because, the terrible disaster at Clam Cove is probably the greatest in the annals of our country, and very many of our people at home and abroad remember the circumstances very clearly—more especially the many hundreds who emigrated from our shores during the "poor times" of the sixties, even as many of our people are doing to-day. But Newfoundland has had many years of adversity as well as prosperity, and in our darkest hour our people did not despond—they rose to the occasion, and our old planters and fishermen prosecuted their noble calling with increased vigor and enterprise, and therefore surmounted all difficulties, and once more placed Newfoundland in the proud and honored position—as the first fishing country in the world.

The sixties of the past century were indeed dark days in our history, and the older generation can seldom refer to them without mentioning the terrible disaster of the steamship Anglo-Saxon. It is only when references are made to occurrences of the past that our people sharpen up their memory of historical events, which happened during their own life, or have been handed down by their forefathers or by tradition, and so it is that I am of the Anglo-Saxon, which will appear to them as a matter of fiction, but which are true in every particular.

My article on the Anglo-Saxon brought to the mind of Sergt. White the time that the late James H. Watson and his brother Ellis Watson were carrying on an extensive and successful business at Hant's Harbor, Trinity Bay, for the firm of Messrs. Job Bros. & Co., St. John's. The firm supplied largely each year, and amongst the number were several fishermen at Seal Cove (now New Chelsea), about three miles from Hant's Harbor. This would be about the year 1884. A man named Harris, a dealer of the Watson firm, was one day in August of the above year, fishing off Seal Cove, and succeeded in catching about three quintals of codfish, and upon his return from the fishing grounds, was dressing his fish in the stage. Amongst the number of fish was one very large one, the stomach (or puddle) in the vernacular was full of caplin. The "cut-throat" man cut open the "puddle" by accident, which is often done to the annoyance of the "splitter," as it causes extra work for him to clear away and in turning the contents of the "puddle" off the splitting table, Harris noticed something shining, and upon investigating he discovered that it was a ring. The cleaned and polished up the ring, and found that there were four letters engraved thereon (on the inside). Of course, as usual in the outposts, the news spread with the rapidity of the wireless of to-day. A few days afterwards, Harris went up to Hant's Harbor for a supply of salt, and brought the ring with him, and showed it to Mr. Watson, who viewed it carefully, and gave the man a pair of boots in exchange for it. Then it was that the general and general favorite, Mr. Jas. H. Watson (afterwards member of the House of Assembly), took the matter up, made inquiries of the owners of the Anglo-Saxon, and it was not long before he received a copy of the list of passengers, who were on the ill-fated ship. It was then ascertained to a certainty that a lady passenger, who was on the ship when she was lost, was the owner of the ring. Being fully convinced of the owner, Mr. Watson sent the ring to England, and the probability is that the historic bit of jewelry is still worn by some descendant of the owner, who interests his or her associates round the family or social circle in relating their edification the miraculous manner by which it was saved, by being twelve months encased in a codfish's "puddle" on the shores of Newfoundland.

It is very probable that our mutual friend, Hon. Robert Watson, Treasurer of the Savings Bank, has heard his father, or his uncle James relate the event more than once, and, if so, he must have been deeply interested, as no man I have ever known could re-

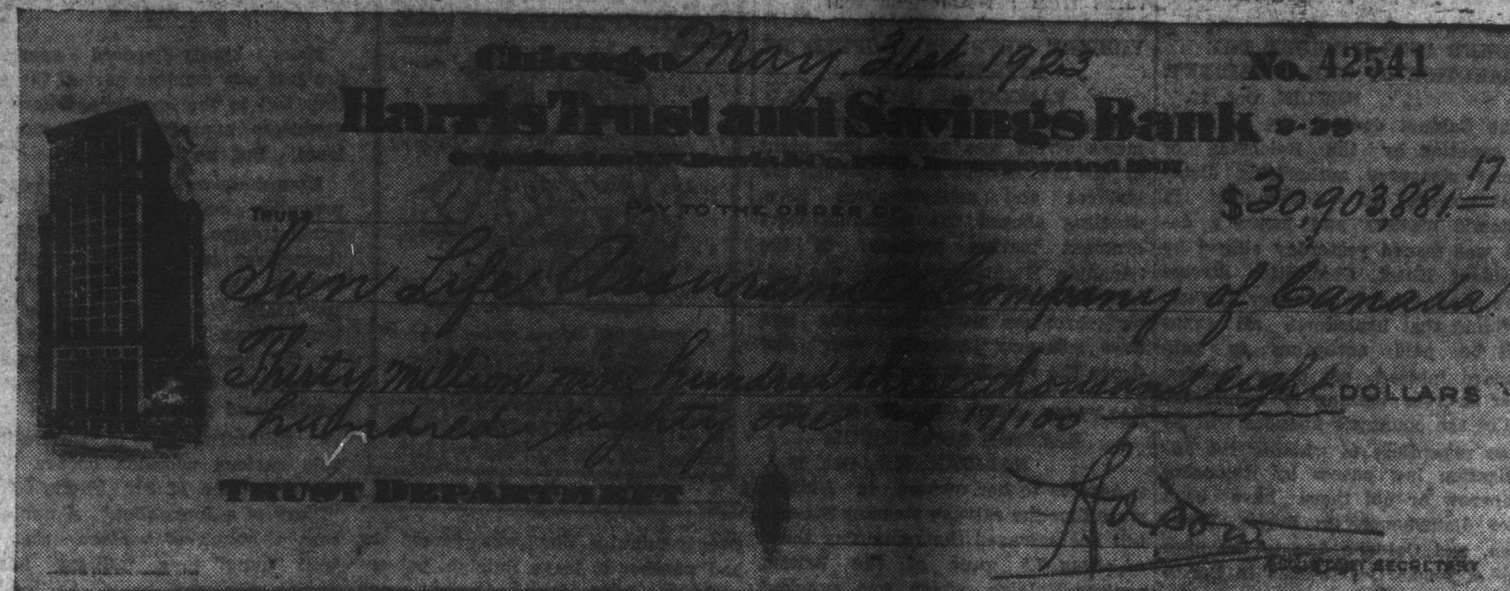

THE LARGEST CHEQUE IN THE WORLD.

FAC SIMILE OF THIRTY MILLION DOLLAR CHEQUE RECEIVED BY THE SUN LIFE FOR ITS HOLDINGS IN ILLINOIS TRACTION—A GIGANTIC SCOOP.

The attached is a photograph of what is probably the largest cheque ever made out. It is almost certainly the largest ever received by a Canadian corporation. It was paid to the Sun Life Assurance Co., of Canada for its Illinois Traction holdings, including the securities of fifty-seven public utility companies in Illinois, Iowa, Missouri, Nebraska and Kansas. The profit made by the Sun Life is understood to run into many millions.

The next largest cheque of which we have any record is one paid for the purchase of the Union-Castle Line of steamships. This was for \$5,000,000 or \$25,000,000.

The Sun Life Cheque has another value besides its mere size. Mr. Macaulay has always been able to keep the Sun Life before the public notice by his spectacular scoops, and has received so much more free advertising than any other company that the Sun is easily the best known life company in the Dominion and many other countries. It is also the leading international life insurance company of the world, and its wonderful reputation for solidity and fair dealing is one of the biggest assets which this country has here and overseas. (Canadian Ins. and Office and Field.)

The Sun Life Assurance Co., is represented in Newfoundland by Mr. D. Johnston, Mercantile Chambers, Water Street.

late a story or sing a song, with the gentlemanly and genial James H. Watson, and many a happy and interesting hour we spent together.

Girls! Lots of Beautiful Hair

35-CENT "DANDERINE" DOES WONDERS FOR LIFELESS, NEGLECTED HAIR.

A gleamy mass of luxuriant hair full of gloss, lustre and life shortly follows a genuine tonic of neglected scalp with dependable "Danderine."

Falling hair, itching scalp and the dandruff is corrected immediately. Thin, dry, wispy or fading hair is quickly invigorated, taking on new strength, color and youthful beauty. "Danderine" is delightful on the hair; a refreshing, stimulating tonic—not sticky or greasy! Any drug store.

Billions and Atoms

THINGS THE SCIENTISTS JUGGLE WITH.

While France and America say a billion is only 1,000,000,000 (a thousand million), the Germans, like ourselves, say it is 1,000,000,000,000 (a million millions). Taking it our way, it would take a watch which started ticking at the birth of Christ something like 10,800 years yet to tick it out.

You get at that this way. Take out your watch, and you will find that it ticks five times in two seconds. That means 150 times every minute, 9000 times an hour, 216,000 a day, it ticks a million times in 4 days 15 hours 6 minutes 40 seconds. At that rate it would take, roughly, 12,800 years to tick a billion times. A watch which began to tick at the very beginning of the Christian era would now have, in round figures, only 150,000,000,000 ticks behind it, and to accomplish its billion ticks it would still, as indicated, have steady work for something like 10,800 years in front of it.

But even a billion seems a comparatively small figure as scientists reckon things. At one of the last meetings of the British Association—where all the really big bugs among the high-brows gather to astonish each other with their learning—it was

stated, for instance, that, if the tiny particles known as atoms could enter an electric-light bulb at the rate of 1,000,000 a second, it would take 100,000,000 years for the bulb to take up sufficient to fill itself. Count the seconds in 100,000,000 years, then, and multiply by another "million," and you'll get an idea—perhaps—of the number of atoms even a tiny electric bulb will hold. And these are the things which scientists like Professor A. O. Runkle play with.

It is to these atoms, by the way, that we look for our continued existence. We cannot see them, but they are everywhere—in and through everything, ourselves included. Indeed, we, like everything else, are composed of them, and it is they which, by radiation, give us all our heat and energy.

Some people have been rather anxious for years lest the sun should peg out. It would, of course, be rather awkward if it did—much worse than when the candle went out and left Moses in the dark. But we, at least, need have no fear. Sir Ernest Rutherford, who has been getting flashes of light by splitting up atoms into what he calls alpha particles, assures us

UNDERWEAR SPECIALS!

This week-end we are offering some exceptional BARGAINS in UNDERWEAR.

Good Quality, Wool and Cotton Mixture.

Girls' Vests
In Natural and White.

Girls' Pants
In Natural and White.

"FREEZONE"

CORNS lift right off

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn or corn between the toes, and the callosities, without soreness or irritation.

"that the synthesis of helium need only take place slowly in order to maintain the present rate of radiation from the sun for periods of the order of 1,000,000,000 years."

And I suppose only one such period will be amply sufficient for most of us.

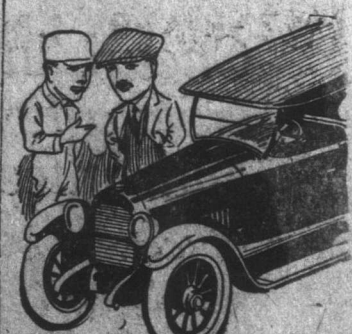

Sliced hard-boiled eggs, sections of oranges and halves of walnuts make a delicious salad. Serve with French dressing.

"A Mass of Sores—No Sleep—Unhappy Days"
Writes Mrs. Orange Harvey of Danville, Georgia: "I was bedridden with sores until the first of May. Then I got a bottle of D. D. D. AT ONCE MY FACE GOT BETTER. I used half a bottle only and have been entirely well ever since."

Why not use D. D. D. bottle will relieve your case of skin disease, too—on our guarantee that the first bottle will show results on your money back! Make sure you get the original. \$1.00 a bottle. Try D. D. D. Soap, too.

D. D. D.
The Lotion for Skin Disease
ALL DRUGGISTS.

MADE IN U.S.A. USED BY VETERINARIANS.

THAT LUSTROUS FACTORY FINISH
Is that what you most desire in your car? Do you want us to restore the finish of the body and top to its original glory? It will be done if you place the painting and finishing job in our hands. We'll leave the result to your critical judgment.

Lawrence Bros., Ltd.
