

Hot Weather On Mainland

Last Year's Highest Point Reached at Vancouver Yesterday.

Little of Interest Developed at Sitting of the Labor Commission.

U. S. Immigration Law Exposes Travelers to Very Much Inconvenience.

From Our Own Correspondent. Vancouver, June 8.—The thermometer stood at 88 in the shade today. This was the hottest point reached last summer.

Nothing of interest occurred in today's session of the U. B. R. E., the commission to the committee that the press were unfairly reporting the evidence, intimating they favored the C. P. R.

The charter of the U. B. R. E. was brought into court draped in crepe. Mr. Bird asked the witness, Mr. Denison, why he did not call the witness, Denison, "it was to remind us of the murder of one of our sympathizers, who was shot from the C. P. R. property."

In answer to the Chief Justice, Mr. Denison said that they had conducted the strike without any bloodshed and the C. P. R. had in vain tried to prove an illegal act against one of their members. The witness, continuing, said that there were rows, but this would naturally follow when the scum of humanity from Eastern cities were brought here to take the places of strikers.

Smoke from fires caused a haze to settle over Cedar Hill yesterday. As a consequence the helicopter corps stationed on Grouse Mountain could not see the city.

Mr. J. A. South, J. P., and secretary of the Children's Aid Society, is under arrest charged with indecent assault on a girl under the age of sixteen.

Mr. C. J. South, J. P., and secretary of the Children's Aid Society, is under arrest charged with indecent assault on a girl under the age of sixteen.

U. S. POSTAL FRAUDS.

Denver, Colo., June 8.—The Federal grand jury has found a true bill against the Great West, in connection with the alleged offering of bribes to A. W. Machen, former superintendent of the post office free department.

VENEZUELAN REVOLUTION.

Paris, June 8.—The Venezuelan legation has received a cable message from Caracas saying that after a brilliant campaign, including the fight with Barrios and Corales, the revolution is ended.

CRUSHED BY ELEVATOR.

Paris, June 8.—Constance, the young daughter of Archibald Grace, of New York, was crushed to death at the Hotel de La Tonnelle yesterday evening while attempting to enter a descending freight elevator. Mr. Grace is a relative of President Roosevelt.

STILL HUNTING FUGITIVES.

Montana Murderers at Large and One Victim. Glasgow, Mont., June 8.—Jack Williams, Sheriff, and his deputy, a guard shot by George Pierce, one of four escaped prisoners Saturday night, are still hunting for the remainder of the men. All available men in the vicinity have been organized for hunt for the men.

Government Spars For Time

Mr. Borden and Iron Duties Cause Opponents Much Thinking.

Instructions to Treadgold Commission Falsify Ross and Congdon's Promises.

From Our Own Correspondent. Ottawa, June 8.—The government of the day has no love for the C. P. R. The House dawdled along for several days in order to make an amendment to the iron and steel duties. The government cannot make up its mind as to what to do on this subject, but probably by tomorrow will have evolved a policy.

The instructions to the commission to investigate the Treadgold concessions are deliberately falsifying the promises made by Messrs. Ross and Congdon to the electors of the Yukon. The order-in-council simply sets forth the difficulty of carrying on mining in the Yukon, that it has been represented that the Treadgold concession is a monopoly detrimental to the mining industry, and that an enquiry should be made to obtain information showing to what extent this and other similar concessions are likely to be beneficial.

British Cabinet Consider Crisis

Situation Extremely Tense and Probable that Chamberlain Will Resign.

Not Thought Likely That Dissolution Will Come Before the Autumn.

London, June 8.—The interest in the proceedings of parliament tonight was entirely secondary to that shown in the Probly discussion regarding the prospects of the finance debate, which takes place tomorrow.

The appropriations for the postal service was passed with only a small attendance in the House, attention being given to the Chamberlain's amendment to the finance bill, opposing the remission of the tax on wheat, which will be discussed tomorrow.

Much uncertainty still prevails as to whether the government will permit an extensive discussion on their general financial programme, but it is thought likely that the debate will be closely limited to the wheat tax, opposing the remission of the tax on wheat, which will be discussed tomorrow.

The Chamberlain certainly succeeded in arousing strong opposition among the ranks of the workmen, a prominent trade union leader speaking at Birmingham tonight, offering to contest the district of the labor platform. It is significant, at the moment the possible crisis that Capt. Wells of the Metropolitan fire bridge has been appointed head agent of the Conservative party in succession to R. W. Middleton.

Mr. Chamberlain's letter to the Colonial Secretary was published yesterday, which in regard to the policy of the government, published yesterday, which in regard to the policy of the government, published yesterday.
