To Architects, Sash Manufacturers, Builders and others.

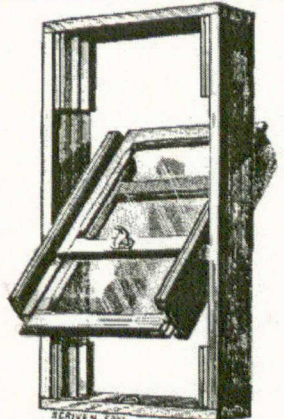

DUVAL'S WEIGHTLESS REVERSIBLE WINDOW

THESE SASHES

Need no weights for raising or lowering.
Remain where placed without supports.
Can be reversed on pivot, so that the outside can be
cleaned as easily as the inside.
Permit better ventilation than ordinary windows—the
whole window space if required, or space at top and bottom,
or at the top only.
Have simple, self-acting mechanism, not liable to get out
of order like weights and cords.
Are safer against burglary.
Can be made by any sash manufacturer with his existing
machinery, and fitted by any ordinary mechanic.
Are far cheaper than weighted sashes.
Are little dearer than the ordinary weightless sash.

For Duval's Sashes, or permission to manufacture them, apply to the patentees
where working models may also be seen, or further information obtained.
County or mill rights will be granted; for terms apply to

E. DUVAL & CO. (PATENTEES) 403 James St. N.,
HAMILTON, ONT.
