

## TABLE OF CONTENTS (continued)

	<u>Page Number</u>
3.9 SULPHATE LOADING TARGETS CONSISTENT WITH PROTECTION OF AQUATIC ECOSYSTEMS	3-112
3.9.1 The Relative Significance of Sulphur and Nitrogen Deposition to Acidification of Surface Waters	3-113
3.9.2 Methodologies for Estimating Target Loadings	3-117
Almer/Dickson Relationship	3-118
Henriksen Nomograph	3-120
Cation Denudation Rate (CDR) Model	3-124
Short-Term or Episodic Effects	3-126
3.9.3 Summary of Loadings and Target Loadings	3-129
3.10 RESEARCH NEEDS	3-132
3.10.1 Critical Research Topics	3-135
Element Fluxes and Geochemical Alterations of Watersheds	3-135
Alterations of Surface Water Quality	3-135
Alteration of Biotic Components	3-136
Irreversible Impacts	3-137
Target Loadings and Model Validation for Phase III	3-138
3.10.2 Long-Term Data Collection and Monitoring	3-139
3.11 REFERENCES - AQUATIC IMPACTS	3-141
SECTION 4 <u>TERRESTRIAL IMPACTS</u>	
4.1 INTRODUCTION	4-1
4.2 EFFECTS ON VEGETATION	4-2
4.2.1 Agricultural Crops	4-2
4.2.2 Forest Ecosystems	4-11
