

World Bank

The World Bank (WB) supports the economic development of poor countries by making loans to governments. It also provides technical assistance on matters relating to the countries' economic development.

The WB also encourages co-financing of its loans with official banks and commercial banks. The WB also encourages co-financing of its loans with official banks and commercial banks. The WB also encourages co-financing of its loans with official banks and commercial banks.

The largest share of lending is to finance investments in agriculture and rural development projects. The WB also encourages co-financing of its loans with official banks and commercial banks.

Partly, it plays a key role in the implementation of structural adjustment programs in many countries.
