

January 5, 1931.

Dr. Stephen Leacock,
Department of Economics,
McGill University.

Dear Dr. Leacock,

Enclosed you will find description of the Garton Studentship in Social Science, of which you have heard in previous years. A letter addressed to the Principal calls our special attention to the matter and asks that if we have a candidate to recommend for the studentship we have the documents in London not later than February 1st.

Are there any graduate students or junior members of the staff whom you would like to recommend? Would you please let me know without delay, and also return the enclosed notice, so that I may get the proper letter off to London in due course.

From correspondence on file it appears that Sir Arthur is most anxious to have McGill put up a candidate this year, if possible.

Yours faithfully,

Assistant to the Principal
